## HOW TO READ THIS DOCUMENT

The text in this section is for explanatory purposes and does not form part of the Intensification Planning Instrument (IPI).

The following formatting conventions are used to identify proposed changes to the District Plan:

1. Text that is red and struck through (~~example~~) is to be deleted from the District Plan.
2. Text that is blue and underlined (example) is to be inserted into the District Plan.
3. Text that is shown in green (example) is text that is required by Section 80H of the Resource Management Act (RMA) to identify the provisions that incorporate, or are replaced by, the Medium Density Residential Standards (MDRS). This text does not form part of the IPI, and will be removed when the IPI becomes operative.
4. Text that is for explanatory purposes that does not form part of the IPI is preceded by the following or similar wording: *This section/paragraph is explanatory only and does not form part of the IPI.*

			<b>PART 4 – APPENDICES AND MAPS</b> Appendix1 – <del>Design Guide for the Residential Centres Precinct</del> <a href="#">Medium and High Density Design Guide</a> <a href="#">Appendix 2 – City Centre Design Guide</a>
<b>2 HOW THE PLAN WORKS</b>			
<b>2.2 General Approach</b>			
2	2.2 General Approach	Add new zones	<b>Zones</b> The technique of zoning is used as the principle method for managing the <b>effects of activities</b> to enable <b>sustainable management</b> of resources. Zoning recognises the different environments within the City and the <b>effects</b> that different <b>activities</b> have on those environments. The District Plan contains the following core zones: <ul style="list-style-type: none"> <li>• General Residential Zone</li> <li>• <a href="#">High Density Residential Zone</a></li> <li>• General Rural Zone</li> <li>• Rural Production Zone</li> <li>• Rural Lifestyle Zone</li> <li>• <del>Commercial Business Zone</del></li> <li>• <a href="#">Neighbourhood Centre Zone</a></li> <li>• <a href="#">Local Centre Zone</a></li> <li>• <a href="#">Mixed Use Zone</a></li> <li>• <a href="#">Town Centre Zone</a></li> <li>• City Centre Zone</li> <li>• General Industrial Zone</li> <li>• Open Space Zone</li> <li>• Special Activities Zone</li> </ul>
	2.2 General Approach	Delete Section 2.4.7	<del><b>2.4.7—Specific information accompanying applications for a Comprehensive Residential Development</b></del>  <del>An application under the Comprehensive Residential Development provisions of the Plan must include an assessment of the proposed development against the Design Guide for the Residential Centres Precinct. The design guide is detailed within Appendix 1.</del>

IPI - PROPOSED AMENDMENTS					
#	Chapter	Change	Track Change		
	2.2 General Approach	Delete Section 2.4.8	<p><del>2.4.8—Specific information accompanying applications for subdivision or development within a the Residential Centres Precinct that is not a Comprehensive Residential Development where any allotment has a minimum net site area of less than 400m<sup>2</sup></del></p> <p><del>Where the proposed development includes an allotment under a minimum net site area of less than 400m<sup>2</sup>, an assessment of the proposed development must be provided using the section on small site design and development contained in the Design Guide for the Residential Centres Precinct. The design guide is detailed within Appendix 1.</del></p>		
3 INTERPRETATION					
3.1 Definitions					
	3.1 Definitions	Replace definition for Accessory building	<p><b>Accessory building</b></p> <p><u>NPS</u></p> <p><del>means a detached building, the use of which is ancillary to the use of any building, buildings or activity that is or could be lawfully established on the same site, but does not include any minor residential unit.</del></p> <p><del>a building which is accessory to the main use of the site. On residential sites, this includes garages, carports, workshops, garden sheds, swimming pools, spa pools and glasshouses that are not used for commercial purposes other than home business. It also includes walls, fences and retaining walls defined as buildings.</del></p> <p><del>For the purposes of the Southern Hills Overlay Area, accessory buildings do not include any building in the General Residential Zone or Residential Hill Precinct which exceeds 36m<sup>2</sup> in floor area and/or 3 metres in height. (See definition of “building”)</del></p>		
	3.1 Definitions	Add definition for Ancestral Land	<table border="1"> <tr> <td><b>Ancestral Land</b></td> <td>Means land that belonged to tipuna/tupuna.</td> </tr> </table>	<b>Ancestral Land</b>	Means land that belonged to tipuna/tupuna.
<b>Ancestral Land</b>	Means land that belonged to tipuna/tupuna.				
	3.1 Definitions	Add definition for Commercial Service Activity	<p><b>Commercial Service Activity</b></p> <p>means any activity that provides commercial services rather than goods. It includes:</p> <ul style="list-style-type: none"> <li>(a) bank;</li> <li>(b) commercial indoor fitness centres/gymnasiums/play areas;</li> <li>(c) professional and financial services;</li> <li>(d) commercial sexual services;</li> <li>(e) dry cleaner;</li> <li>(f) funeral director premises;</li> </ul>		

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<ul style="list-style-type: none"> <li>(g) <a href="#">beauty and appearance industries;</a></li> <li>(h) <a href="#">real estate agent;</a></li> <li>(i) <a href="#">show home;</a></li> <li>(j) <a href="#">travel agent; and</a></li> <li>(k) <a href="#">veterinary clinic.</a></li> </ul>
	3.1 Definitions	Delete definition for Comprehensive residential development	<p><b>Comprehensive residential development</b></p> <p><del>a residential development of at least three residential units, on a site within a the Residential Centres Precinct, at a density greater than the minimum net site area requirement for the General Residential Zone.</del></p> <p><del>Note: A Comprehensive Residential Development may include an existing residential unit.</del></p>
	3.1 Definitions	Add definition for Drive-through activity	<p><b>Drive-through activity</b></p> <p><a href="#">means any activity with a substantial focus on drive-through transactions, including service stations and drive-in or drive-through retail and services outlets and restaurants.</a></p>
	3.1 Definitions	Add definition for Drive-through restaurant	<p><b>Drive-through restaurant</b></p> <p><a href="#">means any land or building on or in which food and beverages are prepared, served and sold to the public inclusive of a facility designed to serve customers in their vehicles, for the consumption on or off the premises and may include an ancillary cafe or playground area.</a></p>
	3.1 Definitions	Add definition for Driveway	<p><b>Driveway</b></p> <p><a href="#">means an access way designed and constructed for use by motor vehicles, pedestrians or cyclists.</a></p>
	3.1 Definitions	Add definition for Dwelling	<p><b>Dwelling</b></p> <p><a href="#">means residential unit.</a></p>
	3.1 Definitions	Add definition for Emergency service facility	<p><b>Emergency service facility</b></p> <p><a href="#">means places occupied by organisations that respond to and deal with accidents, emergencies, or urgent problems such as fire, illness, or crime.</a></p> <p><a href="#">Includes:</a></p> <ul style="list-style-type: none"> <li>(a) <a href="#">police, fire and ambulance stations;</a></li> <li>(b) <a href="#">surf lifesaving activities;</a></li> </ul>

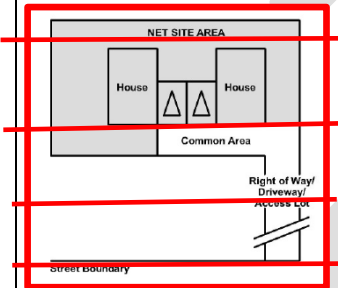

IPI - PROPOSED AMENDMENTS

			<p>5. <u>enabling a variety of <b>building heights</b> and densities, including 3-storey <b>buildings</b>, to occur within the <b>General Residential Zone</b>;</u></p> <p><u>while avoiding inappropriate locations, <b>heights</b> and densities of <b>buildings</b> and development within <b>qualifying matter areas</b> as specified by the relevant <b>qualifying matter area</b> provisions.</u></p>
	UFD – Urban Form and Development Residential	Amend existing Strategic Direction relating to Residential	<p>The residential areas within the City are characterised by ...</p> <p>Demand for higher density residential development is increasing in the City and the manner in which the District Plan provides for <del>higher density residential development is important to the character and amenity of existing established neighbourhoods</del> <u>medium density housing within the <b>General Residential Zone</b></u>. Higher density residential development is becoming more desirable to certain sectors of the community and it is also desirable in establishing a variety of housing types and styles, thereby providing a greater variety to the housing stock of the City.</p> <p>Higher density residential development is <del>best located</del> <u>provided for within walkable catchments of</u> <del>in close proximity to</del> <b>retail</b>, service and public transport centres specifically near the City Centre Zone (central business district), neighbourhood centres and major transport nodes. Higher density residential development is provided for in these areas <u>via the <b>High Density Residential Zone</b> in the form of <b>Comprehensive Residential Development</b> and by way of an increased density for residential development.</u></p> <p>Within the <b>General Residential Zone</b> <del>existing</del> <u>qualifying matter areas</u> may limit the amount of permitted medium density development possible on an allotment. <del>†The Residential Conservation and Residential Hill</del> <u><b>Indigenous Biodiversity Qualifying Matter Precincts</b> provides additional policy direction and guidance to encourage the protection and retention of</u> <del>reflect</del> <u>the particular identified environmental and topographical characteristics</u> <u>indigenous biodiversity values</u> of those areas.</p> <p><u>The <b>Indigenous Biodiversity Qualifying Matter Precinct</b> contains the City’s urban significant natural areas. This Precinct contains areas of continuous significant <b>indigenous vegetation</b> and significant habitats of indigenous fauna in the City’s urban areas that have been identified in accordance with the requirements of the Regional Policy Statement for the Wellington Region. The <b>Indigenous Biodiversity Qualifying Matter Precinct</b> puts in place additional policy direction and guidance to encourage the maintenance of indigenous biodiversity values. As a Matter of National Importance under section 6(c) of the Resource Management Act 1991, the inclusion of the <b>Indigenous Biodiversity Qualifying Matter Precinct</b> acts as a placeholder until the <b>Council</b> progresses its significant natural areas plan change to update the significant natural areas identified in the district plan, and their associated objectives, policies, rules, standards and other relevant provisions into the District Plan. In the meantime, the relevant <b>Urban Environment Allotment</b> and Urban Tree Group <b>indigenous vegetation clearance</b> rules continue to apply under chapters ECO-Ecosystems and Indigenous Biodiversity, and UTG – Urban Tree Groups.</u></p> <p>The City’s residential areas are ...</p> <p>The amount of <b>land</b> suitable for urban use ...</p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p>The primary role of the <b>General Residential Zone</b> is to provide opportunities for <b>residential activity in a way that enables all people and communities to provide for their social, economic, and cultural wellbeing and for their health and safety</b>. Residents want a range of living styles to reflect their various needs, <del>while maintaining high levels of amenity and residential character</del>. In the <b>General Residential Zone</b>, the provisions of the Plan seek to ensure that new development will be provided for in a manner that <del>will respect existing forms</del> <b>responds to the planned urban built character, including 3-storey buildings</b>.</p> <p>Certain non-residential activities are ...</p> <p>Within the <b>General Residential Zone</b> of the City are <b>environments</b> with special character. The Residential Conservation Precinct includes the areas adjoining Trentham Memorial Park, Palfrey Street, Chatsworth Road and parts of Pinehaven. These areas have a mature landscape and townscape, contain native flora and fauna, natural watercourses, as well as larger sections. They also include residential development on the hills surrounding the urban area. <del>These areas require a lower density of development in order to maintain their important landscape and ecological values.</del></p> <p>In contrast, the Residential Hill Precinct is ...</p> <p><del>Higher density housing may suit the needs of certain groups of the community. It is important to locate higher density housing in appropriate areas. The Plan identifies areas where higher density housing is specifically encouraged due to the proximity of these areas to retail and service centres and transport nodes.</del></p> <p>To ensure that new <b>higher medium and high-density</b> residential development, <del>including Comprehensive Residential Development</del>, is well designed, <del>use of and achieves a high degree of amenity, assessment against the design outcomes identified within the Medium and High Density Design Guide (Appendix 1) for Residential Developments</del> will be <b>encouraged for permitted activity medium density residential development, and will be a matter of discretion for medium and high density residential development that requires a resource consent required</b>.</p>
	UFD – Urban Form and Development Commercial and Industrial	Delete existing Strategic Direction relating to Commercial and Industrial	<p><del>Businesses within the City are located in the Central Business District (CBD), commercial and industrial areas, and suburban areas. Some parts of the business areas include hotels, tourist facilities and other activities.</del></p> <p><del>Historically, the location of industry in Upper Hutt has been influenced by two factors, land availability in southern and eastern Upper Hutt and the close proximity of transportation links.</del></p> <p><del>Business activities in general, while vital to the well-being of the community, may have a range of adverse effects on the surrounding environment, including residential areas. These effects need to be identified and managed to ensure that amenity values are not diminished.</del></p> <p><del>The efficient use of the existing infrastructure and resources of the commercial and industrial areas, including new development, is considered to be an important resource management matter.</del></p>

IPI - PROPOSED AMENDMENTS									
#	Chapter	Change	Track Change						
			<p><del>The variety of activities which exist in the commercial areas contributes to the vitality and convenience of the City. A number of distinct commercial and industrial areas are found in the City.</del></p> <p><del>Some commercial areas within the City are characterised by pedestrian orientated activities and amenities. Large scale industrial, warehousing and storage facilities, which are vehicle orientated, may adversely impact on the pedestrian environment of the CBD. It is therefore important to recognise the particular elements which affect the amenity values of an area.</del></p> <p><del>The business areas within the City are divided into three specific zones to reflect the Plan's policies:</del></p> <ul style="list-style-type: none"> <li><del>• The Commercial zone focuses on retail and service functions which support the local community. This includes suburban centres which provide for a limited range of shopping and business needs. Local shops and dairies provide day to day convenience shopping.</del></li> <li><del>• The CBD accommodates a variety of activities in a compact, convenient layout which is characterised by pedestrian orientated traffic. Commercial activities are also provided for at Silverstream and other suburban areas. These areas provide for a limited range of shopping and business needs. The smaller neighbourhood shops, including dairies, provide for day to day convenience shopping.</del></li> </ul> <p><del>The Industrial zone incorporates land which is used for a range of business activities, but in particular larger scale industrial, warehousing, storage and commercial activities which are vehicle rather than pedestrian orientated. There are limited retail activities within these areas and the environmental standards are less stringent than those within the Commercial zone.</del></p>						
	UFD – Urban Form and Development Commercial and Mixed Use	Introduce new Strategic Direction relating to Commercial and Mixed Use – Well-functioning Urban Environments	<p><a href="#">For the Commercial and Mixed Use Zones the following Strategic Objectives apply:</a></p> <table border="1"> <tr> <th colspan="2"><a href="#">Strategic Objectives – Commercial and Mixed Use</a></th> </tr> <tr> <td><a href="#">CMU-01</a></td> <td><a href="#">Well-functioning Urban Environments</a></td> </tr> <tr> <td colspan="2"><a href="#">The Commercial and Mixed Use Zones are well-functioning urban environments that enable all people and communities to provide for their social, economic, and cultural wellbeing, and for their health and safety, now and into the future</a></td> </tr> </table>	<a href="#">Strategic Objectives – Commercial and Mixed Use</a>		<a href="#">CMU-01</a>	<a href="#">Well-functioning Urban Environments</a>	<a href="#">The Commercial and Mixed Use Zones are well-functioning urban environments that enable all people and communities to provide for their social, economic, and cultural wellbeing, and for their health and safety, now and into the future</a>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
<b>SUB-RES – Subdivision in Residential Zones</b>			
	SUB-RES – Subdivision in the General Residential Zone	Amend Chapter heading	<b>SUB-RES – Subdivision in <u>the General</u> Residential Zones</b>
	SUB-RES – Subdivision in the General Residential Zone	Delete Issues	<del><b>Issues</b> <b>SUB-RES-I1</b> — <i>The effects on amenity values of new subdivisions within and adjoining established residential areas.</i>  The amount of <b>land</b> suitable for urban use is influenced by servicing, topographical, ecological and other constraints. The General Residential Zone covers the existing residential areas as well as undeveloped <b>land</b> suitable for residential use in the future. Expansion of existing urban areas will be encouraged in appropriate <b>environments</b> with the existing urban areas being the preferred location for higher density development. <b>Council</b> will promote the maintenance of the general character and <b>amenity values</b> of particular neighbourhoods.</del>
	SUB-RES – Subdivision in the General Residential Zone	Amend Objective	<b>SUB-RES-O1</b> <i>The management of the adverse <b>effects</b> of <b>subdivision</b> within <del>residential areas</del> <u>the General Residential Zone</u>.</i>  <del>This objective seeks to provide for <b>subdivision</b> which promotes residential <b>amenity values</b>, creates safe and well-designed housing development and promotes the efficient use of <b>natural and physical resources</b>.</del>
	SUB-RES – Subdivision in the General Residential Zone	Add Objective	<b>SUB-RES-O2</b> <u><i>A well-functioning Urban Environment that enables all people and communities to provide for their social, economic, and cultural wellbeing, and for their health and safety, now and into the future.</i></u>  <u>[s80H(1)(a)(ii) note: this provision incorporates the objectives in clause 6 of Schedule 3A.]</u>
	SUB-RES – Subdivision in the General Residential Zone	Add Objective	<b>SUB-RES-O3</b> <u><i>To encourage the maintenance of indigenous biological diversity values within the Indigenous Biodiversity Qualifying Matter Precinct.</i></u>
	SUB-RES – Subdivision in the General Residential Zone	Amend Policy	<b>SUB-RES-P1</b> <i>To ensure that the scale, appearance and siting of <b>buildings, structures</b> and <b>activities</b> are compatible with the <u>planned built</u> character <del>and desired amenity values</del> of the area.</i>  <del>On the land identified in SUB-RES Figure 2, particular care needs to be taken with the design of any residential subdivision to ensure that it appropriately addresses the interface with Maidstone Park and the adjoining General Industrial Zone.</del>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
	SUB-RES – Subdivision in the General Residential Zone	Amend Policy	<p><b>SUB-RES-P2</b> To <u>encourage</u> <del>avoiding, remedying and mitigating the actual and potential adverse effects of the subdivision of sites within the Indigenous Biodiversity Qualifying Matter Precinct to assist in maintaining indigenous biological diversity on land identified in SUB-RES Figure 2 ('Maidstone Terrace Residential') which does not comply with site specific standards controlling the number of allotments and residential units, access from Railway Avenue, boundary setbacks and fencing.</del></p> <p><del>On the land identified in SUB-RES Figure 2, particular care needs to be taken with the design of any residential development to ensure that it appropriately addresses the interface with the adjoining General Industrial Mixed Use Zone. In particular, site specific standards apply to the site and compliance with these standards is critical to ensuring that subdivision is appropriate.</del></p>
	SUB-RES – Subdivision in the General Residential Zone	Amend Policy	<p><b>SUB-RES-P3</b> To <u>encourage the protection of trees and vegetation which contribute to the amenity values, landscape values, character, ecological, historical and cultural values within of the Conservation and Hill Precincts Indigenous Biodiversity Qualifying Matter Precinct.</u></p> <p><del>Trees add to the character of residential areas and also have ecological, historical, and cultural values.</del></p> <p><del>The Conservation and Hill Indigenous Biodiversity Qualifying Matter Precincts have special qualities which merit the protection of trees. They also merit different requirements for encourages the consideration of subdivision to assist in protecting and maintaining their amenity values indigenous biodiversity values as part of the subdivision process. All MDRS subdivision and density standards apply in the Precinct. The Council intends to revisit these issues as part of a future district plan change that will give effect to section 6(c) of the Resource Management Act – the protection of areas of significant indigenous vegetation and significant habitats of indigenous fauna.</del></p>
	SUB-RES – Subdivision in the General Residential Zone	Amend Policy	<p><b>SUB-RES-P4</b> To provide for new residential development within the City in a sustainable manner.</p> <p><del>The edge of the urban area is defined primarily by a rural interface. Council generally intends to contain new residential development within the existing zoned urban area. Continuous expansion at the City's edge, while large parts of the urban areas remain undeveloped, does not constitute sustainable management.</del></p> <p><del>Greenfield subdivision, for urban residential development outside Residential Zones should be considered by way of a District Plan change to extend the urban area. This enables the full effects of the potential development to be assessed.</del></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
	SUB-RES – Subdivision in the General Residential Zone	Amend Policy	<p><b>SUB-RES-P5</b> To <del>promote</del> <u>provide for subdivision with a high level of amenity that is compatible with the planned built character of the General Residential Zone,</u> and ensure that it has adequate access to infrastructural requirements.</p> <p><del>The Plan provides for the intensification of land use within the urban area to accommodate residential development where adverse effects can be avoided, remedied or mitigated.</del></p> <p><del>Subdivision requires resource consent because Council may need to impose conditions that relate to provision or co-ordination of services and other matters relating to the sustainable management of resources.</del></p>
	SUB-RES – Subdivision in the General Residential Zone	Amend Policy	<p><b>SUB-RES-P6</b> To <del>encourage</del> <u>provide for higher medium density housing within the General Residential Zone, while encouraging the consideration of the protection and retention of indigenous biodiversity values within</u> <del>through the provision of reduced net site area standards and in the form of Comprehensive Residential Developments in identified areas of the City</del> <u>the Indigenous Biodiversity Qualifying Matter Precinct.</u></p> <p><del>The Plan identifies areas considered suitable for higher density residential development. These areas are located surrounding the City Centre Zone, around the Trentham neighbourhood centre located at Camp Street, near the Wallaceville railway station from Ward Street to Lane Street and within the Urban Precinct and Grants Bush Precinct of the Wallaceville Structure Plan Development Area.</del></p> <p><del>These areas are in close proximity to retail and service facilities as well as the availability of major transport points, including rail and bus services, and a major bus terminal in the CBD.</del></p> <p><del>The reduction of net site area standards in the Residential Centres Precinct recognises a minimum site area Council is prepared to allow for housing development. Any reduction below this minimum net site area is provided for as a discretionary activity and will be assessed against the Design Guide for Comprehensive Residential Development so as to ensure that any subdivision or development below this net site area can still achieve a high quality.</del></p>
	SUB-RES – Subdivision in the General Residential Zone	Add Policy	<p><b>SUB-RES-P7</b> <u>Encourage development to achieve attractive and safe streets and public open spaces, including by providing for passive surveillance.</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the policies in clause 6 of Schedule 3A of the Act]</u></p>
	SUB-RES – Subdivision in the General Residential Zone	Add Policy	<p><b>SUB-RES-P8</b> <u>Enable housing to be designed to meet the day-to-day needs of residents.</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the policies in clause 6 of Schedule 3A of the Act]</u></p>

#	Chapter	Change	Track Change
			<p>(4) Vehicular access to a <b>corner allotment</b> lot shall be located no closer than 8m from the street corner. Where a <b>site</b> is located on an intersection of a primary or secondary arterial traffic route (identified in the Transport and Parking (TP) Chapter the siting of the vehicular access shall be located as far as practicable from the corner of the street. The 8 metre <b>setback</b> shall be measured from where the two front <b>boundaries</b> of the <b>site</b> (refer to the definition of a <b>corner allotment</b> lot) join, or in accordance with the diagram below.</p>  <p>The diagram illustrates a corner allotment lot at a street intersection. A 'Road Reserve' is shown on the top and right sides. A 'Driveway' is shown on the left side of the lot, leading to a 'Building'. A dimension line indicates an '8m min' setback from the corner of the road reserve to the driveway. A 'Road Reserve' label is also present on the right side of the lot.</p> <p>(5) Where a <b>corner allotment</b> lot is located at an intersection of a national, primary or secondary arterial traffic route, as identified in the Transport and Parking (TP) Chapter, no <b>building</b>, fence or other <b>structure</b> is to be erected and no vegetation allowed to grow so as to obstruct a traffic sight line.</p> <p>(6) At the intersection of a <b>road</b> or rail level crossing, no <b>building</b>, fence or other obstructions which block sight lines for trains shall be erected, placed or grown in the hatched area marked in Diagram 1A in the Transport and Parking (TP) Chapter.</p> <p>(7) <b>Subdivision</b> with direct access to a State Highway shall comply with the access and visibility standards set out in Diagrams 2 to 9 in the Transport and Parking (TP) Chapter.</p>

