<b>CHAPTER 3 – ZONING</b>				
2	3 – Zoning	Policy 3.4.2	<p>Amend the explanation to Policy 3.4.2 as follows:</p> <p>As a result of particular issues arising that require different management techniques, special controls have been established to address specific environments or resource issues within the principal zones. These recognise the special qualities or issues facing an area, and enable more specific techniques to be used to promote sustainable management. Such controls are applied to areas with particular amenity or other environmental qualities. Conservation and Hill Areas cover special environments with high amenity values within the Residential Zone. The Southern Hills Overlay Area (SHOA) is comprised of areas within the Southern Hills which have a high value in at least one of the categories of ecological, visual and/or landscape significance.</p> <p><u>In addition to zoning and overlays provided for in the District Plan and District Plan Maps, the Wallaceville Structure Plan Area comprises a number of distinct precincts as described in Appendix Residential 3. Minor variations to standards are included in both the Residential Zone and Business Zone rules chapters for these precincts in order to address and recognise the particular values, opportunities and constraints of the site and in order to achieve the outcomes of the structure plan.</u></p>	Wallaceville Structure Plan Area
<b>CHAPTER 4 – RESIDENTIAL ZONE</b>				
3	4 – Residential Zone	New objective 4.3.5	<p>Insert new Objective 4.3.5 and explanation as follows:</p> <p><b><u>To provide for development of the Wallaceville Structure Plan Area which:</u></b>  - <b><u>makes efficient use of a strategic land resource</u></b>  - <b><u>promotes the sustainable management of land resources</u></b>  - <b><u>ensures that an integrated approach is taken to the development of the area to ensure that staged development does not compromise future development stages</u></b>  - <b><u>achieves a new mixed use village within Upper Hutt that provides employment opportunities and local retail services</u></b>  - <b><u>responds to site opportunities and constraints</u></b>  - <b><u>avoids, remedies or mitigates adverse environmental effects</u></b></p> <p><u>The Wallaceville Structure Plan Area has a number of site specific values, constraints and opportunities. It is also a very important land resource within the City's urban boundary. Its development should therefore occur with care.</u></p> <p><u>The Wallaceville Structure Plan was developed to provide for the development of the Wallaceville Structure Plan Area in a logical and coherent manner that takes into account the historical, cultural, environmental and landscape characteristics of the area. The Structure Plan has been adopted by the Council as the guiding document for the development of this area and as such all development should be guided by this document as to what is appropriate. The intentions and outcomes for each of the precincts contained in the Structure Plan provide an outline of the development that the Structure Plan is seeking to achieve. These are the key considerations for development in this area.</u></p>	Wallaceville Structure Plan Area
4	4 – Residential Zone	Policy 4.4.3	<p>Insert the following paragraph into the explanation of Policy 4.4.3 - To ensure that non-residential activities within residential areas do not cause significant adverse environmental effects:</p> <p><u>While provided for as a Discretionary Activity, it is recognised that commercial development may take place in the Urban Precinct of the Wallaceville Structure Plan, which may include the commercial redevelopment of the farm management building and dairy building, provided that significant adverse environmental effects on the Business Commercial Zone (the Gateway Precinct), residential activities and other areas of Upper Hutt City can be avoided or mitigated. This does not preclude other potential development options for the Urban Precinct being developed that are compatible with residential activities.</u></p> <p><u>Resource consent applications for any commercial development not consistent with the Wallaceville Structure Plan will need to be carefully assessed against Policies 4.4.3 and 4.4.16 in particular.</u></p>	Wallaceville Structure Plan Area
5	4 – Residential Zone	Policy 4.4.4	<p>Insert the following additional paragraph in the explanation to Policy 4.4.4 as follows:</p> <p><u>In the Wallaceville Structure Plan Area, the intentions and outcomes for each of the Precincts define the particular amenity that is envisaged for development of this area.</u></p>	Wallaceville Structure Plan Area
6	4 – Residential Zone	Policy 4.4.6	<p>Amend the explanation to Policy 4.4.6 as follows:</p> <p>To mitigate the adverse effects of noise within residential areas to a level consistent with a predominantly residential environment.</p> <p>Noise is a particularly important amenity consideration in residential areas as people are living in close proximity to each other. This policy aims to ensure that noise levels experienced are reasonable for a Residential Zone. <u>In the Wallaceville Structure Plan Area, fencing, noise insulation and/or ventilation standards seek to mitigate any potential adverse effects of noise arising from adjoining activities.</u></p>	Residential Zone of the Wallaceville Structure Plan Area