PK – Papakāinga						
	PK-Papakāinga	Insert new papakāinga chapter	<p><b><u>PK – Papakāinga</u></b></p> <p><b><u>Background</u></b></p> <p>The purpose of the <b>Papakāinga</b> Chapter is to assist <b>tangata whenua</b> in the development and use of <b>papakāinga</b> on their <b>ancestral land</b>. <b>Ancestral land</b> is <b>land</b> that belonged to <b>tipuna/tupuna</b>. It was a base upon which the <b>hapū</b> was nurtured and was handed down in succession through generations by continuous occupation. This is known as <b>ahi kā</b> or <b>ahi kā roa</b>. In the context of the District Plan, <b>ancestral Māori land</b> includes <b>land</b> held under the Te Ture Whenua Māori Act 1993, <b>Māori customary land</b>, <b>Māori freehold land</b>, and <b>general title land</b> owned by Māori.</p> <p>It is recognised that <b>tangata whenua</b> face barriers to developing and using their <b>land</b> in the way that fits into the principle of <b>Tino Rangatiranga</b>, and that this is different to <b>land</b> held in European title. The emergence of these barriers can be linked to the process of <b>land</b> alienation. This process occurred alongside the introduction by the Crown of a system of <b>land</b> tenure that individualised title to <b>land</b> in a manner that did not provide for the communal approach that underpinned Māori institutions, including Māori decision-making around the traditional use and development of <b>land</b>. Over time, this has contributed to the fragmentation and loss of <b>land</b> owned by <b>tangata whenua</b>, and created barriers to the development of the <b>land</b> that does remain in the ownership of <b>tangata whenua</b>.</p>			

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p>The status of <b>Māori land</b> held under Te Ture Whenua Māori Act 1993 creates unique ownership issues, demonstrating the need for <b>Māori land</b> to be treated differently to <b>land</b> under European title. The costs associated with obtaining approval for <b>papakāinga</b> development from <b>Council</b> and other organisations are an issue for <b>tangata whenua</b>. The provisions in this Chapter seek to reduce the barriers that <b>tangata whenua</b> face in the development of <b>papakāinga</b> on their <b>ancestral land</b>.</p> <p><b>Papakāinga</b> developments are developments led by Māori landowners on their <b>ancestral land</b>. These developments reconnect Māori to their <b>land</b>. <b>Papakāinga</b> development provides a pathway to sustain the social, economic and cultural well-being of <b>tangata whenua</b>. <b>Papakāinga</b> developments include housing and associated <b>activities</b> such as social, cultural, educational, recreational and <b>commercial activities</b>.</p> <p>This Chapter contains the provisions that provide for the development and use of <b>papakāinga</b> by <b>tangata whenua</b> on <b>land</b> where there is a <b>whakapapa</b> or ancestral connection. In addition to providing for <b>papakāinga</b> through these provisions, the <b>Council</b> is committed to working actively with <b>tangata whenua</b> on the development of <b>papakāinga</b> through the range of other strategies and plans that it prepares and implements (including the Long Term Plan and Infrastructure Strategy).</p> <p>The Objectives and Policies, rules and standards contained within this Chapter apply to <b>papakāinga</b> throughout the <b>City</b>. <b>Papakāinga</b> is specifically provided for within the following zones:</p> <ul style="list-style-type: none"> <li>(i) <u>The <b>General Residential Zone</b>;</u></li> <li>(ii) <u>The <b>High Density Residential Zone</b></u></li> <li>(iii) <u>The <b>General Rural Zone</b>;</u></li> <li>(iv) <u>The <b>Rural Production Zone</b>;</u></li> <li>(v) <u>The <b>Rural Lifestyle Zone</b>;</u></li> <li>(vi) <u>The <b>City Centre Zone</b>;</u></li> <li>(vii) <u><b>Town Centre Zone</b></u></li> <li>(viii) <u><b>Local Centre Zone</b>;</u></li> <li>(ix) <u><b>Neighbourhood Centre Zone</b>; and</u></li> <li>(x) <u><b>Mixed Use Zone</b>.</u></li> </ul>

## IPI - PROPOSED AMENDMENTS

#	Chapter	Change	Track Change
			<p><b><u>Objectives</u></b></p>
			<p><b><u>PK-01</u></b>      <b><u>Papakāinga – Papakāinga are a Taonga</u></b>  <i>To provide for traditional <b>papakāinga</b>, which are a <b>taonga</b> that:</i></p> <ul style="list-style-type: none"> <li>(i) <i>empower and enable <b>tangata whenua</b> to live on their <b>ancestral land</b>;</i></li> <li>(ii) <i>provide for <b>tangata whenua</b> to maintain and enhance their traditional and cultural relationship with their <b>ancestral land</b>; and</i></li> <li>(iii) <i>are developed and used in accordance with <b>tikanga Māori</b>, while recognising that <b>papakāinga</b> may develop their own <b>tikanga</b>.</i></li> </ul>
			<p><b><u>PK-02</u></b>      <b><u>Papakāinga – Kia ora te mauri o te Whānau (Māori living as Māori)</u></b>  <i>Oranga is central to a thriving whānau/hapū/iwi. <b>Tangata whenua</b> are supported to ensure they can thrive as a Māori community living on and around their <b>papakāinga</b>.</i></p> <p><i>To provide for <b>papakāinga</b> development that achieves:</i></p> <ul style="list-style-type: none"> <li>(i) <i>a place where kaupapa and <b>Tikanga Māori</b> are in the ascendant;</i></li> <li>(ii) <i>affordable, warm, dry and safe housing for <b>tangata whenua</b>;</i></li> <li>(iii) <i>security of tenure, connection and participation for <b>tangata whenua</b> in their community; and</i></li> <li>(iv) <i>access to the services needed by <b>tangata whenua</b> to sustain their housing.</i></li> </ul>
			<p><b><u>PK-03</u></b>      <b><u>Papakāinga – Provide for the sustained occupation of ancestral land</u></b>  <i>To provide for the sustained occupation of <b>ancestral land</b> by <b>tangata whenua</b>, through <b>papakāinga</b> development that provides for the <b>land</b> to be held and managed for the benefit of current and future generations.</i></p>
			<p><b><u>PK-04</u></b>      <b><u>Papakāinga – Provide for the development of land owned by Tangata Whenua</u></b>  <i>To provide for the connection between <b>tangata whenua</b> and their <b>ancestral land</b> through providing for the development of <b>papakāinga</b> on land owned by <b>tangata whenua</b>.</i></p>
			<p><b><u>PK-05</u></b>      <b><u>Papakāinga – Working in partnership with Tangata Whenua to exercise their Tino Rangatiratanga</u></b></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p>To work in partnership with <b>tangata whenua</b> to exercise their <b>tinu rangatiratanga</b> through the development of <b>papakāinga</b>, by providing maximum flexibility for <b>tangata whenua</b> to develop and live on their <b>ancestral land</b>, within the limitations of the <b>site</b>.</p>
			<p><b>PK-06</b> <u><b>Papakāinga – Increasing the visibility of Tangata Whenua through the design of papakāinga</b></u>  To increase the visibility of <b>tangata whenua</b> through <b>papakāinga</b> design that is led by <b>tangata whenua</b> and guided by <b>tikanqa Māori</b>.</p>
			<p><b>PK-07</b> <u><b>Papakāinga – Implementing Te Ao Māori and demonstrating Kaitiakitanga in papakāinga development</b></u>  To protect and enhance ecological, cultural and environmental and indigenous values through the design, development and use of <b>papakāinga</b>.</p>
			<p><b>Policies</b></p>
			<p><b>PK-P1</b> <u><b>Providing for papakāinga on Māori owned land</b></u>  <b>Papakāinga</b> will be:  (i) <u>provided for on <b>land</b> held under Te Ture Whenua Māori Act 1993; and</u>  (ii) <u>allowed on <b>general title land</b> where it can be demonstrated that there is a <b>whakapapa</b> or <b>ancestral connection</b> to the <b>land</b>, and the <b>land</b> will remain in Māori ownership.</u></p>
			<p><b>PK-P2</b> <u><b>Papakāinga development to be led by Tangata Whenua</b></u>  The design and development of <b>papakāinga</b> will be led by <b>tangata whenua</b>.</p>
			<p><b>PK-P3</b> <u><b>Location, extent and design of papakāinga</b></u>  The location, extent and design of <b>papakāinga</b>, including extensions to existing <b>papakāinga</b>, will be guided by kaupapa Māori in accordance with <b>tikanqa Māori</b>.</p>
			<p><b>PK-P4</b> <u><b>Maximum scale of papakāinga development</b></u>  The maximum intensity and scale of <b>papakāinga</b> development will be determined by the limitations of the <b>site</b>, including:  (i) <u>adequate provision of on-site or off-site infrastructure to serve the <b>papakāinga</b>; and</u>  (ii) <u>adverse <b>effects</b> on adjoining <b>properties</b> and the <b>environment</b> are avoided, remedied or mitigated;</u></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p><u>while recognising that <b>papakāinga</b> may contain <b>activities</b> of a character, scale, intensity or range that are not provided for in the surrounding area.</u></p>
			<p><b><u>PK-P5</u></b></p> <p><b><u>Non-residential aspects of papakāinga</u></b>  <u>Social, cultural, educational, recreation and commercial activities will be provided for as part of a papakāinga, where they:</u></p> <p>(i) <u>are consistent with tangata whenua aspirations for the papakāinga; and</u>  (ii) <u>are of a scale, character and intensity that are consistent with kaupapa, kawa and tikanga Māori.</u></p> <p><b><u>Note:</u></b> refer to the commercial and mixed use chapters for objectives and policies on <b>commercial activities</b> outside of commercial and mixed use zones.</p>
			<p><b><u>PK-P6</u></b></p> <p><b><u>Papakāinga Design Guides and Development Plans</u></b>  <u>The Council will actively partner with tangata whenua to prepare papakāinga design guides that are clearly underpinned by kaupapa Māori. The guidelines should draw on traditional land use and other environmental features distinctive to the takiwā. As an ecosystem it should give expression to the whānau/hapū/iwi traditional papakāinga.</u></p> <p><b><u>Tangata whenua</u></b> will be encouraged to prepare development plans for <b>papakāinga</b> that are consistent with these design guides.</p> <p><b><u>Notes:</u></b></p> <ol style="list-style-type: none"> <li><u>Where these Objectives and Policies are relevant to the consideration of a resource consent application, the Council will seek advice from the relevant iwi authority and will rely on this advice. The matters that Council will seek advice from iwi authorities on include:</u> <ul style="list-style-type: none"> <li><u>where the papakāinga is on general title land, whether the applicant has demonstrated a whakapapa or ancestral connection to the land;</u></li> <li><u>any other matter related to tikanga Māori.</u></li> </ul> </li> <li><u>Subject to the requirements of section 33 of the Resource Management Act 1991, the Council is able to transfer its powers to the relevant iwi authority for the rohe in which the land is located.</u></li> <li><u>Provisions in other chapters of the Plan may also be relevant.</u></li> </ol>

NOISE - Noise			
			<p><b>Policies</b></p> <p><b>NOISE-P2</b> <i>To mitigate the adverse <b>effects</b> of <b>noise</b> within the General Residential <a href="#">and High Density Residential Zones</a> to a level consistent with a predominantly residential <b>environment</b>.</i></p> <p><b>Noise</b> is a particularly important amenity consideration in residential areas as people are living in close proximity to each other. This policy aims to ensure that <b>noise</b> levels experienced are reasonable for a General Residential <a href="#">and High Density Residential Zones</a>. In the <b>Wallaceville Structure Plan Development Area</b>, fencing, <b>noise</b> insulation and/or ventilation standards seek to mitigate the reasonable adverse <b>effects</b> of <b>noise</b> arising from adjoining <b>activities</b>. The standards ensure a reasonable level of acoustic amenity within <b>buildings</b> that have their windows closed. Ventilation standards have been developed to avoid the need to open windows.</p>

PART 3 – AREA SPECIFIC MATTERS			
RESIDENTIAL ZONES			
GRZ – General Residential Zone			
	GRZ – General Residential Zone	Amend Background	<p><b>Background</b></p> <p>The residential areas within the City are characterised by mainly low rise <b>residential units</b> sited on individual <b>allotments</b>. Past architectural styles, settlement patterns and geographical factors have resulted in diverse residential characteristics and form, resulting in a range of individual neighbourhoods. <u>These residential areas make an important contribution towards a well-functioning urban environment; however it is important to recognise that the past character, densities and styles of residential development currently enjoyed by the community will develop and change over time in response to the diverse and changing needs of the community and future generations.</u></p> <p><del>Demand for higher density residential development is increasing in the City and the manner in which the District Plan provides for higher density residential development is important to the character and amenity of existing established neighbourhoods.</del> Higher density residential development is becoming more desirable to certain sectors of the community and it is also desirable in establishing a variety of housing types and styles, thereby providing a greater variety to the housing stock of the City.</p> <p><u>A mix of housing densities are provided for, with medium density housing enabled across the General Residential Zone by the incorporation of the Medium Density Residential Standards. Higher density residential development is best located in close proximity to retail, service and public transport centres specifically near the City Centre Zone (central business district), neighbourhood centres and major transport nodes. Higher density residential development is provided for in these areas in the form of Comprehensive Residential Development and by way of an increased density for residential development. The development of papakāinga is also provided for within the Zone.</u></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p>Within the <u>General-Residential Zone</u> the <del>Residential Conservation and Residential Hill</del> <u>Indigenous Biodiversity Qualifying Matter Precincts</u> reflect the <del>particular environmental and topographical</del> significant <u>indigenous vegetation</u> and habitats that have been <u>identified in the characteristics of those areas</u>. <u>The Precinct encourage the protection and retention of indigenous biodiversity values.</u></p> <p><u>It is anticipated that the character, form and amenity of residential areas within the General Residential Zone will change over time. These changes may be significant and may detract from amenity values appreciated by the community but may improve the amenity values appreciated by other people and future generations, including by providing for increased and varied housing densities and types. To help manage this change, the Medium and High Density Design Guide in Appendix 1 promotes a high standard of urban design are included in the District Plan. It is anticipated this will encourage new development to make a positive contribution toward the evolving character of the General Residential Zone.</u></p> <p>The City's residential areas are also characterised by the presence of non-residential activities and community facilities. These activities tend to provide essential community services, including shops, churches, schools, doctors' surgeries, day care centres and halls. In some areas motels and hotels have been established. Many non-residential activities and community facilities are generally accepted within residential areas provided they do not give rise to significant adverse effects.</p>
	GRZ – General Residential Zone	Delete Issues	<p><b><i>Resource Management Issues</i></b></p> <p><del>GRZ-11 – The loss of environmental quality within residential areas caused by adverse effects of activities.</del></p> <p><del>Amenity values are those inherent qualities or characteristics which contribute to people's appreciation or enjoyment of the local environment. Components of amenity include privacy, sunlight admission, open space, visual streetscape, noise and public health and safety.</del></p> <p><del>Factors which could adversely affect the amenity values of the local residential environment include:</del></p> <ul style="list-style-type: none"> <li><del>(1) – Noise and illumination.</del></li> <li><del>(2) – The presence of non-residential activities and facilities.</del></li> <li><del>(3) – Signs.</del></li> <li><del>(4) – The design, appearance and siting of buildings.</del></li> <li><del>(5) – Toxic, noxious, offensive, dangerous or hazardous elements.</del></li> </ul> <p><del>Residential units and other buildings can block out sunlight, and reduce privacy and amenity in residential areas. Council seeks to minimise these adverse effects while maintaining a choice of residential unit styles and development opportunities.</del></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p><del>Operating non-residential activities in residential areas may also have adverse effects including noise, increased traffic flows and the appearance of utilitarian buildings. Council seeks to maintain a high standard of residential amenity in residential environments.</del></p> <p><del><b>GRZ-12</b> — The effects on amenity values of infill development, redevelopment within and adjoining established residential areas.</del></p> <p><del>The amount of land suitable for urban use is influenced by servicing, topographical, ecological and other constraints. The General Residential Zone covers the existing residential areas as well as undeveloped land suitable for residential use in the future. Expansion of existing urban areas will be encouraged in appropriate environments with the existing urban areas being the preferred location for higher density development. Council will promote the maintenance of the general character and amenity values of particular neighbourhoods.</del></p>
	GRZ – General Residential Zone	Amend Objective	<p><b>GRZ-01</b> <del>The promotion of a high quality residential environment which maintains and enhances acknowledges the physical character of the residential areas, and provides a choice of living styles and types while recognising that character and amenity values develop and change over time and a high level of residential amenity.</del></p> <p><del>The essential components of residential amenity values include adequate daylight and open space, satisfactory design standards, a reasonable degree of privacy and low noise levels.</del></p> <p><del>The primary role of the General Residential Zone is to provide opportunities for residential activity. Residents want a range of living styles to reflect their various needs, while maintaining high levels of amenity and residential character. In the General Residential Zone, the provisions of the Plan seek to ensure that new development will be provided for in a manner that will respect existing forms. Appropriate activities are provided for as permitted and others will be assessed by way of resource consent applications.</del></p> <p><del>Certain non-residential activities are most appropriately located within the General Residential Zone provided that the effects of these activities, such as noise and traffic, are appropriately managed.</del></p>
	GRZ – General Residential Zone	Add mandatory MDRS Objective	<p><b>GRZ-02</b> <u>Well-functioning Urban Environments</u></p> <p><u>A well-functioning urban environment that enables all people and communities to provide for their social, economic, and cultural wellbeing, and for their health and safety, now and into the future.</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the objectives in clause 6 of Schedule 3A.]</u></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
	GRZ – General Residential Zone	Add mandatory MDRS Objective	<p><b>GRZ-O3</b> <u>Housing Variety</u></p> <p><u>A relevant residential zone provides for a variety of housing types and sizes that respond to—</u></p> <p>a. <u>housing needs and demand; and</u></p> <p>b. <u>the neighbourhood’s planned urban built character, including 3-storey buildings.</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the objectives in clause 6 of Schedule 3A.]</u></p>
	GRZ – General Residential Zone	Add mandatory MDRS Policies	<p><b>GRZ-P1A</b> <u>Enable a variety of housing types with a mix of densities within the General Residential Zone, including 3-storey attached and detached dwellings, and low-rise apartments.</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the policies in clause 6 of Schedule 3A.]</u></p>
	GRZ – General Residential Zone	Add mandatory MDRS Policies	<p><b>GRZ-P1B</b> <u>Apply the MDRS across all relevant residential zones in the district plan except in circumstances where a qualifying matter is relevant (including matters of significance such as significant natural areas, historic heritage and the relationship of Māori and their culture and traditions with their ancestral lands, water, sites, wāhi tapu, and other taonga).</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the policies in clause 6 of Schedule 3A.]</u></p>
	GRZ – General Residential Zone	Add mandatory MDRS Policies	<p><b>GRZ-P1C</b> <u>Encourage development to achieve attractive and safe streets and public open spaces, including by providing for passive surveillance.</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the policies in clause 6 of Schedule 3A.]</u></p>
	GRZ – General Residential Zone	Add mandatory MDRS Policies	<p><b>GRZ-P1D</b> <u>Enable housing to be designed to meet the day-to-day needs of residents.</u></p> <p><u>[s80H(1)(a)(ii) note: this provision incorporates the policies in clause 6 of Schedule 3A.]</u></p>
	GRZ – General Residential Zone	Add mandatory MDRS Policies	<p><b>GRZ-P1E</b> <u>Provide for developments not meeting permitted activity status, while encouraging high-quality developments.</u></p>
	GRZ – General Residential Zone	Amend Policy	<p><b>GRZ-P1</b> <u>To provide for a range of building densities within the residential areas that are compatible in form and scale with the neighbourhood’s planned built form and character which takes into account the existing character of the area, topography and the capacity of the infrastructure.</u></p> <p><del>A number of housing density standards are provided for within the General Residential Zone to provide choice, and to take into account existing characteristics, topography and infrastructure. These differences were recognised</del></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p><del>under zoning policies relating to the General Residential Zone and Residential Conservation Precinct in the previous District Plan. In addition the Plan makes specific provision for higher density housing through reduced minimum <b>net site area</b> standards and <b>Comprehensive Residential Developments</b> in identified areas of the City within which this form of development is considered to be most appropriate. These locations are called the <b>Residential Centres Precinct</b>.</del></p> <p><del>Density refers to the amount of built development in a given area, together with the relationship between <b>buildings</b> and open spaces on <b>sites</b>. Density affects the potential number of people living in an area, the area occupied by <b>buildings</b> and the amount of hard surfacing, as well as the available space for gardens. The controls on allowable levels of development provide a degree of certainty to residents on such matters.</del></p> <p><del>Increasing the amount of <b>buildings</b> and hard surfaces on a <b>site</b> also has an impact on infrastructure, in particular on the amount of <b>stormwater</b> runoff. Over time, incremental change can have a significant <b>effect</b> on infrastructure operations. The Plan includes a requirement for new <b>Comprehensive Residential Developments</b> to include a specified amount of on-site <b>stormwater</b> soakage, in order to reduce this impact.</del></p>
	GRZ – General Residential Zone	Amend Policy	<p><b>GRZ-P2</b> <i>To ensure that the scale, appearance and siting of <b>buildings, structures</b> and <b>activities</b> are compatible with the <u>in form and scale with the neighbourhood’s planned built form and</u> character <del>and desired amenity values of the area.</del></i></p> <p><del><b>Buildings, structures</b> and <b>activities</b> need to be of a scale or type that reflects the character of the neighbourhood. The overall aim of this policy is to promote residential character, and to ensure the compatibility of <b>activities</b> with the surrounding <b>environment</b>. Assessment of new developments may include the degree of integration a proposal achieves with not only the adjoining <b>sites</b>, but with the streetscape and, in some cases, the wider townscape.</del></p> <p><del>The Plan includes visual amenity standards, including controls over the location of residential <b>buildings</b>, and the screening of non-residential <b>buildings</b>. The relocation of residential <b>buildings</b> requires resource consent as it can cause adverse visual <b>effects</b>.</del></p>
	GRZ – General Residential Zone	Amend Policy	<p><b>GRZ-P4</b> <i>To ensure that the location and design of <b>buildings</b> and <b>earthworks</b> do not significantly detract from the residential amenity of the area.</i></p> <p>There are a number of matters that influence residential amenity. These include:</p> <ol style="list-style-type: none"> <li>(1) The density and topography of <b>sites</b>.</li> <li>(2) The closeness of residential units to <b>boundaries</b> and other <b>buildings</b>.</li> <li>(3) The <b>height</b> and orientation of <b>buildings</b>.</li> </ol>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p>(4) The <b>height</b> or existence of fences, trees or other vegetation.</p> <p>(5) The size, location and appearance of <b>earthworks</b>, retaining walls and fill batters.</p> <p><del>Private open space is an important factor in the use and enjoyment of a residential site. Open space provides an area for outdoor leisure activities. This policy seeks to provide a reasonably open and private outlook protecting residential sites from being 'closed in' by neighbouring buildings.</del></p> <p><del>Access to sunlight and daylight also contribute to the use and enjoyment of a residential site. To avoid excessive shading effects and allow the admission of daylight to a site, the Plan provides daylight controls on all side and rear boundaries. Similarly, to control the size and height of earthworks and associated retaining, the Plan provides for earthworks plane controls along all boundaries in order to avoid or mitigate adverse effects.</del></p>
	GRZ – General Residential Zone	Amend Policy	<p><b>GRZ-P5</b> <i>To <del>ensure that</del> <u>encourage sites</u> fronting streets <u>to</u> present a pleasant and coherent residential appearance.</i></p> <p><del>The setback of buildings from the front boundary assists with privacy and provides for landscaping. The front setback provides an open style streetscape which is part of the established residential character of Upper Hutt.</del></p>
	GRZ – General Residential Zone	Amend Policy	<p><b>GRZ-P9</b> <i>To promote residential development with a high level of amenity and ensure that it has adequate access to infrastructural requirements, <u>while recognising that amenity values develop and change over time.</u></i></p> <p><del>The Plan provides for the intensification of land use within the urban area to accommodate residential development where adverse effects can be avoided, remedied or mitigated.</del></p>
	GRZ – General Residential Zone	Amend Policy	<p><b>GRZ-P10</b> <i>To identify and maintain <b>amenity values</b> that the community wishes to protect <u>while recognising that character and amenity values resulting from the built environment develop and change over time.</u></i></p> <p><del><b>Amenity values</b> are those features or aspects about an area which enhance it or make it pleasant to be in. They can include access to sunlight, landscaping and visual qualities. They may also include important public features, such as parks and reserves. <b>Activities</b> which can adversely affect the amenities of an area must be managed, while also recognising the rights of individuals to use their own <b>properties</b> and the need for utilities to operate effectively and safely.</del></p> <p><del>A particular concern of the Upper Hutt community relates to the <b>effects</b> of the establishment and use of what are commonly referred to as gang fortifications. These are sometimes accompanied by an increase in antisocial behaviour.</del></p> <p><del>It is Council's view that the adverse effects of these fortifications on the <b>environment</b>, in particular in respect of the social, economic, aesthetic and cultural conditions of the Upper Hutt people and community, and the <b>amenity values</b></del></p>

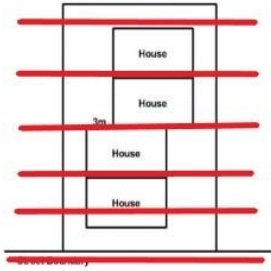

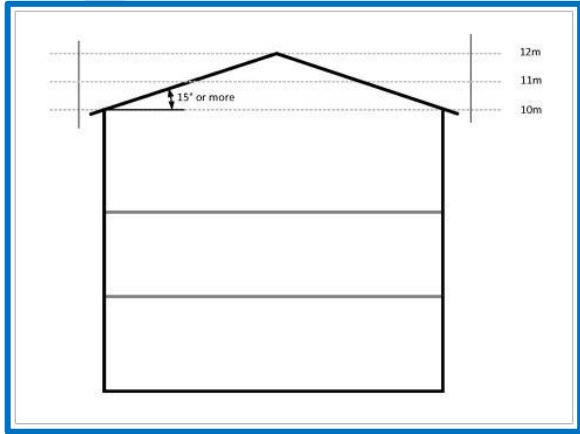

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
	GRZ – General Residential Zone – Precinct 1	Delete Matters for Consideration	<p><b>Matters for Consideration</b></p> <p><del>Matters that may be relevant in the consideration of any resource consent, other than for a restricted discretionary activity, may include the following:</del></p>
			<p><b>GRZ-PREC1-MC1</b></p> <p><b>Comprehensive Residential Development</b></p> <p><del>(1) The extent to which the proposal meets the guidance for <b>Comprehensive Residential Developments</b> included in the Design Guide for the <b>Residential Centres Precinct</b>.</del></p> <p><del>(2) Matters listed under ‘Site layout, area and <b>building coverage</b>’ in this rule.</del></p> <p><del>(3) Matters listed under ‘Bulk and location of <b>buildings</b>’ in this rule.</del></p> <p><del>(4) Matters listed under ‘Sunlight access’ in this rule.</del></p> <p><del>(5) Matters listed under ‘Traffic generation and access’ in this rule.</del></p>
			<p><b>GRZ-PREC1-MC2</b></p> <p><del>Development of two or more <b>residential units</b> with a <b>net site area</b> less than 400m<sup>2</sup> in the <b>Residential Centres Precinct</b> that is not otherwise a <b>Comprehensive Residential Development</b></del></p> <p><del>(1) The extent to which the proposal meets the guidance on small <b>site</b> design and development contained in the Design Guide for the <b>Residential Centres Precinct</b>.</del></p>
	GRZ – General Residential Zone – Precinct 2	Delete Precinct 2	<p><b>Precinct 2 – Residential and Hill Residential Conservation Precinct</b></p> <p><del>The following objectives, policies, and rules apply within the Residential Hill Residential Conservation Precinct (as identified on the planning maps) in addition to the provisions of the underlying General Residential Zone. Where there is any conflict between the provisions the Precinct provisions shall prevail. Precinct-specific subdivision provisions are located in the Subdivision Chapter (SUB).</del></p> <p><b>Objective</b></p> <p><del><b>GRZ-PREC2-O1</b> The maintenance and enhancement of the special landscape and natural values of the Conservation and Hill Areas.</del></p> <p><del>Within the General Residential Zone of the City are <b>environments</b> with special character. The Residential Conservation Precinct includes the areas adjoining Trentham Memorial Park, Palfrey Street, Chatsworth Road and parts of Pinehaven. These areas have a mature landscape and townscape, contain native flora and fauna, natural watercourses, as well as larger sections. They also include residential development on the hills</del></p>

IPI - PROPOSED AMENDMENTS									
#	Chapter	Change	Track Change						
			<p>surrounding the urban area. These areas require a lower density of development in order to maintain their important landscape and ecological values.</p> <p>In contrast, the Residential Hill Precinct is characterised by more recent development which recognises the topographical constraints by having a lower density of development. This Precinct also contains areas undergoing development as well as some earmarked for future development.</p> <p>Within the Conservation and Hill Areas there are a number of standards and controls which maintain and enhance the special values of those parts of the General Residential Zone. These controls are in addition to the provisions relating to the General Residential Zone.</p> <p><b>Policies</b></p> <p><b>GRZ-PREC2-P1</b> <i>To promote a relatively low intensity of development within the Conservation and Hill Areas.</i></p> <p>These areas have a lower level of building density with a corresponding sense of spaciousness compared with other residential areas. They have developed a certain character as a result of past patterns of development. Higher density forms of development such as <b>Comprehensive Residential Development</b> may erode the character and amenity of these areas, and higher density housing is therefore not encouraged. This policy seeks to recognise and protect the existing and potential future levels of amenity.</p> <p><b>GRZ-PREC2-P2</b> <i>To protect trees and vegetation which contribute to the <b>amenity values</b>, landscape values, character, ecological, historical and cultural values of the Conservation and Hill Areas.</i></p> <p>Trees add to the character of residential areas and also have ecological, historical, and cultural values.</p> <p>The Conservation and Hill Areas have special qualities which merit the protection of trees. They also merit different requirements for development to assist in protecting their <b>amenity values</b> and land stability.</p> <p><b>Rules</b></p> <table border="1"> <thead> <tr> <th colspan="2">Standards for Permitted and Controlled Activities</th> </tr> </thead> <tbody> <tr> <td><b>GRZ-PREC2-S1</b></td> <td><b>Building coverage</b></td> </tr> <tr> <td><i>Policies GRZ-P1, GRZ-P2, DEV1-P5</i></td> <td>The maximum coverage by <b>buildings</b> on the net area of a <b>site</b> shall not exceed 30% in the Residential Conservation and Residential Hill Precincts;</td> </tr> </tbody> </table>	Standards for Permitted and Controlled Activities		<b>GRZ-PREC2-S1</b>	<b>Building coverage</b>	<i>Policies GRZ-P1, GRZ-P2, DEV1-P5</i>	The maximum coverage by <b>buildings</b> on the net area of a <b>site</b> shall not exceed 30% in the Residential Conservation and Residential Hill Precincts;

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p>The variety of <del>activities</del> which exist in the commercial areas contributes to the vitality and convenience of the City. A number of distinct commercial areas are found in the City. Suburban centres provide for a more limited range of shopping and business needs. Local shops and dairies provide day to day convenience shopping.</p> <p><del>COMZ-14</del> <i>The continued maintenance of an appropriate level of environmental quality within commercial areas.</i></p> <p><del>Commercial activities</del> can generate traffic, smoke, <del>noise</del>, vibration, glare or other nuisances that can adversely affect other nearby <del>activities</del>. They also can have potential adverse <del>effects</del> on the natural <del>environment</del>, such as <del>waterbodies</del> and indigenous bush areas.</p> <p>Some commercial areas within the City are characterised by pedestrian orientated <del>activities</del> and amenities. It is therefore important to recognise the particular elements which affect the <del>amenity values</del> of an area.</p> <p><b>Objectives</b></p> <p><del>COMZ-01</del> <i>The sustainable management of physical resources within the existing commercial areas of the City to protect and enhance their <del>amenity values</del>.</i></p> <p>This objective recognises the importance of particular elements and characteristics that define the commercial areas. <del>Commercial activities</del> and development can have both positive and adverse environmental <del>effects</del> on the areas that surround them. Any consideration of <del>effects</del> must take account of the need to provide sufficient areas for commercial development needs, and the maintenance of <del>amenity values</del> and character.</p> <p>The commercial areas within the City are divided into two specific zones to reflect the Plan's policies:</p> <p>(a) <del>The Commercial Zone focuses on retail and service functions which support the local community. Commercial activities are provided for at Silverstream and other suburban areas. These areas provide for a limited range of shopping and business needs. The smaller neighbourhood shops, including dairies, provide for day to day convenience shopping.</del></p> <p>(b) <del>The City Centre Zone (CBD) accommodates a variety of activities in a compact, convenient layout which is characterised by pedestrian orientated traffic.</del></p> <p><del>COMZ-02</del> <i>The avoidance, remedying, or mitigation of the adverse <del>effects</del> of <del>commercial activities</del> on the amenity of surrounding neighbourhoods.</i></p> <p>The effects generated by the wide range of <del>activities</del> provided for in the Commercial Zone, such as smoke, <del>noise</del>, vibration, glare or other nuisances, can have adverse <del>effects</del> on areas beyond the Commercial Zone boundaries.</p> <p><b>Policies</b></p>

**IPI - PROPOSED AMENDMENTS**

#	Chapter	Change	Track Change				
			<p><del>COMZ P1</del> <i>To ensure that <b>activities</b> in the Commercial Zone do not unduly detract from the character and amenity of neighbouring areas.</i></p> <p><del>This policy recognises the potential for business <b>activities</b> to impact adversely on adjoining areas and consequently aims to preserve the <b>amenity values</b> of areas adjacent to the Commercial Zone.</del></p> <p><del>COMZ P2</del> <i>To control the size and scale of <b>buildings</b> and the visual appearance of <b>sites</b> within the Commercial Zone.</i></p> <p><del>This policy aims to preserve <b>amenity values</b> within the Commercial Zone. <b>Buildings</b> and <b>sites</b> need to be attractive and be of a size or type that is compatible with the neighbourhood.</del></p> <p><del>COMZ P3</del> <i>To identify and maintain <b>amenity values</b> that the community wishes to protect.</i></p> <p><del><b>Amenity values</b> are those features or aspects about an area which enhance it or make it pleasant to be in. They can include access to sunlight, landscaping and visual qualities. They may also include important public features, such as parks and reserves. <b>Activities</b> which can adversely affect the amenities of an area must be managed, while also recognising the rights of individuals to use their own <b>properties</b> and the need for utilities to operate effectively and safely.</del></p> <p><del>A particular concern of the Upper Hutt community relates to the <b>effects</b> of the establishment and use of what are commonly referred to as gang fortifications. These are sometimes accompanied by an increase in antisocial behaviour.</del></p> <p><del>It is Council's view that the adverse effects of these fortifications on the <b>environment</b>, in particular in respect of the social, economic, aesthetic and cultural conditions of the Upper Hutt people and community, and the <b>amenity values</b> of the Upper Hutt <b>environment</b>, are such that these <b>activities</b> should not be permitted. The <b>activity</b> is therefore prohibited anywhere in Upper Hutt City.</del></p> <p><b>Rules</b></p> <p><del><b>District-wide matters</b></del></p> <p><del>Each <b>activity</b> in the Commercial Zone shall comply with the relevant permitted activity standards in the District-wide matters of the Plan as listed below.</del></p> <table border="1" data-bbox="665 1214 1328 1415"> <tr> <td><del><b>District-wide matters</b></del></td> </tr> <tr> <td><del>TEMP—Temporary Activities</del></td> </tr> <tr> <td><del>SIGN—Signs</del></td> </tr> <tr> <td><del>EW—Earthworks</del></td> </tr> </table>	<del><b>District-wide matters</b></del>	<del>TEMP—Temporary Activities</del>	<del>SIGN—Signs</del>	<del>EW—Earthworks</del>

			<p><b>COMZ Figure1</b>  <del>Riverstone Terrace Site</del></p>  <p>The image is an aerial photograph of a site, likely the Riverstone Terrace Site mentioned in the text. The site is overlaid with a red semi-transparent layer, possibly representing a proposed zone or boundary. There are three horizontal red lines drawn across the image. A legend in the bottom right corner of the image indicates a 'Business Commercial Zone' with a red square symbol. A large, faint watermark 'UHC' is visible in the background of the image.</p>

**NCZ – Neighbourhood Centre Zone**

	<p>New NCZ - Neighbourhood Centre Zone</p>	<p>Introduce new Chapter Heading and Introduction</p>	<p><b><u>NCZ - Neighbourhood Centre Zone</u></b>  <u>The Neighbourhood Centre Zone provides for a range of small scale commercial activities that service the day-to-day needs of the immediate residential neighbourhood. Neighbourhood Centres accommodate a range of commercial, retail and community services and provide a limited range of services, employment and living opportunities.</u></p>
--	--	---	---

IPI - PROPOSED AMENDMENTS					
#	Chapter	Change	Track Change		
			<p><a href="#">Neighbourhood Centres are of a scale that aligns well with the medium density of the surrounding residential neighbourhoods. Most Neighbourhood Centres comprise of two to three small scale shops but can be as small as a single dairy. Buildings in the Neighbourhood Centre Zone usually are of a similar scale to the surrounding residential neighbourhood. Typically buildings are built up to the road frontage, with commercial windows along the frontage and carparking available on the street. Residential units are located either above the ground floor or towards the rear of the site.</a></p> <p><a href="#">Due to their location within residential neighbourhoods, non-residential activities and development have the potential to generate adverse effects where they are directly adjoining Residential and Open Space and Recreation areas. To manage these potential effects buildings need to be set back and outdoor storage and parking areas need to be screened.</a></p>		
	New NCZ - Neighbourhood Centre Zone	Introduce new Objective NCZ-O1	<p><a href="#">Objectives</a></p> <table border="1"> <tr> <td><a href="#">NCZ-O1</a></td> <td><a href="#">Purpose of the Neighbourhood Centre Zone</a></td> </tr> </table> <p><a href="#">Neighbourhood Centres are small-scale commercial sites and centres that service the day-to-day needs of surrounding residential neighbourhoods. They accommodate a range of small-scale commercial and community activities as well as residential activities.</a></p>	<a href="#">NCZ-O1</a>	<a href="#">Purpose of the Neighbourhood Centre Zone</a>
<a href="#">NCZ-O1</a>	<a href="#">Purpose of the Neighbourhood Centre Zone</a>				
	New NCZ - Neighbourhood Centre Zone	Introduce new Objective NCZ-O2	<table border="1"> <tr> <td><a href="#">NCZ-O2</a></td> <td><a href="#">Character and Amenity Values of the Neighbourhood Centre Zone</a></td> </tr> </table> <p><a href="#">Built development in the Neighbourhood Centre Zone is of medium density and reflects the anticipated built character of the surrounding residential neighbourhood. It is well-designed and contributes positively to the residential environment.</a></p>	<a href="#">NCZ-O2</a>	<a href="#">Character and Amenity Values of the Neighbourhood Centre Zone</a>
<a href="#">NCZ-O2</a>	<a href="#">Character and Amenity Values of the Neighbourhood Centre Zone</a>

	New NCZ - Neighbourhood Centre Zone	Introduce new Rules Advice Note	<table border="1"> <tr> <td><a href="#">Rules</a></td> </tr> </table>	<a href="#">Rules</a>	
<a href="#">Rules</a>					

Note: There may be a number of provisions that apply to an **activity, building, structure** or **site**. Resource consent may therefore be required under rules in this chapter as well as other chapters. Unless specifically stated in a rule, resource consent is required under each relevant rule. The steps to determine the status of an **activity** are set out in Chapter 2 How the Plan Works.

Rules relating to **subdivision** are found in the SUB-GEN (General **Subdivision** Provisions that Apply in All Zones) and the SUB-CMU (**Subdivision** in Commercial and Mixed Use Zones) chapters.

Each **activity** in the Neighbourhood Centre Zone shall comply with the relevant permitted activity standards in the district-wide matters of the Plan as listed below.

<u><b>District-wide matters</b></u>
<u>NU – Network Utilities</u>
<u>REG - Renewable Energy Generation</u>
<u>TP – Transport and Parking</u>
<u>CL – Contaminated Land</u>
<u>HS - Hazardous Substances</u>
<u>NH - Natural Hazards</u>
<u>WM – Waste Management</u>
<u>HH - Historical Heritage</u>
<u>TREE - Notable Trees</u>
<u>UTG - Urban Tree Groups</u>
<u>ECO - Ecosystems and Indigenous Biodiversity</u>
<u>NATC – Natural Character</u>
<u>NFL - Natural Features and Landscapes</u>
<u>PA – Public Access</u>
<u>SUB - Subdivision</u>
<u>DC – Development Contributions</u>
<u>AIR - Air</u>
<u>ASW - Activities on the Surface of Water</u>

**IPI - PROPOSED AMENDMENTS**

#	Chapter	Change	Track Change
			<p>1. <u>Buildings</u> must not project beyond a 60° recession plane measured from a point 4 metres vertically above <b>ground level</b> along all <b>boundaries</b>, as shown on the following diagram. Where the <b>boundary</b> forms part of a legal right of way, <b>entrance strip</b>, access <b>site</b>, or pedestrian access way, the <b>height in relation to boundary</b> applies from the farthest <b>boundary</b> of that legal right of way, <b>entrance strip</b>, access <b>site</b>, or pedestrian access way.</p>  <p>The diagram illustrates a site boundary on the left. A vertical dashed line represents the site boundary. A horizontal line extends from the base of this boundary to the right, representing the ground level. A point is marked 4m vertically above the ground level on the site boundary. A dashed line representing a 60-degree recession plane starts from this point and extends upwards and to the right. The angle between the horizontal ground level line and the recession plane is labeled as 60.0°. A vertical dimension line on the right indicates a height of 1m, representing the maximum allowed projection of a building above the recession plane.</p> <p><u>This standard does not apply to:</u></p> <ol style="list-style-type: none"> <li><u>A boundary with a road.</u></li> <li><u>Existing or proposed internal boundaries within a site.</u></li> <li><u>Site boundaries</u> where there is an existing common wall between 2 <b>buildings</b> on adjacent <b>sites</b> or where a common wall is proposed.</li> <li><u>Solar water heating components</u> provided these do not exceed the <b>height in relation to boundary</b> by more than 1m.</li> <li><u>Chimney structures</u> not exceeding 1.1m in width on any elevation and provided these do not exceed the <b>height in relation to boundary</b> by more than 1m.</li> </ol>

IPI - PROPOSED AMENDMENTS													
#	Chapter	Change	Track Change										
			<p>f. <u>Antennas, aerials, satellite dishes (less than 1m in diameter), flues, and architectural features (e.g. finials, spires) provided these do not exceed the height in relation to boundary by more than 3m measured vertically.</u></p>										
	New NCZ - Neighbourhood Centre Zone	Introduce new Standard NCZ-S3	<table border="1"> <thead> <tr> <th><u>NCZ-S3</u></th> <th><u>Setback</u></th> </tr> </thead> <tbody> <tr> <td> <p><u>Where the side or rear boundary of a site adjoins a Residential Zone or Open Space and Recreation Zone the following Setback standard applies:</u></p> <p>1. <u>Buildings must be set back from the relevant boundary by the minimum depth listed in the yards table below:</u></p> <table border="1"> <thead> <tr> <th><u>Yard</u></th> <th><u>Minimum depth</u></th> </tr> </thead> <tbody> <tr> <td><u>Side</u></td> <td><u>1 metre</u></td> </tr> <tr> <td><u>Rear</u></td> <td><u>1 metre</u></td> </tr> </tbody> </table> <p>2. <u>This standard does not apply to site boundaries where there is an existing common wall between 2 buildings on adjacent sites or where a common wall is proposed.</u></p> <p>3. <u>This standard does not apply to:</u></p> <p>a. <u>Accessory buildings less than 2m in height.</u></p> <p>b. <u>Fences and standalone walls.</u></p> </td> <td> <p><u>Matters of discretion are restricted to:</u></p> <ol style="list-style-type: none"> <li><u>The visual amenity of adjoining Residential and Open Space and Recreation sites.</u></li> <li><u>The location, design and appearance of the building or structure.</u></li> <li><u>Whether any architectural features or steps are proposed in the building façade to provide an attractive appearance when viewed from adjoining Residential or Open Space and Recreation sites.</u></li> <li><u>Any benefits, including the extent to which the reduced setback will result in a more efficient, practical and better use of the balance of the site.</u></li> </ol> </td> </tr> </tbody> </table>	<u>NCZ-S3</u>	<u>Setback</u>	<p><u>Where the side or rear boundary of a site adjoins a Residential Zone or Open Space and Recreation Zone the following Setback standard applies:</u></p> <p>1. <u>Buildings must be set back from the relevant boundary by the minimum depth listed in the yards table below:</u></p> <table border="1"> <thead> <tr> <th><u>Yard</u></th> <th><u>Minimum depth</u></th> </tr> </thead> <tbody> <tr> <td><u>Side</u></td> <td><u>1 metre</u></td> </tr> <tr> <td><u>Rear</u></td> <td><u>1 metre</u></td> </tr> </tbody> </table> <p>2. <u>This standard does not apply to site boundaries where there is an existing common wall between 2 buildings on adjacent sites or where a common wall is proposed.</u></p> <p>3. <u>This standard does not apply to:</u></p> <p>a. <u>Accessory buildings less than 2m in height.</u></p> <p>b. <u>Fences and standalone walls.</u></p>	<u>Yard</u>	<u>Minimum depth</u>	<u>Side</u>	<u>1 metre</u>	<u>Rear</u>	<u>1 metre</u>	<p><u>Matters of discretion are restricted to:</u></p> <ol style="list-style-type: none"> <li><u>The visual amenity of adjoining Residential and Open Space and Recreation sites.</u></li> <li><u>The location, design and appearance of the building or structure.</u></li> <li><u>Whether any architectural features or steps are proposed in the building façade to provide an attractive appearance when viewed from adjoining Residential or Open Space and Recreation sites.</u></li> <li><u>Any benefits, including the extent to which the reduced setback will result in a more efficient, practical and better use of the balance of the site.</u></li> </ol>

<a href="#">NCZ-Figure1</a>	

**IPI - PROPOSED AMENDMENTS**

#	Chapter	Change	Track Change
			

**LCZ – Local Centre Zone**

	<p>New LCZ - Local Centre Zone</p>	<p>Introduce new Chapter Heading and Introduction</p>	<p><a href="#"><u>LCZ - Local Centre Zone</u></a></p> <p><a href="#"><u>The Local Centre Zone provides for medium-scale commercial centres that are conveniently located to service the needs of the surrounding commercial catchment. Local Centres accommodate a range of retail, commercial and community activities while also offering services, employment and residential opportunities. The size of the centres depends largely on their location and the size of the surrounding catchment. Most Local Centres have potential for growth and intensification, which allows them to provide for the expected growth of surrounding residential areas, while not undermining the primary function and vitality of the City Centre Zone.</u></a></p> <p><a href="#"><u>The Local Centre Zone allows for residential activities if they are located above ground floor along identified street frontages. Large format retail, car oriented activities, larger commercial activities and office activities and light industrial activities are not anticipated in this zone but are encouraged to establish in more appropriate locations such as the Mixed Use Zone, the City Centre Zone or the General Industrial Zone.</u></a></p>
--	------------------------------------	---	---

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p>The built form and density of Local Centres is anticipated to align with the expected high density of surrounding residential areas. Most Local Centres are located along main transport routes and <b>buildings</b> front the street edge with <b>verandahs</b> and display <b>windows</b>. While the scale and density of <b>buildings</b> vary between centres they are expected to change and intensify over time. Parking is usually available on the street or in dedicated and ideally shared on-site parking areas.</p> <p>Non-residential activities and development have the potential to generate adverse effects where they are directly adjoining Residential and Open Space and Recreation areas. To manage these potential effects buildings have to be set back and outdoor storage and parking areas need to be screened.</p>
	New LCZ - Local Centre Zone	Introduce new Objective LCZ-O1	<p><b>Objectives</b></p> <p><b>LCZ-O1</b>      <b>Purpose of the Local Centre Zone</b></p> <p>Local Centres are medium scale commercial centres that service the needs of the surrounding residential catchment and accommodate a range of medium scale commercial and community activities as well as residential activities.</p>
	New LCZ - Local Centre Zone	Introduce new Objective LCZ-O2	<p><b>LCZ-O2</b>      <b>Character and Amenity Values of the Local Centre Zone</b></p> <p>Local Centres are safe and attractive urban environments. The built environment is of a scale that reflects the planned built form of the medium to high density surrounding residential environment and contributes positively to the surrounding streetscape and commercial and residential environment.</p>
	New LCZ - Local Centre Zone	Introduce new Objective LCZ-O3	<p><b>LCZ-O3</b>      <b>Managing Effects at the Zone Interface</b></p> <p>Use and development within the Local Centre Zone are of an appropriate scale and reflect the purpose, anticipated character and planned built form of the zone and the surrounding residential environment while managing potential adverse effects on the amenity values of adjoining sites in Residential and Open Space and Recreation Zones.</p>
	New LCZ - Local Centre Zone	Introduce new Policy LCZ-P1	<p><b>Policies</b></p> <p><b>LCZ-P1</b>      <b>Appropriate activities</b></p> <p>Enable appropriate activities that:</p> <ol style="list-style-type: none"> <li>1. Are compatible with the anticipated purpose, character and amenity values of the Local Centre Zone;</li> <li>2. Service the needs of the surrounding residential catchment; and</li> <li>3. Minimise adverse effects on the amenity of adjoining residential, recreational and open space sites.</li> </ol>