7	4 – Residential Zone	Policy 4.4.13	<p>Amend the explanation to Policy 4.4.13 as follows:</p> <p>The Plan identifies areas considered suitable for higher density residential development. These areas are located surrounding the central business district, around the Trentham neighbourhood centre located at Camp Street, and near the Wallaceville railway station from Ward Street to Lane Street, <u>and within the Urban Precinct and Grants Bush Precinct of the Wallaceville Structure Plan area.</u></p>	Urban Precinct Grants Bush Precinct
8	4 – Residential Zone	New policy 4.4.14	<p>Insert new Policy 4.4.14 and explanation as follows:</p> <p><b><u>Policy 4.4.14 Development within Area A of the Wallaceville Structure Plan Area shall be consistent with the Wallaceville Structure Plan in Appendix Residential 3.</u></b></p> <p><u>The Wallaceville Structure Plan in Appendix Residential 3 includes the following:</u></p> <ul style="list-style-type: none"> <li>- the Structure Plan Map</li> <li>- a description of the Wallaceville Plan Change Precincts including the intentions and outcomes for each precinct</li> <li>- indicative road typologies</li> <li>- Wallaceville Stormwater Management Principles</li> </ul> <p><u>The Wallaceville Structure Plan has been based on detailed assessment of site constraints and opportunities and sets out an appropriate response to these. To ensure that adverse effects of urban development are appropriately managed, the Structure Plan includes consideration of:</u></p> <ul style="list-style-type: none"> <li>- the site's servicing and infrastructure</li> <li>- the site's stormwater requirements and flooding risks</li> <li>- how potential effects on the City's road network are appropriately managed,</li> <li>- design flexibility to enable a suitable level of residential amenity</li> <li>- variable housing typologies to respond to housing</li> </ul>	Residential Zone of the Wallaceville Structure Plan Area
9	4 – Residential Zone	New policy 4.4.15	<p>Insert new Policy 4.4.15 and explanation as follows:</p> <p><b><u>Policy 4.4.15: Development within Area B of the Wallaceville Structure Plan shall be consistent with a structure plan which:</u></b></p> <ul style="list-style-type: none"> <li>- <b><u>Incorporates residential areas of Area B within the Wallaceville Living precinct</u></b></li> <li>- <b><u>Promotes a design theme that is consistent with Area A in terms of road reserve and reserve corridors, road typologies, stormwater management, bulk and location requirements, boundary treatments, and landscaping measures;</u></b></li> <li>- <b><u>Provides for urban development that allows for a range of different housing typologies including clusters of comprehensive residential development, which are appropriate to their locations, maintains amenity, and supports pedestrian, cycle and public transport;</u></b></li> <li>- <b><u>Provides an internal roading concept that retains the historic roading pattern and, provides for appropriate access onto Alexander Road;</u></b></li> <li>- <b><u>Seeks to retain, where practicable, existing notable trees, the ecological values within the area and seeks to integrate development with the floodplain remnant conservation covenant;</u></b></li> <li>- <b><u>Seeks to address the interface between the area and adjoining properties including the Ministry of Defence site and the Trentham Racecourse;</u></b></li> <li>- <b><u>Incorporates residential development adjoining Alexander Road that recognises the nature of this section of the road and of land uses on the opposite side of the road</u></b></li> </ul> <p><u>While an assessment of the constraints and opportunities of Area B has been completed, the structure plan has not been able to be completed at the time of rezoning due to uncertainty surrounding the floodplain remnant and the design of development on the opposite side of Alexander Road. Policy 4.4.15 seeks to ensure a new structure plan will be submitted for the entire Area B prior to development proceeding and that the Area B structure plan will need to include consideration of matters listed above in order to ensure that development is integrated with Area A and reflects the identified values, constraints and opportunities.</u></p> <p><u>It is expected that Area B will have the characteristics of the Wallaceville Precinct, and be predominantly standard density suburban living. Small areas of higher density residential development may be specifically identified in the Structure Plan to ensure a range of housing typologies and to create nodes in proximity to open spaces or key intersections.</u></p>	Residential Zone of the Wallaceville Structure Plan Area
10	4 – Residential Zone	New policy 4.4.16	<p>Insert a new Policy 4.4.16 and explanation as follows:</p> <p><b><u>In considering an application for resource consent within the Wallaceville Structure Plan Area for a proposal determined not to be consistent with the Structure Plan for either Area A or Area B, particular regard shall be given to:</u></b></p> <ul style="list-style-type: none"> <li>- <b><u>whether the development is appropriate given the site specific constraints and opportunities</u></b></li> <li>- <b><u>the degree to which the development will integrate with development that is anticipated in the structure plans</u></b></li> <li>- <b><u>whether the development will be adequately serviced by infrastructure and transport</u></b></li> <li>- <b><u>the extent to which adverse environmental effects on other areas of Upper Hutt City are avoided, remedied or mitigated</u></b></li> </ul> <p><u>The Wallaceville Structure Plan provides for the development of the Wallaceville Structure Plan Area in a logical and coherent manner that takes into account the historical, cultural, environmental and landscape characteristics of the area. It also establishes outcome expectations based on an analysis of site values, constraints and opportunities. Requiring development to be consistent with this plan will ensure that future development of the local centres represents sustainable management of the land resource.</u></p> <p><u>However, the development of the site will occur over an extended period. During this time opportunities to integrate alternative land uses within the site may arise. This policy provides a framework for the consideration of such alternative land uses and layouts. The policy emphasises the importance of ensuring development is integrated with the remainder of the site's development, and that it avoids, remedies or mitigates adverse effects on other areas of the City.</u></p>	Residential Zone of the Wallaceville Structure Plan Area