IPI - PROPOSED AMENDMENTS

			<p>a. <u>is at least 8 square metres and has a minimum dimension of 1.8 metres; and</u></p> <p>b. <u>is accessible from the residential unit; and</u></p> <p>c. <u>may be—</u></p> <p>i. <u>grouped cumulatively by area in 1 communally accessible location, in which case it may be located at ground level; or</u></p> <p>ii. <u>located directly adjacent to the unit.</u></p> <p>3. <u>For multi-unit housing, the outdoor living space can be provided as private space and shared space where:</u></p> <p>a. <u>Each residential unit is provided with a private outdoor living space that has a minimum area of 8m<sup>2</sup> with a minimum dimension of 1.8m, that is directly accessible from the residential unit to which it relates;</u></p> <p>b. <u>The shared outdoor living space has a minimum area of 20m<sup>2</sup> with a minimum dimension of 3m; and</u></p> <p>c. <u>Any ground floor outdoor living space is free of buildings, parking spaces and manoeuvring areas.</u></p>				
	New LCZ - Local Centre Zone	Introduce new Standard LCZ-S8	<table border="1"> <thead> <tr> <th><u>LCZ-S8</u></th> <th><u>Screening and Landscaping of Service Areas, Outdoor Storage Areas and Parking Areas</u></th> </tr> </thead> <tbody> <tr> <td> <p>1. <u>Any on-site service areas, including rubbish collection areas, and areas for the outdoor storage of goods or materials must, without preventing the provision of an entry point to the site, be adequately screened by a fence or landscaping where they are visible from any:</u></p> <p>a. <u>Public road;</u></p> <p>b. <u>Other public space; and</u></p> </td> <td> <p><u>Matters of discretion are restricted to:</u></p> <p>1. <u>Any adverse effects on the streetscape.</u></p> <p>2. <u>The visual amenity of adjoining Residential and Open Space and Recreation zoned sites including shading.</u></p> <p>3. <u>The service, storage and parking needs of the activity.</u></p> <p>4. <u>The size and location of service, storage and any parking areas.</u></p> </td> </tr> </tbody> </table>	<u>LCZ-S8</u>	<u>Screening and Landscaping of Service Areas, Outdoor Storage Areas and Parking Areas</u>	<p>1. <u>Any on-site service areas, including rubbish collection areas, and areas for the outdoor storage of goods or materials must, without preventing the provision of an entry point to the site, be adequately screened by a fence or landscaping where they are visible from any:</u></p> <p>a. <u>Public road;</u></p> <p>b. <u>Other public space; and</u></p>	<p><u>Matters of discretion are restricted to:</u></p> <p>1. <u>Any adverse effects on the streetscape.</u></p> <p>2. <u>The visual amenity of adjoining Residential and Open Space and Recreation zoned sites including shading.</u></p> <p>3. <u>The service, storage and parking needs of the activity.</u></p> <p>4. <u>The size and location of service, storage and any parking areas.</u></p>
<u>LCZ-S8</u>	<u>Screening and Landscaping of Service Areas, Outdoor Storage Areas and Parking Areas</u>						
<p>1. <u>Any on-site service areas, including rubbish collection areas, and areas for the outdoor storage of goods or materials must, without preventing the provision of an entry point to the site, be adequately screened by a fence or landscaping where they are visible from any:</u></p> <p>a. <u>Public road;</u></p> <p>b. <u>Other public space; and</u></p>	<p><u>Matters of discretion are restricted to:</u></p> <p>1. <u>Any adverse effects on the streetscape.</u></p> <p>2. <u>The visual amenity of adjoining Residential and Open Space and Recreation zoned sites including shading.</u></p> <p>3. <u>The service, storage and parking needs of the activity.</u></p> <p>4. <u>The size and location of service, storage and any parking areas.</u></p>						

IPI - PROPOSED AMENDMENTS					
#	Chapter	Change	Track Change		
			<p>c. <u>Directly adjoining site zoned Residential or Open Space and Recreation.</u></p> <p>2. <u>Any on-site parking area must:</u></p> <p>a. <u>Be adequately screened by a fence or landscaping from any directly adjoining site zoned Residential or Open Space and Recreation.</u></p> <p>b. <u>Where located along a street edge, provide a landscaping strip that extends at least 1.5m from the boundary with the road and comprise a mix of trees, shrubs and ground cover plants, without preventing the provision of an entry point to the site.</u></p> <p><u>Except that:</u></p> <ul style="list-style-type: none"> <li>• <u>The landscaping requirement for on-site parking areas along a street edge does not apply to individual parking spaces for residential development, if provided.</u></li> </ul>		
	New LCZ - Local Centre Zone	Introduce new Standard LCZ-S9	<table border="1"> <tr> <td><u>LCZ-S9</u></td> <td><u>Water Supply, Stormwater and Wastewater</u></td> </tr> </table> <p>1. <u>All activities shall comply with the water supply, stormwater and wastewater standards in the Code of Practice for Civil Engineering Works.</u></p> <p><u>Matters of discretion are restricted to:</u></p> <ol style="list-style-type: none"> <li>1. <u>Whether the Water Supply, Stormwater and Wastewater infrastructure has sufficient capacity to accommodate the activity.</u></li> <li>2. <u>Any alternative measures proposed to mitigate adverse effects on the Water Supply, Stormwater and Wastewater infrastructure network.</u></li> <li>3. <u>Whether the additional demand generated will necessitate additional unplanned public investment in, or expansion of, the Water Supply, Stormwater and Wastewater infrastructure network or compromise its</u></li> </ol>	<u>LCZ-S9</u>	<u>Water Supply, Stormwater and Wastewater</u>
<u>LCZ-S9</u>	<u>Water Supply, Stormwater and Wastewater</u>				

IPI - PROPOSED AMENDMENTS									
#	Chapter	Change	Track Change						
			<p>ability to service other <b>activities</b> permitted within the zone.</p> <p>4. Whether the development can achieve <b>hydraulic neutrality</b>.</p> <p>5. The extent to which the development incorporates <b>stormwater</b> management techniques or controls to mitigate any increase in pre-development peak <b>stormwater</b> runoff.</p>						
MUZ – Mixed Use Zone									
	New MUZ - Mixed Use Zone	Introduce new Chapter Heading and Introduction	<p><b>Mixed Use Zone</b></p> <p>The Mixed Use Zone provides for a wide range of <b>activities</b> ranging from residential over <b>commercial</b> to light industrial. It enables retail, <b>large format retail</b>, <b>commercial</b>, recreational and <b>entertainment activities</b>, while also providing for <b>drive-through activities</b> and <b>light industrial activities</b>.</p> <p>While anticipated and provided for in the Mixed Use Zone, <b>light industrial activities</b> are proposed to be assessed on a case by case basis through a resource consent process. This allows for an assessment of their suitability for the zone and provides the opportunity to manage potential adverse <b>effects</b> on existing or anticipated <b>activities</b> in the Mixed Use Zone.</p> <p>The mixture of residential and non-residential <b>activities</b> in the zone and the medium scale built form establish a safe, vibrant and attractive <b>environment</b> for workers, residents and customers.</p> <p>It needs to be noted that, due to the wide range of non-residential <b>activities</b> provided for and the potential for <b>light industrial activities</b> to establish, this zone may have fewer day-to-day conveniences and different amenity levels for residents than other Commercial or Residential Zones.</p>						
	New MUZ - Mixed Use Zone	Introduce new Objective MUZ-01	<table border="1"> <thead> <tr> <th colspan="2"><b>Objectives</b></th> </tr> </thead> <tbody> <tr> <td><b>MUZ-01</b></td> <td><b>Purpose of the Mixed Use Zone</b></td> </tr> <tr> <td colspan="2">The Mixed Use Zone accommodates a wide range of <b>activities</b>, including <b>commercial</b>, recreational, entertainment, <b>large format retail</b> and car focused <b>activities</b> as well as compatible <b>light industrial activities</b> and <b>residential activities</b>. The non-residential <b>activities</b> service the needs of business and surrounding residential catchments.</td> </tr> </tbody> </table>	<b>Objectives</b>		<b>MUZ-01</b>	<b>Purpose of the Mixed Use Zone</b>	The Mixed Use Zone accommodates a wide range of <b>activities</b> , including <b>commercial</b> , recreational, entertainment, <b>large format retail</b> and car focused <b>activities</b> as well as compatible <b>light industrial activities</b> and <b>residential activities</b> . The non-residential <b>activities</b> service the needs of business and surrounding residential catchments.	
<b>Objectives</b>									
<b>MUZ-01</b>	<b>Purpose of the Mixed Use Zone</b>								
The Mixed Use Zone accommodates a wide range of <b>activities</b> , including <b>commercial</b> , recreational, entertainment, <b>large format retail</b> and car focused <b>activities</b> as well as compatible <b>light industrial activities</b> and <b>residential activities</b> . The non-residential <b>activities</b> service the needs of business and surrounding residential catchments.									

IPI - PROPOSED AMENDMENTS											
#	Chapter	Change	Track Change								
	New MUZ - Mixed Use Zone	Introduce new Objective MUZ-02	<table border="1"> <tr> <td><a href="#">MUZ-02</a></td> <td><a href="#">Character and Amenity Values of the Mixed Use Zone</a></td> </tr> <tr> <td colspan="2"><a href="#">Mixed Use Zones are vibrant, attractive and safe urban environments. <p>1. <u>All activities shall comply with the water supply, stormwater and wastewater standards in the Code of Practice for Civil Engineering Works.</u></p>	<p>Matters of discretion are restricted to:</p> <ol style="list-style-type: none"> <li>1. <u>Whether the Water Supply, Stormwater and Wastewater infrastructure has sufficient capacity to accommodate the activity.</u></li> <li>2. <u>Any alternative measures proposed to mitigate adverse effects on the Water Supply, Stormwater and Wastewater infrastructure network.</u></li> <li>3. <u>Whether the additional demand generated will necessitate additional unplanned public investment in, or expansion of, the Water Supply, Stormwater and Wastewater infrastructure network or compromise its ability to service other activities permitted within the zone.</u></li> <li>4. <u>Whether the development can achieve hydraulic neutrality.</u></li> <li>5. <u>The extent to which the development incorporates stormwater management techniques or controls to mitigate any increase in pre-development peak stormwater runoff.</u></li> </ol>						
TCZ – Town Centre Zone							
	New TCZ - Town Centre Zone	Introduce new Chapter Heading and Introduction	<p><a href="#">TCZ - Town Centre Zone</a></p> <p><u>The Town Centre Zone applies to the Silverstream Centre. It provides for a medium to large scale suburban shopping centre that serves not only the surrounding residential catchment but also neighbouring suburbs. The Town Centre Zone accommodates a wide range of retail, commercial services and health care and community facilities. It also provides for employment opportunities as well as residential activities. Overall the Town Centre Zone is of a larger scale and has a wider focus than the Local Centre Zone while not undermining the primary function of the City Centre Zone.</u></p>				

IPI - PROPOSED AMENDMENTS					
#	Chapter	Change	Track Change		
			<p>The Town Centre Zone provides for <b>residential activities</b> where it is located above ground floor along identified active street frontages. It does not encourage <b>large format retail</b> (except for <b>supermarkets</b>), car-oriented <b>activities</b> or <b>light industrial activities</b>.</p> <p>The Town Centre Zone is characterised by a high-density built <b>environment</b> that aligns well with the expected high-density of the surrounding residential environment. The Town Centre Zone is well serviced by public transport. <b>Buildings</b> are mostly built up to the <b>road</b> frontage with active frontages to provide a vibrant and attractive streetscape.</p> <p><b>Non-residential activities</b> and development have the potential to generate adverse <b>effects</b> where they are directly adjoining residential and open space areas. To manage these potential <b>effects buildings</b> have to be set back and outdoor storage and parking areas need to be screened.</p>		
	New TCZ - Town Centre Zone	Introduce new Objective TCZ-O1	<p><b>Objectives</b></p> <table border="1"> <tr> <td><b>TCZ-O1</b></td> <td><b>Purpose of the Town Centre Zone</b></td> </tr> </table> <p>The Town Centre Zone is a medium to large scale <b>commercial</b> centre that services the needs of the immediate and neighbouring suburbs and accommodates a wide range of <b>commercial</b> and community <b>activities</b> as well as <b>residential activities</b>.</p>	<b>TCZ-O1</b>	<b>Purpose of the Town Centre Zone</b>
<b>TCZ-O1</b>	<b>Purpose of the Town Centre Zone</b>				
	New TCZ - Town Centre Zone	Introduce new Objective TCZ-O2	<table border="1"> <tr> <td><b>TCZ-O2</b></td> <td><b>Character and Amenity Values of the Town Centre Zone</b></td> </tr> </table> <p>The Town Centre Zone is a vibrant, attractive and safe urban <b>environment</b> that is characterised by high-density urban development, well-designed <b>buildings</b> and high quality public spaces.</p>	<b>TCZ-O2</b>	<b>Character and Amenity Values of the Town Centre Zone</b>
<b>TCZ-O2</b>	<b>Character and Amenity Values of the Town Centre Zone</b>				
	New TCZ - Town Centre Zone	Introduce new Objective TCZ-O3	<table border="1"> <tr> <td><b>TCZ-O3</b></td> <td><b>Managing Effects at the Zone Interface</b></td> </tr> </table> <p>Use and development within the Town Centre Zone are of an appropriate scale and manage potential adverse <b>effects</b> on the <b>amenity values</b> of adjoining <b>sites</b> in Residential and Open Space and Recreation Zones.</p>	<b>TCZ-O3</b>	<b>Managing Effects at the Zone Interface</b>
<b>TCZ-O3</b>	<b>Managing Effects at the Zone Interface</b>				
	New TCZ - Town Centre Zone	Introduce new Policy TCZ-P1	<p><b>Policies</b></p> <table border="1"> <tr> <td><b>TCZ-P1</b></td> <td><b>Appropriate activities</b></td> </tr> </table> <p>Enable appropriate <b>activities</b> that</p> <ol style="list-style-type: none"> <li>1. <u>Are compatible with the anticipated purpose, character and <b>amenity values</b> of the Town Centre Zone;</u></li> <li>2. <u>Service the needs of the immediate and surrounding suburbs; and</u></li> <li>3. <u>Minimise any adverse <b>effects</b> on the amenity of adjoining residential, recreational and open space <b>sites</b>.</u></li> </ol>	<b>TCZ-P1</b>	<b>Appropriate activities</b>
<b>TCZ-P1</b>	<b>Appropriate activities</b>

			5. <a href="#">The extent to which the development incorporates stormwater management techniques or controls to mitigate any increase in pre-development peak stormwater runoff.</a>
CCZ – City Centre Zone			
	CCZ - City Centre Zone	Amend Background	<p><b>CCZ - City Centre Zone</b></p> <p><b>Background</b></p> <p><del>Businesses within the City are located in the City Centre Zone (Central Business District – CBD), commercial and industrial areas, and suburban areas. Some parts of the business areas include hotels, tourist facilities and other activities.</del></p> <p><a href="#">The City Centre Zone is the primary commercial centre of the city. It offers vibrant, attractive and high-quality public spaces and provides for a wide variety and diverse range of commercial, community, recreational, employment and residential opportunities.</a></p> <p><a href="#">High-density development and intensification is enabled and encouraged while maintaining and improving amenity values especially in the public realm. There is opportunity for redevelopment and intensification as many sites within the City Centre Zone are currently not being used as intensively as they could be.</a></p> <p><a href="#">There are specific requirements along identified street frontages to create attractive frontages that contribute a vibrant and active streetscape and improve the quality and appeal of City Centre Zone. New buildings and development are well designed and reflect the high quality urban environment of the City Centre Zone. While all new buildings require resource consent as a restricted discretionary activity, the relevant standards send a clear signal that maximum building heights and density of urban form are anticipated and encouraged. At the same time the restricted discretionary activity status for new buildings and substantial additions and alterations to existing buildings will allow for an assessment of the proposal to ensure that any new development is well designed, of high quality and consistent with the City Centre Design Guide.</a></p> <p><a href="#">The City Centre Zone also encourages high-density residential developments such as apartments, to provide wider housing choices and increase vibrancy of the City Centre Zone. Residential units need to be located above ground floor along identified active frontages.</a></p> <p><a href="#">Non-residential activities and development have the potential to generate adverse effects where they are directly adjoining residential and open space areas. To manage these potential effects buildings have to be set back from these boundaries and outdoor storage and parking areas need to be screened.</a></p>

IPI - PROPOSED AMENDMENTS									
#	Chapter	Change	Track Change						
	CCZ- City Centre Zone	Delete existing Resource Management Issues	<p><b><del>Resource Management Issues</del></b></p> <p><del><b>CCZ-11</b> — Adverse effects on <b>amenity values</b> and environmental quality resulting from <b>commercial activities</b>.</del></p> <p><del>Commercial <b>activities</b> in general, while vital to the well-being of the community, may have a range of adverse <b>effects</b> on the surrounding <b>environment</b>, including residential areas. These <b>effects</b> need to be identified and managed to ensure that <b>amenity values</b> are not diminished. The adverse environmental <b>effects</b> which <b>commercial activities</b> may have can include increases in traffic density, <b>noise</b> and odour, a decrease in sunlight, and loss of privacy and visual amenity.</del></p> <p><del><b>CCZ-12</b> — The <b>adverse effects</b> of <b>commercial activities</b> on the existing infrastructure and resources of the commercial areas.</del></p> <p><del><b>Activities</b> in commercial areas can result in effects on the infrastructure and resources which have established there. The efficient use of the existing infrastructure and resources of the commercial areas, including new development, is considered to be an important resource management matter.</del></p> <p><del><b>CCZ-13</b> — Providing for a range of <b>commercial activities</b> which are readily accessible.</del></p> <p><del>The variety of <b>activities</b> which exist in the commercial areas contributes to the vitality and convenience of the City. A number of distinct commercial areas are found in the City. The City Centre Zone (CBD) has a range of <b>retail activities</b>, community and entertainment facilities, civic and cultural facilities, offices and businesses, and is a focal point for the City.</del></p> <p><del><b>CCZ-14</b> — The continued maintenance of an appropriate level of environmental quality within commercial areas.</del></p> <p><del>Commercial <b>activities</b> can generate traffic, smoke, <b>noise</b>, vibration, glare or other nuisances that can adversely affect other nearby <b>activities</b>. They also can have potential adverse effects on the natural <b>environment</b>, such as <b>waterbodies</b> and indigenous bush areas.</del></p> <p><del>Some commercial areas within the City are characterised by pedestrian-orientated <b>activities</b> and amenities. Large-scale industrial, warehousing and storage facilities, which are vehicle-orientated, may adversely impact on the pedestrian environment of the City Centre Zone (CBD). It is therefore important to recognise the particular elements which affect the <b>amenity values</b> of an area.</del></p>						
	CCZ- City Centre Zone	Amend Objective CCZ-O1	<table border="1"> <thead> <tr> <th colspan="2"><u>Objectives</u></th> </tr> </thead> <tbody> <tr> <td><b>CCZ-O1</b></td> <td><u>Purpose of the CCZ- City Centre Zone</u></td> </tr> <tr> <td colspan="2"> <p><del>The <u>City Centre</u> is Upper Hutt's principal <u>sustainable management of physical resources within the existing commercial areas of the City to protect and enhance their <b>amenity values</b>, civic and cultural centre. IPI - PROPOSED AMENDMENTS					
#	Chapter	Change	Track Change		
			<p>The <del>effects</del> generated by the wide range of <del>activities</del> provided for in the CCZ – City Centre Zone, such as smoke, <del>noise</del>, vibration, glare or other nuisances, can have adverse <del>effects</del> on areas beyond the CCZ – City Centre Zone boundaries.</p>		
	CCZ- City Centre Zone	Amend Policy CCZ-P1	<p><b>Policies</b></p> <table border="1"> <tr> <td><b>CCZ-P1</b></td> <td><b>Appropriate Activities</b></td> </tr> </table> <ol style="list-style-type: none"> <li><del>To promote the location of retail. Enable a wide range of activities in patterns which do not adversely affect the that are compatible with the anticipated purpose, character and amenity values of the CCZ- City Centre Zone (Central Business District), and to limit the establishment of retail activities within the General Industrial Zone.</del></li> <li><u>Encourage small scale activities with a strong pedestrian focus to locate along roads with active street frontage requirements to create a vibrant interface and active public spaces.</u></li> </ol> <p>The CCZ – City Centre Zone (CBD) is the focus of many <del>retail</del> and service <del>activities</del> that, in combination, give this area a special and unique character as the centre of the City. The focusing and clustering of <del>activities</del> within the CCZ – City Centre Zone (CBD) is an important part of the vitality, character and amenity of the City. This policy seeks to recognise the role of the CCZ – City Centre Zone (CBD) by promoting its amenity characteristics and recognising its overall economic viability, but this policy does not seek to preclude <del>retail</del> development in other parts of the City such as in neighbourhood centres. This in turn promotes the sustainable management of the CCZ – City Centre Zone (CBD).</p> <p><del>Yard-orientated retail activities and large format retail activities tend to adversely affect pedestrian amenity values. It is therefore important to encourage them to locate in areas where a lower level of pedestrian amenity is acceptable such as in the General industrial zone. Establishment of retail activity in the General industrial zone is however controlled in order to enable the assessment of the scale and character of retail activity. Retail activity in the General industrial zone can detract from other retail areas of the City and can generate adverse traffic effects. Retail activity can also conflict with other land uses within the General industrial zone. Large format retail development should be located in a manner complementary to the existing retail development of the City and in a manner that is complementary to, and does not detract from, the vitality and viability of the CCZ – City Centre Zone (CBD).</del></p> <p><del>Specific provision is made for large format retailing to establish on the former South Pacific Tyres site being a location that is considered to be complementary to the CBD and which can contain a number of large format retail activities in an integrated manner, complementary to established activities on Park Street. The site has been identified as being appropriate for large format retailing through the development of the Upper Hutt Urban Growth Strategy.</del></p>	<b>CCZ-P1</b>	<b>Appropriate Activities</b>
<b>CCZ-P1</b>	<b>Appropriate Activities</b>				

IPI - PROPOSED AMENDMENTS							
#	Chapter	Change	Track Change				
			<p><del>The concentration of activities in established areas results in the provision of a wide range of services and the promotion of amenity values of the established business areas. It also encourages better use of community resources such as the City Library or recreation facilities which are more convenient when located centrally.</del></p>				
	CCZ- City Centre Zone	Replace Policy CCZ-P2	<table border="1"> <thead> <tr> <th>CCZ-P2</th> <th><u>Residential Activity</u></th> </tr> </thead> <tbody> <tr> <td colspan="2"> <p><del>1. To promote a high level of CCZ–City Centre Zone (Central Business District) amenity, including weather protection in Main Street and the minimisation of conflict with motor vehicles. Provide for high-density residential activity and development where:</del></p> <p><del>a. Residential units are located above ground floor;</del></p> <p><del>b. Residential units are designed to</del></p> <p><del>i. Ensure appropriate indoor noise and ventilation levels; and</del></p> <p><del>ii. Provide amenity values for occupants;</del></p> <p><del>c. INDUSTRIAL ZONES											
GIZ – General Industrial Zone											
	GIZ – General Industrial Zone	Consequential Amendment	<p><b>GIZ – General Industrial Zone</b></p> <p><b>Background</b></p> <p>Businesses within the City are located in the <a href="#">City Centre Zone</a> <del>Central Business District (CBD)</del>, commercial, <a href="#">mixed use</a> and industrial areas, and suburban areas. Some parts of the business areas include hotels, tourist facilities and other <b>activities</b></p>								
	GIZ – General Industrial Zone	Consequential Amendment	<p><b>Objectives</b></p> <p><b>GIZ-O1</b> <i>The <b>sustainable management</b> of physical resources within the existing industrial areas of the City to protect and enhance their <b>amenity values</b>.</i></p> <p>This objective recognises the importance of particular elements and characteristics that define the <b>commercial</b> areas. <b>Commercial activities</b> and development can have both positive and adverse environmental <b>effects</b> on the areas that surround them. Any consideration of <b>effects</b> must take account of the need to provide sufficient areas for <b>commercial</b> development needs, and the maintenance of <b>amenity values</b> and character.</p> <p>The General Industrial Zone incorporates <b>land</b> which is used for a range of industrial and <b>commercial activities</b>, but in particular larger scale industrial, warehousing, storage and <b>commercial activities</b> which are vehicle rather than pedestrian orientated. There are limited <b>retail activities</b> within these areas and the environmental standards are less stringent than those within the Commercial <a href="#">and Mixed Use</a> zones.</p>								
			<b>Policies</b>								

**IPI - PROPOSED AMENDMENTS**

#	Chapter	Change	Track Change						
			<p><b>GIZ-P1</b> <i>To promote the location of <b>retail activities</b> in patterns which do not adversely affect the <b>amenity values</b> of the City Centre Zone <del>(Central Business District)</del>, and to limit the establishment of <b>retail activities</b> within the General Industrial Zone.</i></p> <p>The City Centre Zone <del>(CBD)</del> is the focus of many <b>retail</b> and service <b>activities</b> that, in combination, give this area a special and unique character as the centre of the City. The focusing and clustering of <b>activities</b> within the City Centre Zone <del>(CBD)</del> is an important part of the vitality, character and amenity of the City. This policy seeks to recognise the role of the City Centre Zone <del>(CBD)</del> by promoting its amenity characteristics and recognising its overall economic viability, but this policy does not seek to preclude <b>retail</b> development in other parts of the City such as in neighbourhood centres. This in turn promotes the <b>sustainable management</b> of the City Centre Zone <del>(CBD)</del>.</p> <p>Yard-orientated <b>retail activities</b> and <b>large format retail activities</b> tend to adversely affect pedestrian <b>amenity values</b>. It is therefore important to encourage them to locate in areas where a lower level of pedestrian amenity is acceptable such as in the General industrial zone. Establishment of <b>retail activity</b> in the General industrial zone is however controlled in order to enable the assessment of the scale and character of <b>retail activity</b>. <b>Retail activity</b> in the General industrial zone can detract from other <b>retail</b> areas of the City and can generate adverse traffic <b>effects</b>. <b>Retail activity</b> can also conflict with other <b>land</b> uses within the General industrial zone. <b>Large format retail</b> development should be located in a manner complementary to the existing <b>retail</b> development of the City and in a manner that is complementary to, and does not detract from, the vitality and viability of the City Centre Zone <del>(CBD)</del>.</p> <p><del>Specific provision is made for large format retailing to establish on the former South Pacific Tyres site being a location that is considered to be complementary to the City Centre Zone (CBD) and which can contain a number of large format retail activities in an integrated manner, complementary to established activities on Park Street. The site has been identified as being appropriate for large format retailing through the development of the Upper Hutt Urban Growth Strategy.</del></p> <p>The concentration of <b>activities</b> in established areas results in the provision of a wide range of services and the promotion of <b>amenity values</b> of the established business areas. It also encourages better use of community resources such as the City Library or recreation facilities which are more convenient when located centrally.</p>

			<p><i>Policies GRZ-P4, OSZ-P2, OSZ-P4</i></p> <p>(1) All <b>buildings</b> shall comply with the <b>height control planes</b> <u>in relation to boundary standard</u> defined in GRZ-S8.</p>

## SPECIAL PURPOSE ZONES

### SAZ – Special Activity Zone

	SAZ – Special Activity Zone	Amend Background	<p><b>Background</b></p> <p>The main characteristics of the Special Activity Zone are the form and scale of <b>building</b> development, the nature and intensity of <b>activities</b> on the <b>sites</b> and their <b>effects</b> on the <b>environment</b>.</p> <p>Major <b>activities</b> in the Zone include Trentham Military Camp, Rimutaka Prison, New Zealand International Campus (the former Central Institute of Technology (CIT) complex), <del>St Patrick’s College</del>, Trentham Racecourse, Heretaunga Golf Course and the Silver Stream Railway. These <b>activities</b> make an important and positive economic, social and cultural contribution to the City.</p> <p><del>The area adjoining and including St Patrick’s College covers approximately 65 hectares of land, 45 hectares of which is undeveloped. This land is referred to in the Plan as the St Patrick’s Estate Area. The land borders the Hutt River and forms part of the flood plain.</del></p> <p>The Hutt City Council have a designation for an excess <b>wastewater</b> flow storage facility adjacent to the Eastern Hutt Road.</p>
	SAZ – Special Activity Zone	Delete Issue	<p><b>Issues</b></p> <p><del>SAZ 14 — Potential detracting from the visual amenity resulting from development on the St Patrick’s Estate Area.</del></p> <p><del>The St Patrick’s Estate Area is currently mainly pasture and is part of the open vista entrance to Upper Hutt. This open character is a feature when entering the City from the south. To recognise and respect the “gateway” function of the area and maintain its visual amenity, building development should be relatively low profile with an emphasis on landscaping.</del></p>
	SAZ – Special Activity Zone	Delete Issue	<p><del>SAZ 15 — The threat to the St Patrick’s Estate Area from potential inundation from the Hutt River and the Mawaihakona Stream.</del></p> <p><del>As this is a flood plain, a number of restrictions have to be placed on the location and construction of buildings and structures.</del></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
	SAZ – Special Activity Zone	Delete Objective	<p><b>Objectives</b></p> <p><del>SAZ-O3 – Provision for a range of activities on the St Patrick’s Estate Area which avoids, remedies or mitigates any adverse effects on its visual amenity, on the neighbouring community, services and roading infrastructure, and takes into account the flooding hazards.</del></p> <p><del>St Patrick’s Estate is an area of land with potential for a wide range of development options. This area is dealt with under a specific policy framework within the Special Activity Zone. The St Patrick’s Estate contains two distinct areas for future development, which are identified on the Planning Maps:</del></p> <p><del>(1) The St Patrick’s College Area for future education expansion.</del></p> <p><del>(2) The Managed Development Area for a range of other uses.</del></p> <p><del>Controls are required to prevent development in close proximity to the Hutt River and Mawaihakona Stream.</del></p>
	SAZ – Special Activity Zone	Delete Policy	<p><b>Policies</b></p> <p><del>SAZ-P4 – To provide for a range of activities within the St Patrick’s Estate Area which best suit the characteristics and constraints of the existing environment.</del></p> <p><del>Two distinct areas provide for a range of commercial, open space and educational activities appropriate to the environmental character and constraints of the land and surrounding area. These have been based on previous policies for the land and negotiation with the landowners and other parties. Linkages to the Hutt River walkway and the Silverstream Railway Station may be important components of future development.</del></p> <p><del>The rules for these areas require that any development be serviced with appropriate access to existing services and roads. In a major flood event, structures could impede the flood flow, putting buildings, roads or services in danger and causing additional problems. Accordingly, activities that are relatively free of structures are appropriate for the part of the site in the flood plain. However, special requirements are also included in relation to building floor levels, roads and services, so that structures may be developed as long as they are designed for protection from future floods with a 1 in 100 year return period.</del></p>
	SAZ – Special Activity Zone	Amend Policy	<p><b>SAZ-P6</b> To identify and maintain <b>amenity values</b> that the community wishes to protect.</p> <p><b>Amenity values</b> are those features or aspects about an area which enhance it or make it pleasant to be in. They can include access to sunlight, <b>landscaping</b> and visual qualities. They may also include important public features, such as parks and reserves. <b>Activities</b> which can adversely affect the amenities of an area must be managed, while also</p>

IPI - PROPOSED AMENDMENTS																																				
#	Chapter	Change	Track Change																																	
			<p>recognising the rights of individuals to use their own <b>properties</b> and the need for utilities to operate effectively and safely.</p> <p><del>A particular concern of the Upper Hutt community relates to the <b>effects</b> of the establishment and use of what are commonly referred to as gang fortifications. These are sometimes accompanied by an increase in antisocial behaviour.</del></p> <p>It is <b>Council's</b> view that the adverse <b>effects</b> of these fortifications on the <b>environment</b>, in particular in respect of the social, economic, aesthetic and cultural conditions of the Upper Hutt people and community, and the <b>amenity values</b> of the Upper Hutt <b>environment</b>, are such that these <b>activities</b> should not be permitted. The <b>activity</b> is therefore prohibited anywhere in Upper Hutt City.</p>

DEVELOPMENT AREAS											
Development Area 1 - Wallaceville Structure Plan Development Area											
	Development Area 1 - Wallaceville Structure Plan Development Area		This chapter contains provisions which relate to the <b>Wallaceville Structure Plan Development Area</b> . These provisions apply in addition to the underlying zone rules of the <b>General Residential Zone</b> , <b>High Density Residential Zone</b> , and the <b>Commercial Local Centre Zone</b> and relevant District-wide Matters. Where there is any conflict between the provisions the <b>Wallaceville Structure Plan Development Area</b> provisions shall prevail. <b>Subdivision</b> provisions for the <b>Wallaceville Structure Plan Development Area</b> are located in the Subdivision Chapter (SUB).								
	Development Area 1 - Wallaceville Structure Plan Development Area		<p><b>Objectives</b></p> <p><b>Wallaceville Living Precinct Area A, Wallaceville Living Precinct Area B, Urban Precinct and Grants Bush Precinct</b></p> <p>The following objective relates to the Wallaceville Living Precinct Area A, the Wallaceville Living Precinct Area B, the Urban Precinct and the Grants Bush Precinct of the <b>Wallaceville Structure Plan Development Area</b>. It applies in addition to the objectives of the underlying <b>General Residential Zone</b> <u>or High Density Residential Zone</u> and provides additional guidance specific to the identified areas of the Structure Plan.</p>								
	Development Area 1 - Wallaceville Structure Plan Development Area		<p><b>Gateway Precinct</b></p> <p>The following objective relates to the Gateway Precinct of the <b>Wallaceville Structure Plan Development Area</b> and applies in addition to the objectives of the underlying <b>Commercial Local Centre Zone</b>. It provides additional guidance specific to the Gateway Precinct of the Structure Plan.</p>								
	Development Area 1 - Wallaceville Structure Plan Development Area		<p><b>Policies</b></p> <p><b>Wallaceville Living Precinct Area A, Wallaceville Living Precinct Area B, Urban Precinct and Grants Bush Precinct</b></p> <p>The following policies apply to the Wallaceville Living Precinct Area A, the Wallaceville Living Precinct Area B, the Urban Precinct and the Grants Bush Precinct of the <b>Wallaceville Structure Plan Development Area</b>, in addition to the policies of the underlying</p>								

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<b>General Residential Zone</b> or <b>High Density Residential Zone</b> . They provide additional guidance specific to the identified areas of the Structure Plan.
	Development Area 1 - Wallaceville Structure Plan Development Area		<p><b>DEV1-P1</b> <i>To ensure that non-residential activities within residential areas do not cause significant adverse environmental effects.</i></p> <p>While provided for as a Discretionary Activity, it is recognised that <b>commercial</b> development may take place in the Urban Precinct of the Wallaceville Structure Plan, which may include the <b>commercial</b> redevelopment of the farm management <b>building</b> and dairy <b>building</b>, provided that significant adverse environmental <b>effects</b> on the <b>Commercial Local Centre</b> Zone (the Gateway Precinct), <b>residential activities</b> and other areas of Upper Hutt City can be avoided or mitigated. This does not preclude other potential development options for the Urban Precinct being developed that are compatible with <b>residential activities</b>.</p> <p>Resource consent applications for any <b>commercial</b> development not consistent with the Wallaceville Structure Plan will need to be carefully assessed against Policies DEV-P1 in particular.</p>
	Development Area 1 - Wallaceville Structure Plan Development Area		<p><del><b>DEV1-P4</b> <i>To encourage higher density housing through the provision of reduced net site area standards and in the form of Comprehensive Residential Developments in identified areas of the City.</i></del></p> <p><del>The Plan identifies areas considered suitable for higher density residential development. These areas are located surrounding the central business district, around the Trentham neighbourhood centre located at Camp Street, near the Wallaceville railway station from Ward Street to Lane Street and within the Urban Precinct and Grants Bush Precinct of the Wallaceville Structure Plan Development Area.</del></p> <p><del>These areas are in close proximity to retail and service facilities as well as the availability of major transport points, including rail and bus services, and a major bus terminal in the CBD.</del></p>
	Development Area 1 - Wallaceville Structure Plan Development Area		<p><b>Gateway Precinct</b></p> <p>The following policies apply within the Gateway Precinct of the <b>Wallaceville Structure Plan Development Area</b>. They apply in addition to the underlying policies of the <b>Commercial Local Centre</b> Zone and provide additional guidance specific to the Gateway Precinct of the Structure Plan.</p>
	Development Area 1 - Wallaceville Structure Plan Development Area		<p><b>DEV1-P7</b> <i>To control the size and scale of buildings and the visual appearance of sites within the <b>Commercial Local Centre</b> Zone.</i></p> <p>...</p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
<b>PART 4 – APPENDICES AND MAPS</b>			
<b>APPENDICES</b>			
<b>Appendix 1 – Medium and High Density Design Guide</b>			
	Design Guide for the Residential Centres Precinct	Delete Design Guide for the Residential Centres Precinct.	<p><b><del>Design Guide for the Residential Centres Precinct</del></b></p> <p><b><del>The Design Guide</del></b></p> <p><del>The purpose of the design guide is to provide design criteria that will direct the delivery of well designed, good quality higher density housing in an Upper Hutt specific context. The guide applies specifically to <b>Comprehensive Residential Development and subdivision</b> that produces small lots. These developments, because of their higher density and potential effect on residential amenity, will require resource consents. Applications will be required to demonstrate how the design of the development has addressed the criteria in this Design Guide, in addition to meeting the relevant standards and objectives and policies of the District Plan.</del></p> <p><del>This design guideline is structured in three parts. The first focuses on the specific requirements of <b>Comprehensive Residential Developments</b> and the second concentrates on small site design – most relevant to infill style subdivision, or developments of small scale stand-alone <b>residential unit</b>. The two parts should be read as a whole, and the guidance provided should be considered to achieve improved urban outcomes for all forms of residential development.</del></p> <p><del>The third part of the Design Guide contains Character Statements for the <b>Residential Centres Precinct</b>, to assist in understanding the elements of character in those areas and responding positively to the Design Guide with these in mind.</del></p> <p><b><del>What is Comprehensive Residential Development?</del></b></p> <p><del><b>Comprehensive residential development</b> is a way of providing a greater degree of choice in housing in Upper Hutt. It involves developing <b>sites</b> in a planned and efficient way with a greater density of housing than has been done in the past. It delivers an alternative to traditional development patterns of houses on large sections, and is a way to make efficient use of land while still providing houses that are attractive, private and often, more affordable to buy and through improved design, providing lower cost of living. Different forms of housing also provide choice for those who do not want or need larger houses or sections, especially if they wish to remain in a community they have come to like.</del></p> <p><del>Across the residential areas of Upper Hutt, several areas called the <b>Residential Centres Precinct</b> has been specifically identified as suitable locations for this sort of development to occur. These areas are in proximity to local amenities and public transport, and are ideal locations for housing developments at a greater density</del></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p><del>As density increases, more thought needs to be given to creating good quality living spaces alongside pleasing streets and townscape. Higher density housing is often thought to lead to poor urban quality, overcrowding and reduced space standards. However, poor quality outcomes are often a result of poorly conceived or inflexible design rather than just increased density. The best sorts of outcomes are achieved by examining context and designing a carefully considered, specific solution for each site.</del></p> <p><del>The design of higher density residential development needs to respond to the qualities of the street and the area, and to provide for the needs of the inhabitants. Good quality housing will meet current and future demand, and cater for the needs of the city's changing population.</del></p> <p><del><b>Aims for comprehensive residential developments:</b></del></p> <ul style="list-style-type: none"> <li><del>➤ Houses and open space are located and arranged on the site in an integrated and comprehensive manner.</del></li> <li><del>➤ New development contributes positively to the character of the neighbourhood.</del></li> <li><del>➤ Reasonable privacy for the residents and neighbours is provided through well considered siting and design of buildings.</del></li> <li><del>➤ Housing provides a high quality and efficient living environment (both internal and external) for occupants.</del></li> </ul> <p><del><i>Note: Where a development incorporates an existing house(s) the requirements of this Guide shall apply equally to that house(s).</i></del></p> <p><del><b>What is a 'small site'?</b></del></p> <p><del>Within the <b>Residential Centres Precinct</b>, the District Plan provides for a lower minimum <b>net site area</b> than in other residential areas.</del></p> <p><del>Such small lots present design challenges, and simply 'miniaturising' more commonly seen forms of development may not produce the best outcomes for amenity either on site or for the wider area. A careful approach is needed to ensure that small lots continue to create sites that are both developable, and able to accommodate houses that are well designed and afford good amenity to occupants.</del></p> <p><del><b>Aims for small site design:</b></del></p> <ul style="list-style-type: none"> <li><del>➤ Lots are of an adequate width and suitable shape to accommodate a residential dwelling.</del></li> <li><del>➤ Lots are oriented for access to sunlight and to take advantage of solar gain to internal spaces.</del></li> <li><del>➤ Lots are designed to ensure that useable outdoor space will be readily accessible from future dwelling sites.</del></li> <li><del>➤ Lots are laid out and designed, and building sites identified, so as to provide for the retention of significant trees and vegetation.</del></li> <li><del>➤ Access to lots is designed so as to minimise its visual impact and dominance.</del></li> <li><del>➤ Lots and <b>residential unit sites</b> are located and shaped to minimise adverse impact on existing development surrounding the site, and potential future development.</del></li> </ul> <p><del><b>COMPREHENSIVE RESIDENTIAL DEVELOPMENTS</b></del></p>

**IPI - PROPOSED AMENDMENTS**

#	Chapter	Change	Track Change
			<p><b>Integrated Buildings and Spaces</b></p> <p>As housing density increases there is a corresponding need to make sure that <b>buildings</b> are arranged carefully across sites and that spaces around them fulfil useful and sensible functions. In Upper Hutt, the sense of space around <b>buildings</b> is valued as part of the townscape, so new developments should aim to enhance this wherever possible.</p> <p>However, this does not mean that all houses need to be physically separate and have space on all sides. Well designed attached housing can provide both on site amenity and value to the wider area, by employing careful consideration of how <b>buildings</b> are arranged and outdoor spaces are allocated from the outset of the design process. The ability to accommodate landscaping on site (particularly vegetation that grows to a mature height above fence level) will also have an impact on both the sense of spaciousness around houses and the character of the wider neighbourhood.</p> <p>How vehicles are accommodated on sites also has an impact on amenity outcomes. Site design should aim to consider buildings, the spaces surrounding them, vehicles and landscaping as part of a comprehensive whole at the outset of the design process.</p> <p><b>Guidelines</b></p> <ul style="list-style-type: none"> <li>➤ The siting of <b>buildings</b> and open space should be designed in an integrated way so that <b>buildings</b> can connect with useful outdoor space that has reasonable privacy, good access to sunlight, and a sense of openness. (See figure 1)</li> </ul> <div data-bbox="1030 829 1680 1197" data-label="Image"> <p>The image contains two site plan diagrams side-by-side, enclosed in a red rectangular border. A large red diagonal line is drawn across the entire diagram area from the bottom-left to the top-right. The left diagram shows a cluster of several buildings of varying heights and shapes. Each building has a small, irregularly shaped outdoor space attached to it, indicated by dashed lines and arrows. The label 'PRIVATE OUTDOOR SPACE' is written at the top left. A 'ROAD' is shown at the bottom with a checkmark to its right. The right diagram shows a row of three rectangular buildings. Between and around them are larger, more uniform outdoor spaces. The label 'EDAS' is at the bottom center, and an 'X' is at the bottom right.</p> </div> <p><b>Figure 1: Carefully considered layout of buildings on sites helps to contribute to a more pleasant living environment.</b></p> <ul style="list-style-type: none"> <li>➤ Each unit should have its own private outdoor space, for use exclusively as outdoor recreational space. Shared spaces as the principal means of providing outdoor living areas will only be considered in special circumstances.</li> </ul>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p><del>Outdoor space within the site needs to be planned for at the design stage to ensure it is useable rather than residual to the buildings. It also needs to be easily accessible and connected to main living areas, and should not have any part of its area used for any other required function for the site i.e. as part of the on-site parking or manoeuvring requirements.</del></p> <p><del>Shared spaces may be considered in situations such as for comprehensively planned elderly persons' housing, sheltered/community housing or papakainga. Such instances will be individually assessed to ensure the space provided is of the best quality possible and will meet the specific needs of residents, while also ensuring reasonable privacy to interior living spaces.</del></p> <p>➤ <del>The outdoor living area allocated to each residential unit should have within it a 'principal area' that is:</del></p> <ul style="list-style-type: none"> <li><del>— Directly accessible from the main indoor living area of that dwelling;</del></li> <li><del>— Positioned to have regard to shelter from the prevailing wind, or be detailed so as to minimise the worst effects of that wind;</del></li> <li><del>— Oriented with a northerly aspect to take advantage of natural sunlight;</del></li> <li><del>— Able to accommodate a square of 4m x 4m;</del></li> <li><del>— Nominally flat, with a gradient of no greater than 1 in 12;</del></li> <li><del>— Not located between the residential unit and any public street.</del></li> </ul> <p><del>The allocation of a 'principal area' within the overall requirement of outdoor living space ensures that a minimum amount of the outdoor space for a residential unit is carefully considered, and of the highest quality for usability, access and privacy. Although one larger space is preferred, two or more smaller spaces will be considered acceptable where it is possible to demonstrate that this leads to a better outcome in terms of providing quality, useable outdoor living space. (See figure 2)</del></p>

**IPI - PROPOSED AMENDMENTS**

#	Chapter	Change	Track Change
			<div data-bbox="1077 268 1621 699" data-label="Diagram"> </div> <p data-bbox="801 719 1917 746"><i>Figure 2: Different types of spaces can all contribute to creating a pleasant outdoor living environment.</i></p> <ul style="list-style-type: none"> <li data-bbox="759 767 2078 826">➤ <del>Landscaping of outdoor spaces should be comprehensively planned as part of the overall site design from an early stage.</del></li> <li data-bbox="801 850 2078 909"><i>Landscaping can play a role in helping to define spaces on a site. Landscaping plans should ideally be submitted as part of a resource consent application so the outcomes can be considered as part of a comprehensive whole.</i></li> <li data-bbox="759 933 2078 1024">➤ <del>Where units are at first floor level or above, balconies or roof terraces may be appropriate to provide for outdoor space, subject to careful consideration of privacy. If adequate privacy cannot be obtained by orientation of the spaces or the placement of windows, screening should be used.</del></li> <li data-bbox="759 1048 2078 1139">➤ <del>Where there are common outdoor areas on a site, these should connect with the built development by ensuring windows overlook the space, doors to units open on to the space and the dominance of the area by garage doors or parked cars is avoided.</del></li> <li data-bbox="801 1163 2078 1284"><i>Common areas or shared spaces can contribute positively to the enjoyment of development. They can be used for meeting places, barbeque areas and a place to kick a ball around. These spaces can be made more enjoyable and safe if people inside units can oversee activity in them. The dominance of cars within these areas will detract from their ability to be used for these activities and the amenity of the development.</i></li> <li data-bbox="759 1308 2078 1399">➤ <del>Outdoor rubbish, clothes drying, recycling and storage space should be located so that these facilities are not visually obtrusive, are not located within the 'principal area', do not dominate the entry to residences and are easily accessible to the unit which they serve.</del></li> </ul>

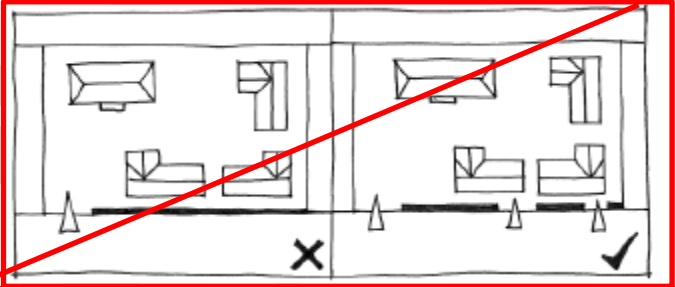

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p><del>Rubbish enclosures and storage can detract from the appearance of the development and the neighbourhood as well as the amenity of outdoor spaces and as with most existing houses, is most appropriately located in less visible areas and away from locations used for outdoor living.</del></p> <p><del>Outdoor rubbish areas should be screened if they are located within sight of the principal outdoor area.</del></p> <p><del>For terraced houses, where front yard rubbish/recycling storage may be the most appropriate to avoid the need to move these items through the interior of the house, a carefully designed enclosure with adequate ventilation, incorporated into the overall landscaping plan, will usually be the best solution.</del></p> <p><b>Fitting in with the neighbourhood</b></p> <p>Many areas of Upper Hutt have a well-developed sense of character. Much of the city's residential area (and the locations in which redevelopment is most likely to occur) is located on the flat valley floor. Older housing stock is often single storey, set back from the street edge and located near the centre of a large rectangular site. Housing displays a wide variety of architectural styles, and mature vegetation contributes to the sense of established neighbourhoods.</p> <p><del>Comprehensive residential developments</del> will introduce housing at a greater density into established neighbourhoods. In order for this to be successful, the essential elements of character in a neighbourhood must be understood, and where those elements create a positive contribution, they should be respected (but not necessarily replicated) in the new design. Understanding the key <b>building</b> patterns of the area will help guide new development so that it can sit comfortably within an established area and retain the amenity enjoyed by the neighbourhood and its residents.</p> <p><b>Guidelines</b></p> <p>➤ The siting and layout of <b>buildings</b> should respect the existing character and <b>building</b> patterns of the neighbourhood. This pattern may consist of the distance of elements such as front yard setbacks, the spacing between <b>buildings</b>, <b>height</b> and width of <b>buildings</b>, materials used, and types of <b>buildings</b>.</p> <p><del>Respecting existing patterns in new development can be demonstrated by adopting similar patterns while not necessarily exactly replicating the detailed design of buildings in the neighbourhood. (See figure 3).</del></p>