11	4 – Residential Zone	Method 4.5.1	Amend Method 4.5.1 as follows:  District Plan provisions consisting of a Residential Zone identifying the residential environments within the City, including the Conservation, and Hill, and Residential (Centres Overlay) Areas <u>and the Wallaceville Structure Plan Area</u> . Rules and standards apply to activities so that adverse effects are avoided, remedied or mitigated. Consent application procedures provide for the consideration of effects on a case-by-case basis and the imposition of appropriate conditions when necessary. Design guidelines provide for assessment of Comprehensive Residential Developments and subdivision design in Residential (Centres Overlay) Areas.	Residential Zone of the Wallaceville Structure Plan Area
<b>CHAPTER 6 – BUSINESS ZONE</b>				
12	6 – Business Zone	New objective 6.3.1A	Insert new objective 6.3.1A as follows:  <b><u>Provide for the Gateway Precinct of the Wallaceville Structure Plan Area as a neighbourhood centre which:</u></b> <b><u>- Provides local convenience retail and services;</u></b> <b><u>- Provides employment opportunities;</u></b> <b><u>- Provides residential development where this is compatible with retail, commercial and office land uses</u></b> <b><u>- Makes efficient use of natural and physical resources</u></b>  <u>This objective seeks the creation of a local centre that will generate retail and employment opportunities in the Wallaceville Structure Plan Area. This area will support the high density residential development and other parts of the site.</u>	Gateway Precinct
13	6 – Business Zone	Policy 6.4.4	Insert additional explanation to Policy 6.4.4 as follows:  <b>To control the size and scale of buildings and the visual appearance of sites within the Business Zone.</b>  This policy aims to preserve amenity values within the Business Zone. Buildings and sites need to be attractive and be of a size or type that is compatible with the neighbourhood.  The scale, nature and effects of industrial activities are not particularly compatible with residential activities. To avoid possible conflicts, the Plan provisions limit residential activity within the Business Industrial Sub-zone to that required for the effective operation of the business activity.  <u>In the Gateway Precinct of the Wallaceville Structure Plan Area all new buildings and significant exterior alterations to existing non-listed heritage buildings require resource consent as a restricted discretionary activity subject to compliance with specific standards. Matters of discretion include the effects of the proposed development on the character and significance of heritage features within the precinct.</u>	Gateway Precinct
14	6 – Business Zone	New policy 6.4.6	Insert new Policy 6.4.6:  <b><u>Policy 6.4.6: Development occurs within the Gateway Precinct of the Wallaceville Structure Plan Area which is consistent with the Wallaceville Structure Plan Gateway Precinct outcomes listed in Appendix Residential 3</u></b>  <u>Explanation:</u> <u>The Wallaceville Structure Plan identifies the Gateway Precinct as the location of a local centre incorporating retail, commercial and above ground level residential uses. It also establishes outcome expectations based on an analysis of site values, constraints and opportunities. Requiring development to be consistent with the Structure Plan will ensure that future development of the local centre represents sustainable management of the land resource.</u>	Gateway Precinct

<b>CHAPTER 11 - HERITAGE</b>				
16	11 – Heritage	Policy 11.4.1	Amend Policy 11.4.1 and its explanation as follows:  <b>To protect buildings, structures, features, areas, and sites of significant heritage value within the City from activities which would result in their unnecessary degradation, inappropriate modification or destruction.</b>  Heritage features include archaeological sites, buildings, structures, features and areas. These provide important links with the past. Their identification and protection through the District Plan assists in developing a greater awareness and understanding of our history and identity.  Activities have the potential to compromise, or even destroy, the character and significance of heritage features. Council seeks to manage adverse effects of activities by allowing any repair and maintenance of heritage features as a permitted activity and grouping other activities according to their likely adverse effects on them. <u>In the Gateway Precinct of the Wallaceville Structure Plan Area all new buildings and significant exterior modification to existing non-listed heritage buildings require resource consent as a Restricted Discretionary activity. Matters of discretion include the effects of the proposed development on the character and significance of heritage features within the precinct.</u>	Gateway Precinct / Business Commercial Zone