**IPI - PROPOSED AMENDMENTS**

#	Chapter	Change	Track Change
			<div data-bbox="1061 268 1659 692" data-label="Image"> </div> <p data-bbox="1021 715 1697 740"><i>Figure 3: New houses respect the patterns set by existing ones.</i></p> <ul style="list-style-type: none"> <li data-bbox="763 762 2074 858">➤ <del>Where the development is in an area of single houses on single sites, the greater <b>building</b> bulk associated with <b>comprehensive residential development</b> should be arranged in terms of layout and form to relate to the scale of the neighbouring housing.</del></li> <li data-bbox="808 879 1077 904">This may be achieved by:             <ul style="list-style-type: none"> <li data-bbox="831 927 1720 952">— <del>Modulating the appearance of larger <b>buildings</b> by using setbacks in alignment;</del></li> <li data-bbox="831 962 1491 987">— <del>Varying the roof design to reduce the perception of bulk;</del></li> <li data-bbox="831 997 1966 1023">— <del>Varying the size of units to reflect the variation of house size in the neighbourhood where this exists;</del></li> <li data-bbox="831 1032 1832 1058">— <del>Varying the <b>height</b> and form of units to avoid a large or dominant form at the <b>boundary</b>;</del></li> <li data-bbox="831 1067 1973 1093">— <del>Using complementary/contrasting materials or colours on exteriors to relieve the appearance of bulk;</del></li> <li data-bbox="831 1102 2074 1153">— <del>Retaining existing mature trees and vegetation on the <b>site</b>, where possible, to assist the integration of the new development within the <b>site</b> and the neighbourhood.</del></li> </ul> </li> <li data-bbox="826 1163 1989 1189"><i><del>New developments can fit into existing neighbourhoods by paying attention to existing details and patterns.</del></i></li> <li data-bbox="826 1208 2074 1265"><i><del>Mature trees benefit neighbourhood amenity beyond the development site and are often highly valued by the community. Unless they unreasonably hinder development or are in poor health they should be retained.</del></i></li> <li data-bbox="763 1291 2074 1348">➤ <del>Residential units within a larger development should be designed and detailed to provide a sense of individuality, and provide opportunities for personalisation.</del></li> </ul>

**IPI - PROPOSED AMENDMENTS**

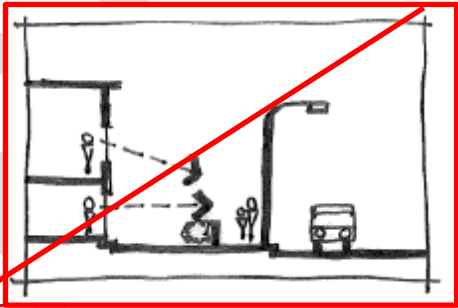

#	Chapter	Change	Track Change
			<p><del>Most people like to identify their homes by some sense of individuality and this also adds to the visual interest of the development. Where design elements are replicated across a development, providing opportunities for individualisation of houses is important.</del></p> <p>➤ <del>Sites with wide frontages should have more than one connection to the adjoining road.</del></p> <p><del>Vehicle and pedestrian access to sites in most established neighbourhoods is provided at regular intervals along the street edge. The benefits of this are providing good access to and from the street, and creating interesting and active 'fronts' along the street edge. Sites with wide frontages (or amalgamated sites) with shared/fewer driveways need to be carefully considered to ensure that the design will continue to provide these benefits. (See figure 4).</del></p>  <p><i>Figure 4: Multiple entrances activate site edges</i></p> <p>➤ <del>Houses on corner allotments with frontage to two roads should be designed to provide interest and opportunities for passive surveillance on both facades.</del></p> <p><del>Buildings on corner sites should have one front/primary façade facing the street. Attention should be given to ensuring that the other street facing façade does not present a blank wall to a public space. Secondary facades could include things like bedroom or dining room windows.</del></p> <p>➤ <del>Dwellings and garages should be designed so that blank walls do not face the street. Any other large surfaces facing the street (e.g. fences) should be either minimised or suitably modulated.</del></p> <p><del>Large blank walls usually have a detrimental effect on streetscape. While being generally unattractive to look at, they also restrict opportunities for passive surveillance of public spaces.</del></p> <p>➤ <del>Where an existing residential unit is proposed to form a part of a Comprehensive Residential Development, consideration should be given to the integration of the existing residential unit into the development through the specific consideration of the factors outlined in this section.</del></p>

IPI - PROPOSED AMENDMENTS			
#	Chapter	Change	Track Change
			<p><i>Whilst an existing <b>residential unit</b> can form a part of a <b>Comprehensive Residential Development</b>, this may not always be desirable where the existing <b>residential unit</b> cannot be adequately integrated into the proposed development. Factors such as architectural style, bulk and form, and the use of particular materials may affect the ability of a <b>residential unit</b> to be integrated.</i></p> <p><b>Accommodating vehicles on sites</b></p> <p>The accommodation of vehicles on <b>sites</b> can have a significant impact on external amenity. Driveways and paving, garages and garage doors all have the potential to dominate if not carefully considered with the view to minimising visual impact.</p> <p>Driveways and paved areas within larger developments should be designed and detailed so that they are able to function more like ‘shared spaces’, where vehicles and people have equal priority. This will ensure that both visual amenity and vehicle and pedestrian safety are enhanced.</p> <p><i>Note: The <b>Code of Practice for Civil Engineering Works</b> gives the specific technical requirements relating to the length, width, gradient and other geometric and construction aspects of driveways and parking spaces. Once these have been met, consideration should be given to the following guidelines.</i></p> <p><b>Guidelines</b></p> <ul style="list-style-type: none"> <li>➤ <del>Accessways and vehicle manoeuvring spaces should be designed to ensure cars enter and leave the site slowly.</del></li> <li><i>To ensure the safety of people within the development, it is important that the layout and landscaping requires vehicles to move slowly within the area and when coming and going. Areas used by cars should be designed so that it is clear to drivers that the spaces are shared with other activities.</i></li> <li>➤ <del>Open parking or vehicle manoeuvring areas should be designed and landscaped as an integral part of the development.</del></li> <li>➤ <del>Expanses of driveway and access areas should be relieved by contrasting patterns and materials to give interest, moderate the apparent scale of paving and add to the visual quality of the development.</del></li> <li><i>Reducing the dominance of vehicle paving is particularly important on larger <b>sites</b>, and on narrow <b>sites</b> where a greater proportion of the width of the <b>site</b> must be dedicated to access and manoeuvring. Long driveways should be detailed with contrasting paving to break up the expanse of hard surfacing.</i></li> <li>➤ <del>The layout of <b>buildings</b> on the <b>site</b> should ensure that garages and car parking spaces are not visually dominant on either the street frontage or within the <b>site</b>.</del></li> </ul>

# 1 | PURPOSE

The purpose of this guide is to provide urban design guidance to inform the design of new medium and high density residential development (generally referred to as intensive residential development for the purposes of this guide) that responds to the Upper Hutt context. Such development includes townhouses as well as terraced, multi-unit housing and apartments.

## Who is it for?

The guide applies to anyone involved in the design and construction of intensive residential development in the city, including architects, designers, developers and property owners. It will also be used by Upper Hutt City Council staff to assess new intensive residential development proposals to ensure that they are responsive to the local context and result in buildings and associated spaces that are liveable and attractive.

## Why?

With a heightened emphasis on higher density living to meet the city's future growth needs, ensuring that good quality design outcomes are also delivered becomes increasingly important. As Upper Hutt continues to change and adapt to cater for these needs it is critical that the potential visual, privacy and/or amenity impacts of larger scale development is properly managed, particularly on sites or in neighbourhoods that are spatially constrained.

## Where does it apply?

To provide greater lifestyle choice the Upper Hutt District Plan includes provisions that enable more intensive development in the city's residential areas. The design guidance that follows applies to residential development within the General Residential Zone and High Density Residential Zone as identified in the plan.

## 2 DESIGN GUIDE STRUCTURE

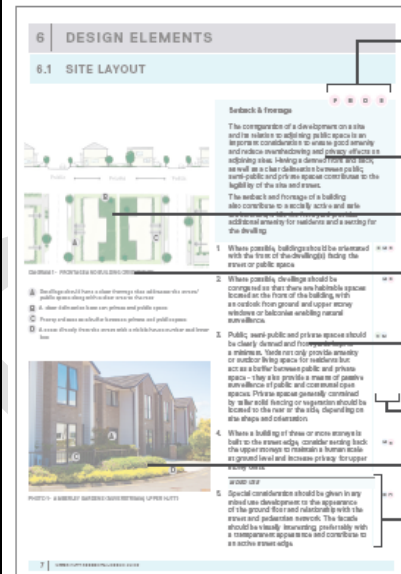

The guide does not prescribe development requirements but instead supports and complements the design outcomes sought for residential development in the Upper Hutt District Plan (e.g. form and appearance, amenity). It outlines the key features that characterises intensive residential development and offers practical advice to guide such development using best practice principles and relevant examples.

Key design considerations are divided into fourteen contributory elements split across three themes as follows:

- » **Site Layout** covers the design elements that are related to effects of development at a site scale.
- » **Built Form & Character** covers elements related to the appropriateness of the building design.
- » **Sustainability and amenity** cover the elements that contribute to living comfort and environment

Supporting photographic examples and indicative diagrammatic interpretations are provided showing how these considerations can be met.

The guidelines apply to any area that is defined as suitable for medium density and high density residential development in the Upper Hutt District Plan. As the guidelines are based on a relatively universal set of urban design principles, most are applicable to residential development at a variety of scales.

### 3 TYPOLOGIES

Single dwelling

Single dwellings on either a conventional or infill site - this is the predominant residential development type in the city. They can also be a contributor to medium density development, providing diversity and increased housing choice.

Dual occupancy

Two dwellings that are fully or partly attached. They can be duplex dwellings that share a common wall or include a unit that occupies an upper storey. Units in dual occupancy generally have their own separate entry.

Multi dwelling housing / townhouses

Three or more dwellings on a single site, each with separate access at ground level and private open space. They can either be fully attached (terraced) or a collection of semi-detached buildings. Dwelling frontages generally align with an adjacent public road or internal street.

Multi unit dwelling

A single building, with one or more entries, that contains three or more units up to a maximum of four storeys. These units can have (a combination of) private and/or shared open space.

High density / apartments

A multi-storey apartment building or group of buildings between 5 to 10 storeys that contains multiple units, often with shared open space and the potential for mixed use on ground floor.

General Residential - Permitted up to three dwellings of three storeys - Design Guide applies when resource consent is required

High Density - Permitted up to 24.5m height - Design Guide applies when resource consent is required

## 4 DESIGN PRINCIPLES

How we design our buildings and the relationship they have with the street and surrounding neighbourhood has a considerable bearing on the way we live, work and meet. The following design principles have been developed to encourage high quality design that contributes to the future character of Upper Hutt and provides an attractive and comfortable living environment for users, residents and visitors.

F

### POSITIVELY RESPOND TO FUTURE CONTEXT

- » Contribute positively to the natural and built environment of the area in line with its anticipated and evolving future context
- » Recognise and positively respond to the existing and anticipated future character of the streetscape and neighbourhood

B

### APPLY APPROPRIATE BUILT FORM & DESIGN

- » Achieve a scale, bulk and height appropriate to the existing and anticipated future character of the street and surrounding buildings
- » Provide a suitable balance between built form and design through maintaining a good composition of elements, internal layout, building materials and colours
- » Enable natural surveillance of the public domain while providing for visual privacy to residents

A

### PROVIDE AMENITY

- » Contribute to creating positive living environments that enrich residents wellbeing
- » Ensure building orientation enables appropriate access to sunlight, outlook, attractive indoor and outdoor spaces
- » Establish a well-designed green space that positively contributes to the (social) living experience and surrounding landscape character
- » Provide good accessibility that caters for all age groups and degrees of mobility

D

### FOSTER DIVERSITY & SOCIAL INTERACTION

- » Provide a range of housing choice to serve the needs of different cultural groups, ages and stages, lifestyles and household budgets
- » Respond to the social context by encouraging a range of dwelling sizes to suit the existing and future mix of residents
- » Provide opportunities for social interactions through communal open space and an attractive and social interface with the street

S

### ENCOURAGE SUSTAINABILITY BY PASSIVE DESIGN

- » Improve the liveability for residents by providing natural ventilation and sufficient sunlight access
- » Reduce energy usage and cost by carefully considering building location, orientation and design to allow for passive solar gains and natural ventilation
- » Allow landscape elements to enhance the environmental performance of the site, contributing to an integrated and sustainable green network

DESIGN PRINCIPLES	POSITIVELY RESPOND TO FUTURE CONTEXT F	APPLY APPROPRIATE BUILT FORM & DESIGN B	PROVIDE AMENITY A	FOSTER DIVERSITY & SOCIAL INTERACTION D	ENCOURAGE SUSTAINABILITY BY PASSIVE DESIGN S

## 5 DESIGN ELEMENTS

### 6.1 SITE LAYOUT

DIAGRAM 1 - FRONTAGE AND BUILDING ORIENTATION

- A Dwellings should have a clear frontage that addresses the street/public space along with a clear area to the rear
- B A clear delineation between private and public space
- C Front yard acts as a buffer between private and public space
- D Access directly from the street with a visible house number and letter box

PHOTO 1 - AMBERLEY GARDENS (SILVERSTREAM, UPPER HUTT)

F B D S

#### Setback & frontage

The configuration of a development on a site and its relation to adjoining public space is an important consideration to ensure good amenity and reduce overshadowing and privacy effects on adjoining sites. Having a defined front and back, as well as a clear delineation between public, semi-public and private spaces contributes to the legibility of the site and street.

The setback and frontage of a building also contribute to a socially active and safe environment, while the front yard provides additional amenity for residents and a setting for the dwelling.

1. Where possible, buildings should be orientated with the front of the dwelling(s) facing the street or public space. M H
  2. Where possible, dwellings should be configured so that there are habitable spaces located at the front of the building, with ground and upper storey windows or balconies providing an outlook that enables passive surveillance. M H
  3. Public, semi-public and private spaces should be clearly defined and front yards kept to a minimum. Yards not only provide amenity or outdoor living space for residents but act as a buffer between public and private space - they also provide a means of passive surveillance of public and communal open spaces. Private spaces generally contained by taller solid fencing or vegetation should be located to the rear or the side, depending on site shape and orientation. M
  4. Where a building of three or more storeys is built to the street edge, consider setting back the upper storeys to maintain a human scale at ground level and increase privacy for upper storey units. M H
- MIXED USE**
5. Special consideration should be given in any mixed use development to the appearance of the ground floor and relationship with the street and pedestrian network. The façade should be visually interesting, preferably with a transparent appearance and contribute to creating an active street edge. M H

DIAGRAM 2 - GROUND FLOORS DESIGNED TO SUPPORT A HUMAN SCALE AT STREET LEVEL

- A Upper storeys are set back to reduce the perceived density on street level
- B Landscaping in between buildings increases an intimacy and creates a softer people oriented space

PHOTO 2 - ON STREET PARKING ALONG INTERNAL STREET (MILLBROOK, OTAGO)

PHOTO 3 - LANDSCAPING AND RAIN GARDENS IN CENTRALISED PARKING (PICTON)

#### Access & car parking

The location, type and design of pedestrian and vehicle access points can have a significant bearing on the streetscape, site layout and building façade design. Considering alternative modes of transport and maximising opportunities for cyclists (e.g. bicycle parking) can also help ease pressure on car parking.

Circulation networks should be legible and provide a safe environment for pedestrians and cyclists.

6. If on street parking is provided it should not conflict with active mode infrastructure (e.g. walking, cycling). On street parking reduces the number of footpath crossings, increases pedestrian safety, and enables available parking space to be flexibly used by a variety of users. M H
7. Provision of off street parking between buildings and the street is discouraged as it reduces the dominance and presence of individual dwellings and the overall visual coherence of the streetscape. M H
8. On site parking for medium density, high density or mixed use developments is encouraged to be below grade. Any parking provided above grade should be screened from the street view by evergreen planting. M H
9. Outdoor centralised parking should be landscaped to provide amenity, and be designed to offer safe and comfortable pedestrian routes. M H
10. Hard surface parking or large impermeable surface areas should be minimised to reduce visual dominance. M H
11. The use of landscaping is encouraged to prevent car parking dominating views from the street. M H
12. Pedestrian access should be differentiated from vehicle access through variation in surface treatment or texture. Preferably, pedestrian and vehicle access should also be separated by a buffer such as vegetation or a raised surface. M
13. Multi-unit developments on large or deep sites should preferably be accessed from new streets and lanes, rather than long driveways. The frontage of dwellings along internal streets should be treated in a similar fashion to frontage onto a public street. M H

DIAGRAM 3 - PROVIDE ON STREET CAR PARKING WHERE POSSIBLE

DIAGRAM 4 - ON SITE CAR PARKING INTEGRATED INTO DESIGN

- A On street car parking enables parking spaces to be re-used by different users
- B Clear separation in surface treatment between driveways and pedestrian access
- C Landscaping can be used to soften the outlook onto hard surfaces

14. Large building blocks should create pedestrian connections between streets where possible. A fine grained block pattern encourages more intensive pedestrian use and enables the development of comfortable and sheltered public open spaces or walking routes.

M H

15. Internal streets or rear lanes providing access to parking should be designed to be safe for active modes of transport (e.g. pedestrians, cyclists) and contribute to the amenity and attractiveness of the site. This can be achieved by incorporating landscape elements, bollards and variation in paving treatment into the design.

M H

MIXED USE

16. Pedestrian circulation should be given particular design consideration in any mixed use development, including provision of inviting and suitably sized gathering spaces.

M H

A D

Outdoor living & (communal) open space

Outdoor open space is an important consideration when designing intensive residential developments and should be considered early on in the design process to ensure it is an integral part of the development.

Higher densities often result in a reduction in the amount of outdoor space available to residents, influencing the sense of privacy and level of individual amenity experienced. Outdoor space allows residents to be able to enjoy a range of activities, express personal and creative identity around their property and, in the case of communal open space, provide for casual social interactions.

17. Where possible, provide good direct access from primary habitable living spaces (such as lounge or dining areas) to private or communal outdoor spaces (or outlook in the case of upper floor apartments). This adds to internal amenity and sense of space and encourages the use of available outdoor areas.

M H

DIAGRAM 5 - ENSURE THAT OUTDOOR OPEN SPACES ARE USABLE AND OF AN APPROPRIATE SIZE

- A Good access from indoor to outdoor, with integration of ramps into the design where necessary
- B Where possible link indoor inhabitable spaces with outdoor space
- C Practical dimensions that allow for recreation or seating

PHOTO 4 - COMMUNAL OUTDOOR SPACE (KUPE STREET HOUSES, AUCKLAND)

18. Consider using decks or balconies as outdoor living space where access to ground floor private open space is not possible. Taller developments are encouraged to consider use of the roof as communal outdoor open space, enabling increased access to available sunlight and views.
19. Outdoor spaces should offer privacy to users, and be orientated to maximise sunlight access that enables a comfortable outdoor environment that can be enjoyed throughout the year.
20. Allow outdoor space to be optimally used by carefully considering the dimensions and location of the space. Wide or square spaces (i.e. ones that allow for the placement of outdoor furniture) are more efficient than long and narrow spaces.
21. Include screening devices and strategic landscaping to increase privacy, limit outlook into adjacent private properties or prevent the space from being directly overlooked by neighbouring properties.
22. The size of any communal space should correspond to the number of residents it is intended to serve, be equally accessible to use by all units. It should also encourage opportunities for social interactions between users by incorporating seating, barbecue, sporting or play equipment into the design.

M H

M H

M H

M H

M H

PHOTO 5 - COURTYARD AS OUTDOOR OPEN SPACE FOR APARTMENT UNITS (BEAUMONT QUARTER, AUCKLAND)

DIAGRAM 6 - INCORPORATING STORMWATER MANAGEMENT

PHOTO 6 - RAIN GARDEN (ROLLESTON)

PHOTO 7 - PERMEABLE PAVING (WELLINGTON)

### Stormwater management

Stormwater is rain that runs off hard surfaces such as parking lots, driveways or rooftops and flows into stormwater drains or natural streams. Incorporating low impact stormwater measures into the design reduces the potential for this runoff to be contaminated and reduces the pressure on Council owned stormwater infrastructure during peak stormwater discharges.

Best practice water management considers water sensitive urban design measures at all stages of the building process. Early consideration during the design phase can help to enhance their cost effectiveness.

In large scale subdivisions (e.g. greenfield) stormwater management is best dealt with at a catchment level.

- 23. Minimise the use of impermeable surfaces to manage and dispose of on-site stormwater. The use of permeable paving in locations such as parking spaces/areas is encouraged.
- 24. Where possible, consider the use of swales, green roofs or rain gardens to collect, treat or reduce stormwater.

### Storage, waste & service areas

Integrating storage, waste and service areas into the overall site design can have a beneficial effect on the amenity and quality of a development. Considering how waste is managed, stored and collected, as well as the location of storage and service areas, helps to minimise visible clutter that could create lower standards of amenity and poorer impressions of an area.

- 25. Outdoor storage space should be provided that is proportionate to the size of the dwelling. Providing opportunities for outdoor storage of recreational and maintenance equipment and/or other large household items can increase the efficient utilisation of indoor storage space.

DIAGRAM 7 - SERVICE AREAS INCLUDED IN THE DESIGN

DIAGRAM 8 - SERVICE AREAS INCLUDED IN THE DESIGN

DIAGRAM 9 - SERVICE AND DELIVERY AREAS FOR MIXED USE  
PREFERABLY LOCATED AWAY FROM PEOPLE ORIENTED AREAS

- 26. Ensure that the location and size of storage, waste and service areas does not restrict onsite pedestrian movement or create potential health and/or safety risks. M H
  - 27. Integrate waste and personal storage areas into the building design and ensure that they are of a sufficient size relative to the number of units. Waste areas should be able to accommodate all waste bins and have a clear connection to the collection area. M H
  - 28. Position storage and service areas in locations that are obscured from public view. Storage in any areas set aside for car manoeuvring should also be discouraged. M H
  - 29. Areas set aside for wheeled bins or rubbish storage and collection should be integrated into the development in a way that is visually discrete and be located away from commonly used areas to prevent the impact of odour or leakage. On sites where access to the side or rear of a dwelling is limited, locating the rubbish storage area to the front of the site can provide a useful alternative provided visibility from the street is mitigated by appropriate landscaping or screening. M H
  - 30. Communal storage spaces should be accessible from common circulation spaces such as hallways or laundry rooms. M H
- MIXED USE**
- 31. Delivery and rubbish collection areas for commercial activities should preferably be located at the rear or side of the building, away from residential activities or pedestrian movements. M H

## 6.2 BUILT FORM & DESIGN

DIAGRAM 10 - BUILDING HEIGHT AND ROOFTYPES

PHOTO 9 - BREAK UP OF MASS THROUGH FACADE AND ROOF ARTICULATION (WALLACEVILLE, UPPER HUTT)

DIAGRAM 11 - BUILDING MASS FOR TALL BUILDINGS BROKEN DOWN INTO A 'BASE', 'MIDDLE', 'TOP'

F B S

### Building mass and height

Building height contributes to achieving more intensive residential development as it can enable more effective utilisation of a site while maintaining a low ecological footprint. A visually attractive design can help to mitigate any potential adverse effects arising as a result of building height and/or bulk.

32. Building mass/bulk and height should be designed to create visual interest and minimise physical dominance or potential shading or privacy effects on neighbouring properties. M H
33. Minimise the potential impact of building bulk by reducing the floor area of upper levels or stepping them back from the street. Building mass can also be visually reduced by introducing variation in façade treatment (for example, balconies, shading devices or porches) or the effective use of landscaping. M H
34. Reduce the effect of building mass by breaking the form of the building up into a 'base', a 'middle' and a 'top'. Setting back the upper storeys from the base helps to create a pedestrian scale at street level and also reduces wind turbulence at ground level. H
35. A varied roof form that is integrated with the design of the upper storey can further reduce the bulk and visual impact of the building and can provide a visually diverse building silhouette. M H  
*(Also refer guideline 55)*
36. To reduce visual monotony long linear or blank walls without windows, doors or associated design features should be avoided. Long continuous roof ridgelines are also discouraged. M H
37. Increasing building height on corner sites emphasises the corner and creates a focal point, providing visual interest that supports legibility and way finding without unduly affecting adjacent buildings. M H  
*(Also refer guideline 53)*

PHOTO 10 - PROVISION OF A CLEAR ENTRANCE AND BALCONY FRONTING THE STREET (NORTHWOOD, CHRISTCHURCH)

PHOTO 11 - DIFFERENCE IN ENTRANCE DESIGN BETWEEN RESIDENTIAL AND COMMERCIAL ACTIVITIES (PETONE, LOWER HUTT)

#### Building entrances & balconies

B D

The entrance to a building makes an important contribution to the way a building is experienced. Balconies and entrances provide visual interest by breaking up a façade; they also add a human scale to intensive residential developments and can positively contribute to the overall appearance of a building when designed well. Visible activity on the ground floor and street facing façade enhances public safety through passive surveillance and creates opportunities for social interaction.

Balconies also offer a good way of providing outdoor open space on a street facing façade and contribute to reducing the noticeable bulk effect of a building.

- 38. Where there are multiple dwellings on a site consider subtle variation to entrances (e.g. colour, design), or enable occupants to personalise in order to differentiate units and increase legibility. M
- 39. Ensure entrances (as well as address and letterbox) are clearly defined and visible from the street to enable them to be easily located and accessed. M H
- 40. Entrances that serve high density development should provide sufficient space for people to gather (e.g. small entry plaza) and include signage and landscape treatment that enhances the legibility of the entrance location. Indoor lobby spaces should have a clear visual and physical connection to the street. H
- 41. Entrances should be designed to provide all weather shelter (e.g. canopies or overhangs) with suitable lighting incorporated into the design. M H
- 42. Ensure privacy and weather protection are considered when providing any outdoor balcony space. M H
- 43. Provide screening where unit balconies adjoin to increase privacy. M H

44. Solid screening should be considered for any balconies large enough to be used for storage of bicycles and/or large items. M H

**MIXED USE**

45. Entries to any ground floor commercial activities should have a distinct appearance and designed in a way that differentiates them from entrances to residential units. M H

DIAGRAM 12 - GARAGE SET BACK FROM THE BUILDING FRONT

PHOTO 12 - CONSISTENT PATTERN OF GARAGES WITHOUT DISRUPTING PEDESTRIAN MOVEMENT ALONG THE FOOTPATH (HOBSONVILLE, AUCKLAND)

**Garages** F B  
 Garages should be sensitively integrated into any development as they can have a significant impact on its overall layout and design as well as on the associated streetscape.

46. Any garaging forming part of an overall development should be designed to be consistent with the style of the dwelling(s). M
47. Garages and carports should be set back from the front façade of any dwelling to minimise visual dominance and increase visibility of main pedestrian entries. Designing garaging that is narrow and visually recessive can also help to reduce the extent to which it dominates the associated dwelling. M
48. Where possible, garages, carports and associated driveways should: M
- a. reflect the rhythm and consistency of the street frontage
  - b. be located to minimise interruption of pedestrian movements along footpaths

PHOTO 14 - VARIATION IN COLOUR, ROOF TYPES AND MATERIALS (HOBSONVILLE, AUCKLAND)

PHOTO 13 - CHOICE OF MATERIALS AS AN INTEGRAL PART OF THE DESIGN (WHITEMANS VALLEY, UPPER HUTT)

PHOTO 15 - PONSONBY, AUCKLAND  
DIFFERENCE IN TREATMENT OF GROUND LEVEL AND UPPER STOREYS IN RESPONSE TO PEDESTRIAN SCALE

PHOTO 16 - PETONE, LOWER HUTT

B A D

**Building design & materials**

Building design and use of materials make an important contribution to the effective integration of intensive residential development into an existing street environment.

The main factors that influence the appearance of a building are scale, modulation and the articulation of its form and façade. The choice of materials used can also affect the appearance of a development, how well it performs and endures over time and its ongoing sustainability and resilience.

- 49. The design, type and location of the building on a site, as well as the choice of materials used, should recognise and reflect the level of intensification planned for the surrounding area. In relation to the surrounding environment, consideration should be given to:
  - a. setback from the street;
  - b. scale and bulk;
  - c. roofline;
  - d. complementary materials and colours;
  - e. planting; and
  - f. presence of heritage.
- 50. Building features and elements should be integrated and considered as part of a single, coherent design. This includes elements such as roofline, articulation of the façade (including balconies and frequency of windows and doors), maintenance systems and service spaces.
- 51. Consider lighting and signage elements as an integral part of the design early in the design process.
- 52. Consider views of the rear and side façades of the building, particularly where there is a transition to a lower density environment.
- 53. Consider increasing the visual prominence of buildings on corner sites through the use of different materials, colours or roofline.

M H  
M H  
M H  
M H  
M H

(Also refer guideline 37)

PHOTO 17 - ROOF FORM INTEGRATED WITHIN THE DESIGN OF THE TOP STOREY

54. Use robust materials that are easy to maintain and retain their long term appearance. This is particularly important in areas that are prone to increased wear such as communal spaces.

M H

55. Rooflines can have a significant impact on the composition of a building and can provide variety and a sense of identity when applied to a row of dwellings. The roof form (pitched, flat or a combination) should complement the existing or emerging character of the surrounding area.

M H

M H

(Also refer guideline 35)

**MIXED USE**

56. Where a mix of uses are proposed, the ground level treatment and appearance of the building should respond to the physical context at street level and positively contribute to the pedestrian experience.

DIAGRAM 13 - LEGIBLE ENTRANCE AND BALCONIES CONTRIBUTE TO ATTRACTIVE BUILDING DESIGN

DIAGRAM 14 - REDUCE BULK BY ADDING VARIETY TO THE ROOFLINE

DIAGRAM 15 - VARIATION IN BUILDING SIZE AND TYPE

PHOTO 18 - PROVISION OF A RANGE OF BUILDING SIZES AND TYPES CATERING TO A VARIETY OF DIFFERENT LIFESTYLES (DELAINE, CHRISTCHURCH)

F B D

#### Building diversity

Providing diversity of dwelling type and size offers increased accommodation choice catering to a variety of needs ranging from income level and household size through to demographic and cultural requirements. Units that appeal to a broad range of ages and stages are also more likely to withstand significant changes in the market.

Additionally, diversity provides improved opportunities for existing residents to move within their local community as and when their housing needs and requirements change.

The development of apartments or multi-unit housing can be an effective way of achieving higher density while retaining sufficient space for outdoor use, particularly on sites with size constraints.

57. Dwelling and unit sizes should be carefully considered and suit the context. Where possible, a range of dwelling or unit sizes should be considered (providing a variety in number of rooms or housing typologies) to cater for a variety of financial, demographic or accommodation needs.

M

58. Consider developing buildings that are adaptable and that can be flexibly used or reconfigured over time without the need for major change.

M H

### 6.3 AMENITY & SUSTAINABILITY

DIAGRAM 16 - LANDSCAPING USED TO SOFTEN HARD EDGES AND IMPROVE OUTLOOK

PHOTO 19 - APPROPRIATE LANDSCAPING CAN HELP TO MITIGATE NEGATIVE EFFECTS OF FENCING OR BLANK WALLS (REGENT PARK, WELLINGTON)

A D S

#### Landscape treatment

Landscape design can greatly improve the amenity, experience and integration of intensive residential development into a street or neighbourhood. The implementation of carefully considered landscape design can help to enhance different design elements, such as the screening or softening of hardstanding areas (driveways, parking, services areas), mitigate the effects of building bulk and offer amenity and environmental benefits.

Coordinating landscaping early in the building and site design process can increase opportunities to more effectively integrate landscape treatment into outdoor open space, traffic circulation routes, service locations and the interface between the public and private domain.

- 59. Where possible, existing mature and healthy vegetation should be retained and integrated into the site development. M H
- 60. Use planting to improve the outlook from dwellings and the street and to soften hard surface areas such as car parks, service areas or along internal site boundaries and driveways/shared accessways. M H
- 61. Use hedges or climbing plants where space is constrained and larger vegetation where sufficient space and access to rainwater is available. M H
- 62. Choose plants that are appropriate to the climatic conditions and character of the area; planting species that require low maintenance and attract local bird life is also encouraged. M H
- 63. Deciduous trees provide shade in summer and light in winter, but careful consideration should be given to species selection in heavily shaded areas to ensure survivability. M H
- 64. Use of hard landscape elements such as low walls, kerbs or raised beds is encouraged as these can provide protection to plants and, where integrated into the site design, can add to the visual amenity of outdoor spaces. M H

DIAGRAM 17 - ORIENTATION TO MAXIMISE SUNLIGHT ACCESS

- A Ideal orientation along an east-west axis with living areas facing north
- B Small and/or high level windows in service or storage spaces, ideally facing south
- C Narrow buildings benefit from tall windows in north facing façades for optimal sunlight penetration

DIAGRAM 18 - HIGH LEVEL WINDOWS, SKYLIGHTS AND/OR ATRIUMS CAN IMPROVE SUNLIGHT PENETRATIONS

B A S

### Sunlight access

Adequate access to natural light is an important consideration in designing the layout of a site, particularly any opportunities to capitalise on a northern aspect.

It is also a key consideration in siting and designing the internal layout of associated dwellings as it not only provides a warm and pleasant internal living environment but helps to increase energy efficiency.

- 65. Design dwellings with habitable spaces facing north, west or east to maximise sunlight access. M H
- 66. Buildings that are relatively deep and narrow, or that have limited north facing frontage, benefit from larger floor-to-ceiling heights; where this occurs consider the use of taller windows to ensure deeper sunlight penetration. M H
- 67. On narrow sites place balconies and windows in habitable spaces to the front or the rear of the building to allow for daylight access, outlook and privacy. M H
- 68. Consider the use of skylights, atriums or light wells to provide sunlight access to internal spaces with no external walls. M H
- 69. In order to maintain sunlight access, high level windows or louvres should be considered where privacy is an issue or to restrict views of service or storage areas; however, their use should be minimised in façades that face the street or public areas. M H

DIAGRAM 19 - SUNLIGHT ACCESS, EAVES AND INTERNAL VENTILATION

- A Large windows on the sunny side, smaller windows on the side that gets the least sun hours
- B Eaves blocking sunlight in the summer while allowing sunlight access in winter months
- C Windows in opposite sides of the building allow for natural ventilation

PHOTO 20 - OVERHANGING BALCONIES PROVIDE SHADE IN SUMMER (CLEARWATER GOLD RESORT, CHRISTCHURCH)

**Energy efficiency**

An energy efficient home promotes sustainable living, limits the impact on the environment by relying on sustainable energy sources and can produce long term cost savings to residents.

Integrating efficient passive design into a building contributes to a more comfortable indoor environment by increasing the thermal stability, reducing indoor condensation and promoting natural ventilation; it also helps reduce energy usage.

Energy efficiency should be considered during all phases of development, from planning and design (e.g. internal layout and building systems) through to construction (e.g. minimising waste) and long term maintenance (e.g. using durable materials).

- 70. Where possible, site long buildings on an east-west axis, with living areas orientated to the north to optimise solar access. M
- 71. Consider locating opening windows on opposite sides of a dwelling to enable natural cross ventilation; the total window surface on south facing façades should also be limited to prevent heat loss in winter. M
- 72. Use of eaves is encouraged as they can help limit the duration of sunlight penetration in summer, preventing indoor spaces (particularly those with a northern aspect) from becoming too warm. M
- 73. When designing large scale developments, consider installing a communal (solar) hot water heating facility as it has the potential to offer greater efficiencies compared to heating sources in individual units. M H

PHOTO 21- AMBERLEY GARDENS, SILVERSTREAM

DIAGRAM 20 - BALANCE PRIVACY AND NATURAL SURVEILLANCE

- A** Prevent placing windows immediately opposite windows in a neighbouring property
- B** Living areas with large windows in the front of the building to provide for natural surveillance
- C** Soft landscaping or porous fencing to create natural surveillance while retaining privacy

### Privacy and safety

The orientation of dwellings and their interface with public and communal open spaces are important safety and privacy considerations. In designing for safety and privacy, adequate account needs to be taken of the relationship of new and adjoining buildings to ensure a successful balance is achieved between protecting private amenity and providing opportunities for passive surveillance.

- 74. Where possible, locate habitable spaces (e.g. kitchen, dining or lounge) in multi-unit developments to face the street or an adjoining open space as this will enable passive surveillance of these areas while maintaining privacy in main living spaces. M
- 75. Solid, blank walls facing any public open space or pedestrian pathways should be avoided. M H
- 76. Where possible, orientate windows to public spaces to provide for passive surveillance; privacy between dwellings can be maintained by screening upper level windows or balconies to limit opportunities for residents to directly overlook adjacent properties. M H
- 77. Consider staggering façades relative to each other to limit direct views into adjoining habitable rooms. M H
- 78. Consider a larger setback between taller buildings to improve privacy for residents (and also to contribute to daylight access and outlook). M H
- 79. Locate habitable spaces that are more sensitive to privacy issues (e.g. bedrooms) to the front or the rear of buildings on narrow sites. M H
- 80. Use soft landscape elements and visually permeable materials to achieve an appropriate balance between maintaining privacy and enabling passive surveillance. M H

PHOTO 22 - STAGGERED BALCONIES MAXIMISE PRIVACY WHILE RETAINING OUTLOOK AND SUNLIGHT ACCESS (WELLINGTON)

81. Clearly delineate boundaries between private, communal and public spaces as this increases user perceptions of safety and helps to identify intruders.

M H

82. Use lighting, planting and fencing to enhance the safety of residents and visitors and incorporate these elements into the design process; also consider low level planting or trees with higher canopies to minimise the risk of light sources becoming obscured by landscape elements, particularly around sensitive areas.

M H

83. Elevating dwelling floors, patios and decks slightly above the street level for buildings that have no or minimal setback can provide privacy to residents while maintaining outlook onto the street.

M H

84. Strategically locate communal open space to encourage passive surveillance within the development and of adjoining sites.

M H

DRAFT

## 5 DESIGN ELEMENTS

### 6.1 SITE LAYOUT

DIAGRAM 1 - FRONTAGE AND BUILDING ORIENTATION

- A Dwellings should have a clear frontage that addresses the street/public space along with a clear area to the rear
- B A clear delineation between private and public space
- C Front yard acts as a buffer between private and public space
- D Access directly from the street with a visible house number and letter box

PHOTO 1 - AMBERLEY GARDENS (SILVERSTREAM, UPPER HUTT)

F B D S

#### Setback & frontage

The configuration of a development on a site and its relation to adjoining public space is an important consideration to ensure good amenity and reduce overshadowing and privacy effects on adjoining sites. Having a defined front and back, as well as a clear delineation between public, semi-public and private spaces contributes to the legibility of the site and street.

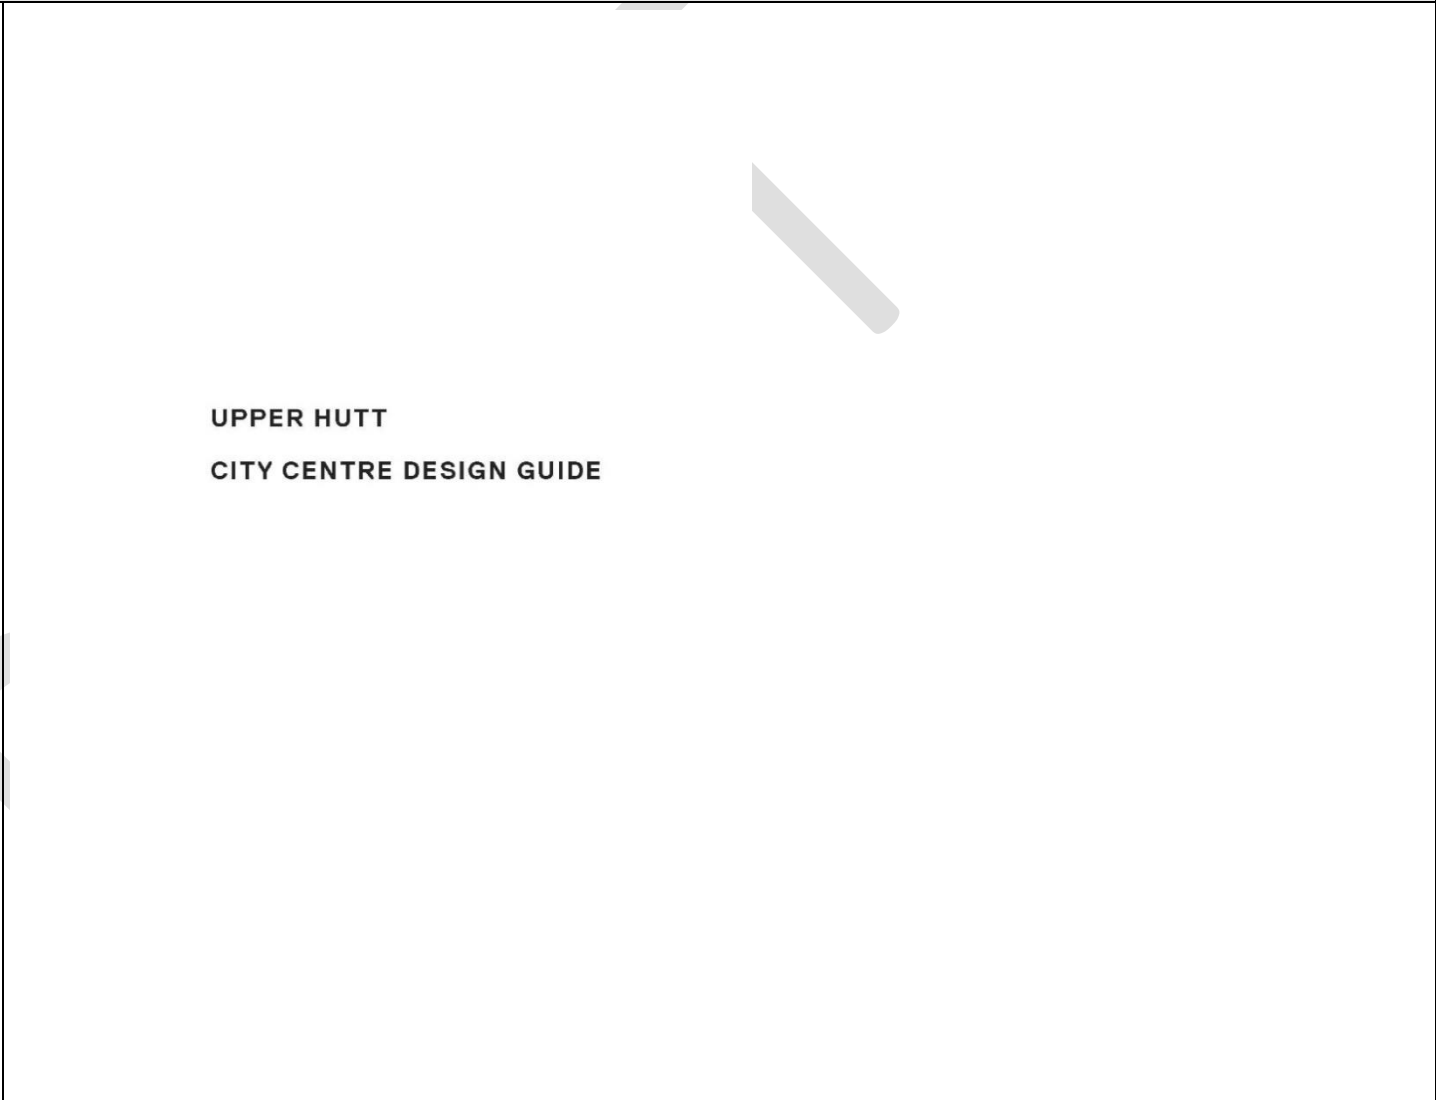

The setback and frontage of a building also contribute to a socially active and safe environment, while the front yard provides additional amenity for residents and a setting for the dwelling.

1. Where possible, buildings should be orientated with the front of the dwelling(s) facing the street or public space. M H
  2. Where possible, dwellings should be configured so that there are habitable spaces located at the front of the building, with ground and upper storey windows or balconies providing an outlook that enables passive surveillance. M H
  3. Public, semi-public and private spaces should be clearly defined and front yards kept to a minimum. Yards not only provide amenity or outdoor living space for residents but act as a buffer between public and private space - they also provide a means of passive surveillance of public and communal open spaces. Private spaces generally contained by taller solid fencing or vegetation should be located to the rear or the side, depending on site shape and orientation. M
  4. Where a building of three or more storeys is built to the street edge, consider setting back the upper storeys to maintain a human scale at ground level and increase privacy for upper storey units. M H
- MIXED USE**
5. Special consideration should be given in any mixed use development to the appearance of the ground floor and relationship with the street and pedestrian network. The façade should be visually interesting, preferably with a transparent appearance and contribute to creating an active street edge. M H

# 1 | PURPOSE

The purpose of this guide is to support the interpretation and application of the urban design provisions relating to the City Centre Zone of the Upper Hutt District Plan. It provides urban design guidance to inform the design of new, high quality development that responds to the Upper Hutt context. An emphasis is placed on how buildings and spaces respond to an anticipated transformation in density and contribute to enhancing the vibrancy and welcoming nature of the City Centre.

## Who is it for?

The guide applies to anyone involved in the design and construction of development in the City Centre Zone, including architects, designers, developers and property owners. It will also be used by Upper Hutt City Council staff to assess new development proposals in the City Centre Zone to ensure that they are responsive to the local context and result in buildings and associated spaces that are liveable and attractive.

## Why?

With a heightened emphasis on higher density development to meet the city's future growth needs, ensuring that good quality design outcomes are also delivered becomes increasingly important. As Upper Hutt continues to change and adapt to cater for these needs it is critical that the potential visual, privacy and/or amenity impacts of larger scale development are properly managed.

*Potential for residential development at the ground level only in areas that have not identified active frontages in the planning maps*

*Non-residential activity at ground level with active street edge.*

*Potential for residential development at the ground level only in areas that have not identified active frontages in the planning maps*

## 2 | DESIGN GUIDE STRUCTURE

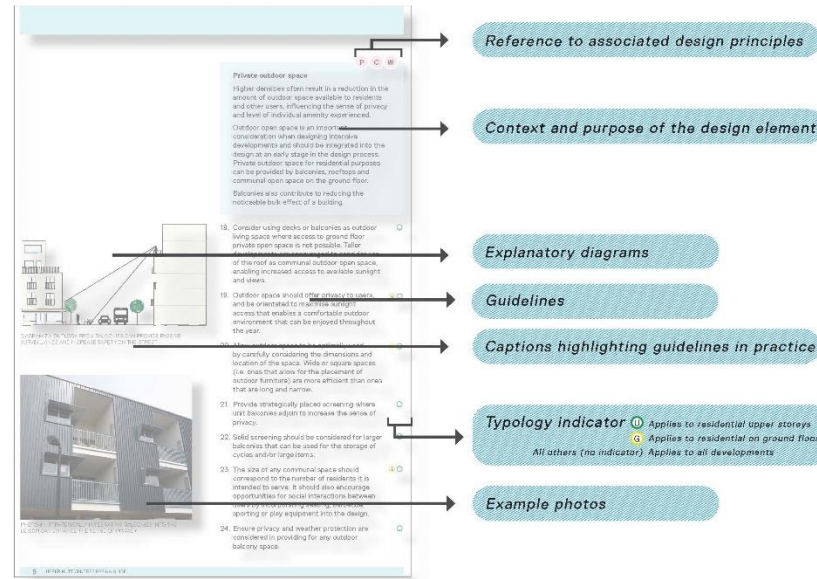

The guide does not prescribe development requirements but instead supports and complements the design outcomes sought for city centre development in the Upper Hutt District Plan (e.g. form and appearance, amenity). It outlines the key features that characterise centres development and offers practical advice to guide such development using best practice principles and relevant examples.

The guide uses supporting photographic examples and indicative diagrammatic interpretations to communicate the desired outcomes that are sought by a series of associated Design Principles (see page 4).

Key design considerations are divided into fourteen design elements that can be grouped into three themes as follows:

The guidelines apply to any area that is defined as City Centre Zone in the Upper Hutt District Plan. As the guidelines are based on a relatively universal set of urban design principles, most are applicable to centres development at a variety of scales.

- » **Site Layout** covers design elements that are related to the effects of development at a site scale.
- » **Built Form & Appearance** covers elements related to the appropriateness of the building design.
- » **Street level** covers elements that contribute to the way the development interacts with the public domain at street level.

### 3 DESIGN PRINCIPLES

How we design our buildings and the relationship they have with the street and public space within the Upper Hutt city centre has a considerable bearing on the way we live, work and meet. The following design principles have been developed to encourage high quality design that contributes to transforming the future character of the city centre and provides an attractive and comfortable environment for users, residents and visitors alike.

P

#### CREATE A FOCAL POINT FOR COMMUNITY

- » Promote the city centre as a vibrant economic destination of employment and retail activity
- » Provide quality civic spaces that enable a wide range of residents and visitors to participate in the city's activity

C

#### PROVIDE CONNECTIVITY AND ACCESS

- » Create an accessible city centre, utilising principles of universal design that cater to all age groups and degrees of mobility
- » Encourage multi-modal transport options that prioritise connectivity to the train station adjacent to the city centre
- » Enable efficient pedestrian connectivity within the City Centre Zone and to the local surroundings
- » Create a legible and identifiable network of streets and lanes with clear wayfinding

F

#### PREPARE FOR THE FUTURE

- » Enable buildings to be adapted to accommodate a diverse use over time
- » Design innovative buildings that use sustainable and passive building materials and that transform the future character of the city centre
- » Ensure building orientation enables appropriate access to sunlight and outlook while providing attractive indoor and outdoor spaces
- » Integrate new buildings into the existing environment as the city undergoes its transformative stages
- » Create a city centre that is resilient and able to positively respond to changing intensification and environmental conditions

W

#### BE WELCOMING AND COMFORTABLE

- » Encourage design that supports safe and inclusive streets and laneways
- » Celebrate the city's diverse cultural identity through public art and building design in the city centre
- » Design public spaces that are attractive and comfortable by responding to climatic conditions, and maximising sun access while providing shade and shelter from the wind and rain
- » Contribute to a quality street environment that considers the human scale and prioritises pedestrian movement

A

#### ACTIVATE THE STREET

- » Provide public and open spaces that are inviting to residents and visitors alike
- » Create interesting and attractive streetscapes which provide visual interest
- » Respond to a street hierarchy that rationalises different traffic flows through the city centre
- » Ensure street edges, including associated building frontages and footpaths, are activated and encourage social interaction
- » Use setbacks and street edges to define open spaces

## 4 DESIGN ELEMENTS

### 4.1 SITE LAYOUT

PHOTO 1 - BUILDINGS TO STREET EDGE WITH CLEARLY DELINEATED MID-BLOCK CONNECTIONS, WEST END CHRISTCHURCH

DIAGRAM 1 - CREATE ACTIVE EDGES ALONG STREETS AND (NEW) MID-BLOCK CONNECTIONS TO ENCOURAGE VIBRANCY AND SAFETY

DIAGRAM 2 - A SETBACK CAN BE USED AS GATHERING SPACE IN FRONT OF THE ENTRANCE WHERE APPLICABLE (E.G. BUILDINGS WITH A CIVIC PURPOSE)

C F W A

#### Siting and alignment

The configuration of a building on a site and its relationship to the street and adjoining public space are important considerations to ensure good amenity. Having a defined front and back, as well as a clear delineation between public, semi-public and private spaces contributes to the legibility of the site and street.

An active frontage of a building also contributes to a socially active and safe environment and provides amenity for visitors and residents.

1. Consider the placement, orientation and form of the building to ensure it fits within the general pattern and network of the City Centre Zone and contributes to the legibility, permeability and functionality of the wider block structure.
2. Buildings should align with, and be orientated towards, any street, footpath or public space and contribute to the general continuity of frontage along the street.
3. The appearance of the ground floor should reinforce the relationship between the building with the street and pedestrian network. The façade should be visually interesting, preferably with a transparent appearance and contribute to encouraging activity along the street edge.
4. Use setbacks to create open space where applicable, particularly adjacent to buildings that perform a civic purpose (e.g. museums, educational facilities, libraries, community halls etc).
5. Open space should only be provided where it serves a clear public purpose to ensure that spaces contribute to the centre's environment in a positive way.

PHOTO 2 - MID-BLOCK CONNECTION WITH ACTIVE FRONTAGES, CHRISTCHURCH

DIAGRAM 3 - ENABLE MID-BLOCK LINKS TO CONNECT WITH THE WIDER TRAFFIC AND OPEN SPACE NETWORK

DIAGRAM 4 - PEDESTRIAN CONNECTIONS CAN CONNECT THE SHOPPING STREET WITH ADJACENT (PARKING) AREAS

P C F A

### Connectivity

A connected network can reduce travel times and contribute to attractive, safe and legible environments that cater for people of all ages and mobilities.

Considering a good pedestrian and cycling experience in the design process can help to create safe, attractive and healthy communities.

Circulation networks should be legible and provide a safe environment for pedestrians and cyclists alike.

6. Extend and enhance existing pedestrian connections such as Centre Walk, and create new mid-block links where they enhance the connection with the wider pedestrian and open space network.
7. Reduce the scale of blocks where possible by providing new streets, mid-block connections, footpaths, courtyards, and plazas that connect with neighbouring streets and public or common open space areas.
8. Where appropriate, along identified frontages activate the frontages on mid-block connections with entrances and display windows to create safe and comfortable pedestrian environments.
9. Locate bicycle parking close to building entrances and open space at grade, especially when combined with amenities like bike repair/sales or other complementary commercial activities. Promoting cycle use reduces the need for vehicle parking, and promotes active street life.
10. Ensure that developments allow for sufficient space and seating around transit stops to encourage the use of public transport.

DIAGRAM 6 - CREATE ACTIVE EDGES ALONG STREETS AND (NEW) MID-BLOCK CONNECTIONS TO ENCOURAGE VIBRANCY AND SAFETY

PHOTO 3 - CAR PARKING INTEGRATED INTO THE LANDSCAPE DESIGN OF THE PUBLIC REALM, WEST END CHRISTCHURCH

DIAGRAM 5 - SERVICE AND DELIVERY AREAS FOR MIXED USE PREFERABLY LOCATED AWAY FROM PEOPLE ORIENTED AREAS

C F A

#### Car parking, storage and servicing

Integrating car parking, storage, waste and service areas into the overall site design can have a beneficial effect on the amenity and quality of a development. Considering how waste is managed, stored and collected, as well as the location of storage and service areas, including areas that are dedicated to loading and unloading, can help to minimise visible clutter and result in higher levels of amenity and improved impressions of an area.

Considering alternative modes of transport and maximising opportunities for cyclists (e.g. cycle parking) can help ease pressure on car parking.

11. If on street parking is provided, care should be taken to ensure it does not conflict with active mode infrastructure (e.g. walking, cycling). On street parking or larger centralised off-street parking areas reduce the number of footpath crossings, increase pedestrian safety, and enable available parking space to be flexibly used by a variety of users.
12. On site parking for high density or mixed use development is encouraged to be below grade or positioned away from the street frontage (e.g. to be accessed by service lanes such as Bradley Lane). Any parking provided above grade should be screened from the street or public open space by evergreen planting.
13. Outdoor centralised parking should be landscaped to provide amenity, and be designed to offer safe and comfortable pedestrian access.
14. Car parking and loading or service areas should not impede access to adjacent buildings or compromise the quality and continuity of the street edge.
15. Integrate waste and storage areas into the building design and ensure that they are of a sufficient size relative to the number of units serviced. Waste areas should be able to accommodate all waste bins and have a clear connection to the collection area.
16. Delivery and rubbish collection areas should preferably be located at the rear or side of the building and away from pedestrian environments or residential activities.
17. Where loading docks or similar utilitarian built features are required, consider making provision for them to be adapted for alternative purposes (e.g. for seating or events, or as outdoor workspace).

DIAGRAM 7 - OUTLOOK FROM BALCONIES CAN PROVIDE PASSIVE SURVEILLANCE AND INCREASE SAFETY ON THE STREET

PHOTO 4 - STRATEGICALLY INTEGRATING BALCONIES INTO THE DESIGN CAN ENHANCE THE SENSE OF PRIVACY

### Balconies

Higher densities often result in a reduction in the amount of outdoor space available to residents and other users, influencing the sense of privacy and level of individual amenity experienced.

Balconies and rooftops are an important consideration when designing intensive development and should be integrated into the design at an early stage in the design process.

Balconies also contribute to reducing the noticeable bulk effect of a building.

- 18. Consider using decks or balconies as outdoor living space where access to ground floor private open space is not possible. Taller developments are encouraged to consider use of the roof as communal outdoor open space, enabling increased access to available sunlight and views. D
- 19. Balconies should offer privacy and weather protection to users, and be orientated to maximise sunlight access that enables a comfortable outdoor environment. G D
- 20. Provide strategically placed screening where unit balconies adjoin to increase the sense of privacy. D
- 21. Solid screening should be considered for larger balconies that can be used for the storage of cycles and/or large items. D

## 4.2 BUILT FORM & APPEARANCE

PHOTO 6 - BULK OF THE BUILDINGS BROKEN DOWN BY A BOTTOM, MIDDLE AND TOP, CHRISTCHURCH.

DIAGRAM 8 - BUILDING MASS FOR TALL BUILDINGS BROKEN DOWN INTO A 'BASE', 'MIDDLE', 'TOP'

DIAGRAM 9 - VARIATION IN FACADE TREATMENT CAN VISUALLY BREAK DOWN BULK

F W A

### Bulk and form

The development pattern in the Upper Hutt City Centre generally consists of narrow lots which, when redeveloped, are likely to encourage development with a predominantly vertically oriented built form. To reduce the bulk of tall buildings, an increased focus should be directed towards horizontally composed design with strong base - this will help to achieve a human scale at street level.

A building that relates to the Centre's fabric, to its immediate context, and adjacent human activity will help to unify the character of the area. The relationship between lower density areas and those with higher, large-scaled buildings can be more harmonious if the transition in building height and mass between these areas is intentionally managed in a sensitive manner.

22. Minimise the potential impact of building bulk by either reducing the floor area of upper levels or stepping them back from the street to maintain a human scale at ground level and increase the privacy of upper storey units.
23. Building mass can also be visually reduced by introducing variation in façade treatment (e.g. by balconies, shading devices or porches) or the effective use of landscaping.
24. Building mass and height should be designed to create visual interest and minimise physical dominance on public space.
25. Reduce the effect of building mass by visually breaking the form of the building up into a 'base', a 'middle' and a 'top'. This helps to create a pedestrian scale at street level and also reduces the extent of ground level wind turbulence.
26. Positively reinforce the shape of the street or public space with the building through designing it in a way that helps to define the street and frame views.

DIAGRAM 10 - VIEWS OF ALL SIDES OF THE BUILDING NEED TO BE CONSIDERED

P W A

#### Visual interest and façade modulation

The main factors that influence the appearance of a building are scale, modulation and the articulation of its form and façade.

Façades composed of long expanses of monotonous surfaces create streetscapes that lack the sense of scale, visual interest, and character. Façades designed as three-dimensional ensembles create frontages that can be engaging and can enhance the experience of the pedestrian and road users.

Manipulation of light and shadow in the façade can make the scale of a building and its associated components appear more vivid.

Additionally, balconies and entrances provide visual interest by breaking up a façade and add a human scale to more intensive development - this positively contributes to the overall appearance of a building when designed well. Visible activity on the ground floor and street facing façade enhances public safety through passive surveillance and creates opportunities for social interaction.

27. Avoid large expanses of undifferentiated blank surfaces. Relying solely on changes in colour or materials within the same plane rarely achieves sufficient levels of interest and articulation.
28. Where applicable, signage should be integrated into the overall design of the building and be of a size that is appropriate to the receiving environment and scale of the streetscape and building façade.
29. Consider views of the rear and side façades of the building, particularly where there is a transition to a lower density environment. The design of all visible façades should be given a similar degree of considerations as that applied to the primary façade.
30. Solid, blank walls facing any public open space, pedestrian pathways, residential or recreation zones should be avoided.
31. The design of building façades should respect neighbouring window and entrance patterns, including their type, proportions, scale, and frequency.

DIAGRAM 11 - VARIATION IN COLOURS, SCALE, PLACEMENT OF WINDOWS, ROOFLINES ETC CAN ENHANCE VISUAL INTEREST

PHOTO 7 - SIGNAGE SHOULD BE INTEGRATED AS PART OF A COHERENT DESIGN, HAWERA & PICTON

#### Building design and materials

P F

The building design and use of materials make an important contribution to the effective integration of intensive development into an existing environment.

The choice of materials used can affect the appearance of a development and how it contributes to the public realm. It can also affect how it performs and endures over time as well as its ongoing sustainability and resilience.

A visually attractive design can help to mitigate any potential adverse effects resulting from building height and/or bulk and enhance the city centre experience of visitors and residents alike.

32. The design of the building, as well as the choice of materials used, should recognise and reflect the level of intensification planned in the immediate and surrounding areas. In particular, consideration should be given to:
  - a. setback from the street / continuity along the street edge;
  - b. building age and style;
  - c. scale and bulk;
  - d. roofline;
  - e. placement of windows, entrances and other articulation in the façade.
33. Building features and elements should be integrated and considered as part of a single, coherent design. This includes elements such as façade modulation and articulation, with this also encompassing balconies and frequency of windows and doors. Variation of colour or materials in the same plane generally offers an insufficient means of adding visual interest.
34. Consider lighting and signage elements as an integral part of the design early in the design process. Lighting should reinforce pedestrian comfort at ground level but, in any residential context, should be designed to ensure neighbours are not disturbed.
35. Buildings should be designed to accommodate a range of uses and to enable change in use over time (e.g. by providing generous ceiling heights).
36. Use design opportunities to create distinctive points of identity along the street front to enhance wayfinding and promote the uniqueness of the Upper Hutt city centre.

PHOTO 8 - ROOF FORM INTEGRATED WITHIN THE DESIGN OF THE TOP STOREY, WELLINGTON

DIAGRAM 12 - REDUCE BULK BY ADDING VARIETY TO THE ROOFLINE

F W

#### Building top design

Viewed from the surrounding hills, the rooflines of the City Centre buildings are a highly visual element.

As the roofline of a building has a significant impact on its composition, when viewed across a number of buildings they collectively make a noticeable contribution to the variety and sense of identity of an area.

The shape that building roofs make with the sky can positively shape the city's skyline and reinforce the building's design intent. Roofs may also provide amenities such as common or private open space.

37. Consider integrating a varied roof form in the design of upper storeys as this can further reduce the bulk and visual impact of the building and provide a visually diverse building silhouette.
38. The roofline, as well as any rooftop maintenance systems and services spaces, should be integrated as part of a single, coherent design.
39. Encourage the use of roofs and walls to generate renewable energy (e.g. solar panels) and/or provide habitat-supportive vegetation.

PHOTO 9 - STAGGERED BALCONIES MAXIMISE PRIVACY WHILE RETAINING OUTLOOK AND SUNLIGHT ACCESS (WELLINGTON)

F W

#### Privacy, daylight and outlook

Adequate access to natural light is an important consideration in designing the layout of a site, particularly any opportunities to capitalise on a northern aspect.

It is also a key consideration in siting and designing the internal layout of buildings and any associated residential units as it not only provides a warm and pleasant internal living environment but helps to increase energy efficiency.

The orientation of dwellings and their interface with public and communal open space are important safety and privacy considerations. In designing for safety and privacy, adequate account needs to be taken of the relationship of new and adjoining buildings to ensure a successful balance is achieved between protecting private amenity and providing opportunities for passive surveillance.

40. Where privacy and overlooking is an issue, either high level windows or louvres should be considered to minimise direct views into sensitive areas. However, their use on façades that face the street or public areas should be minimised.
41. Where possible, orientate windows to public space to enable for passive surveillance.
42. Maintain privacy between upper storey units by screening upper level windows or balconies to limit opportunities for residents to directly overlook adjacent properties.
43. Consider incorporating a staggered façade profile into the building design to limit direct views into adjoining rooms or balconies.
44. Where residential units are provided on the ground floor, elevate dwelling floors, patios and decks slightly above the street level to provide privacy to residents while maintaining outlook onto the street.
45. Ensure living and working environments receive sufficient sunlight to connect people to the natural cycle of day and night and promote reduction in energy use.

U

U

G

DIAGRAM 13 - HIGH LEVEL WINDOWS, SKYLIGHTS AND/OR ATRIUMS CAN IMPROVE SUNLIGHT PENETRATIONS

PHOTO 10 - VERANDAHS TO PROVIDE SHELTER, CHRISTCHURCH

#### Wind and sunlight

P W A

Using natural resources like wind and sunlight can enhance the energy efficiency of a building and limits its impact on the environment through increased reliance on sustainable energy sources. This can also produce long term cost savings to occupants.

Integrating efficient passive design into a building contributes to a more comfortable indoor environment by increasing thermal stability and reducing indoor condensation.

While wind effects can be used for natural ventilation and energy generation, it can also potentially create downdrafts that can compromise the safety and comfort of the public realm.

46. Use solar exposure and local wind patterns to capitalise on natural forms of heating and ventilation and reduce the need for mechanical systems.
47. Consider the use of eaves or strategic screening to help limit the duration of sunlight penetration in summer, thus preventing indoor spaces (particularly those with a northern aspect) from overheating.
48. Design the mass of buildings to minimise shadow impacts on adjoining lower density residential areas, parks, and open space.
49. Modify tall buildings to minimise wind impacts at the street levels or provide strategic shelter as an integrated part of the design to mitigate any potential negative effects of downdraft at street level.

## 4.3 STREET LEVEL

P F W A

### Street frontage

Buildings that provide an active and transparent interface between their interior uses and the street, public open space or laneway create an engaging and safe environment through natural surveillance. Visible ground floor retail combined with a variable street edge with setbacks and lobby entrances contribute to an attractive human scale street experience.

DIAGRAM 14 - GROUND FLOORS DESIGNED TO SUPPORT A HUMAN SCALE AT STREET LEVEL

- A Upper storeys are set back to reduce the perceived density on street level
- B Landscaping in between buildings increases an intimacy and creates a softer people oriented space

PHOTO 11 - PONSONBY, AUCKLAND

PHOTO 12 - PETONE, LOWER HUTT

DIFFERENCE IN TREATMENT OF GROUND LEVEL AND UPPER STOREYS IN RESPONSE TO PEDESTRIAN SCALE

50. Design all public building frontages to enable active and direct engagement with the street that supports pedestrian-oriented activity. Also consider the width of the footpath and the relationship between the anticipated use of the building and the footpath when designing the articulation of the street front.
51. Aim to activate the street frontage to the full width of the site; this will benefit optimal activation of the street edge and ground floor area.
52. The ground level treatment and appearance of the building should respond to the physical context at street level and positively contribute to the pedestrian experience.
53. Use lighting to enhance safety on the street frontage and incorporate these elements into the design process; when planting is a part of the design, minimise the risk of light sources becoming obscured by landscape elements, particularly around sensitive areas.
54. Where a forecourt or front setback is proposed ensure it is designed as an inviting spatial transitional element between the building frontage and the street environment.
55. Where residential activity is planned at ground level, provide an appropriate transition space between street and footpath to create an element of privacy (also refer Upper Hutt Residential Design Guide). Also minimise the height and opacity of front screens, fences, railings and gates to allow for natural surveillance.
56. Minimise frontages devoted to utilities, storage, services and parking access, and integrate with the overall articulation and fenestration of the façade. Where possible, locate rubbish areas below grade or to the rear of the building, and combine loading with vehicular access.

G

DIAGRAM 15 - HIGHLY VISIBLE AND ACCESSIBLE OPEN SPACE DUE TO ITS LOCATION AND DESIGN RESPONSE OF ADJACENT BUILDINGS

PHOTO 14 - SEATS AND LANDSCAPING CAN BE USED TO FRAME AND DEFINE ATTRACTIVE HUMAN-SCALE SPACES, CHRISTCHURCH

PHOTO 13 - ONLY PROVIDE LIGHTING IN OPEN SPACE WHERE NIGHT TIME ACTIVITY IS SAFE AND ACCEPTABLE, CHRISTCHURCH

P C F W A

#### Public open space

When integrated into the built environment, common open spaces, such as front setbacks, plazas, courtyards, and roof decks, enhance the quality of urban life.

Public open spaces are most welcoming when they act as an accessible extension of footpaths and adjacent buildings. Open space provides relief to the urban experience when thoughtfully incorporated with neighbouring uses.

Generally, the quality and design of an open space is more important than size.

57. Locate and orient open space to maximise direct solar exposure during parts of the day when the space is anticipated to be mostly used and to protect from the predominant wind direction.
58. Ensure that open space receives sufficient daylight throughout the day and that it is well connected, particularly in circumstances where it is the result of a building setback or recess.
59. Open space should be visible and accessible from the footpath for all users and support the ground floor use of the adjacent building wherever possible.
60. When designing outdoor public space, use design elements (e.g. shapes, patterns, structures) that are compatible with the design of adjacent buildings to create spaces that are unique and respond to their local context.
61. Provide seating and/or play elements that promote the activation of the space and cater for a variety of users (young and old).
62. Only provide lighting in public spaces that are intended to be used at night and that considered to be safe and secure after dark.
63. Use robust materials that are easy to maintain and retain their long term appearance. This is particularly important in public spaces that are prone to increased wear.

C W A

**Access and entrances**

The location, type and design of pedestrian and vehicle access points can have a significant bearing on the streetscape, site layout and building façade design.

The entrance to a building makes an important contribution to the way it is experienced. Entrances provide visual interest by breaking up a façade; they also add a human scale to more intensive developments and can positively contribute to the overall appearance of a building when designed well.

Visible activity on the ground floor and upper street façade levels enhances public safety through passive surveillance and creates opportunities for social interaction.

PHOTO 15 - DIFFERENCE IN ENTRANCE DESIGN BETWEEN RESIDENTIAL AND COMMERCIAL ACTIVITIES (PETONE, LOWER HUTT)

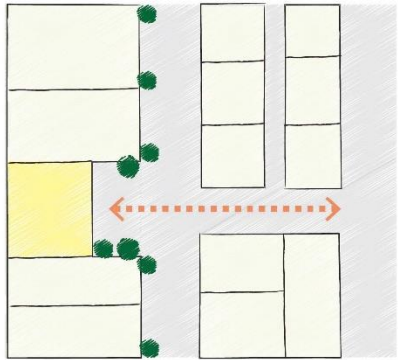

DIAGRAM 16 - ENTRY OR OPEN SPACE AT STREET ALIGNMENT

64. Ensure entrances are clearly defined and visible from the street to enable them to be easily located and accessed.

65. Entrances that serve high density developments should provide sufficient space for people to gather (e.g. small entry plaza) and include signage and landscape treatment that enhances the legibility of the entrance location. Indoor lobby spaces should have a clear visual and physical connection to the street.

66. Apply 'universal access' design standards to entrances of public buildings (e.g. consider entrance width and intergration of ramps into the design). Wayfinding legibility can be improved by signalling doorways and access points (eg, by using colour signage themes).

67. Entry to any ground floor commercial activity should have a distinct appearance and be designed in a way that differentiates it from a residential unit entrance.

68. Mailboxes and other facilities used daily in a residential building should be placed in the lobby to increase internal pedestrian activity and reduce the potential for clutter in the public realm.

69. Entrances should be designed to provide all weather shelter (e.g. canopies or overhangs) with suitable lighting incorporated into the design. Verandahs should also be provided along active edges where possible.

PHOTO 16 - LANDSCAPE DESIGN IN AN OPEN SPACE SHOULD BE CONSIDERED AS AN INTEGRAL PART OF THE BUILDING DESIGN, CHRISTCHURCH

PHOTO 17 - LANDSCAPING CAN BREAK UP LARGE FORMS AND BRING VISUAL INTEREST TO THE STREET EDGE, CHRISTCHURCH

PHOTO 18 - LANDSCAPING CAN SOFTEN HARD SURFACES SUCH AS PARKING AREAS

C W A

#### Landscape treatment

Landscape design can greatly improve the amenity, experience and integration of more intensive forms of development into a street or neighbourhood. The implementation of carefully considered landscape design can help to enhance different design elements, such as the screening or softening of hardstanding areas (e.g. driveways, parking, service areas), mitigate the effects of building bulk and offer amenity and environmental benefits.

Coordinating landscaping early in the building and site design process can increase opportunities to more effectively integrate landscape treatment into outdoor open space, traffic circulation routes, service locations and the interface between the public and private domain.

70. Where possible, retain existing mature and healthy vegetation and integrate into the site development.
71. Use planting to improve the outlook from buildings and the street and to soften hard surface areas such as car parks or service areas.
72. Choose plants that are appropriate to the climatic conditions, scale and character of the area; planting species that require low maintenance and attract local bird life is also encouraged.
73. Deciduous trees provide shade in summer and light in winter, but careful consideration should be given to species selection in heavily shaded areas to ensure survivability.
74. Use of hard landscape elements such as low walls, kerbs or raised beds is encouraged as these can provide protection to plants and, where integrated into the site design, can add to the visual amenity of outdoor spaces.
75. Maximise opportunities for sustainable plantings and permeable surfaces in footpaths, roofs, courtyards, and rear yards. Also, decking and green/living roofs support a more visually compelling roof landscape and reduce air pollution, and the amount of water entering the stormwater system.

DRAFT
